FOREWORD

Bulletin on industrial production is a publication of the Agency for Statistics of Bosnia and Herzegovina that contains a comprehensive overview of official statistical data on industrial production by products in Bosnia and Herzegovina.

According to the Statistical Law of Bosnia and Herzegovina (Official Gazette of Bosnia and Herzegovina, No. 26/04 and 42/04) Agency for Statistics of Bosnia and Herzegovina is in charge of the production and publishing of aggregated official statistics for Bosnia and Herzegovina, in accordance with the internationally accepted methodology, using data submitted by the entity statistical institutes and by the Branch Office of the Agency for Statistics of Bosnia and Herzegovina in Brčko District.

Data on regular annual industrial production in Bosnia and Herzegovina were collected uniformly for the first time for the year 2003, and the results were published in the beginning of 2005. From that point onward annual results on industrial production are collected, processed and published on regular basis.

Regular annual collection and processing of data on industrial production in Bosnia and Herzegovina are based on use of unique Nomenclature of Industrial Products in Bosnia and Herzegovina, which is regularly updated with relevant regulations and nomenclatures of European Union, and also on unique methodological approach. Up to 2009, data on industrial production in Bosnia and Herzegovina were collected by using Nomenclature of Industrial Products of BiH (based on relevant EU standards: Classification of Economic Activities NACE Rev1.1 and PRODCOM list from 2005).

Within the common international and European operation on revision of the economic classifications of activities and products, a quite significant revision of EU classifications and nomenclatures was done. Since 2008, all EU Member States are obliged to implement the Classification of Activities NACE Rev 2¹, Classification of Products by Activity CPA ver 2.1, whose application is mandatory from January 2015 and relevant PRODCOM list in SBS, PRODCOM and STS statistics. EU PRODCOM list 2008 godine² is the first revised list of industrial products based on the revised system of economic classifications.

In line with the changes in EU classifications and nomenclatures, Bosnia and Herzegovina introduced the corresponding revised classifications and nomenclatures: Classification of Activities of Bosnia and Herzegovina 2010 - KD BiH 2010 (Official Gazette of BiH No. 47/10) Classification of products by activities of Bosnia and Herzegovina 2016 – KPPD BiH 2016³ and Nomenclature of Industrial Products – NIP BiH 2010 (Official Gazette of BiH No. 12/11 and 41/11), which is fully compliant with PRODCOM list 2010⁴. As the EU PRODCOM list is the subject of regular annual adjusting, this publication is prepared by using NIP BiH/PRODCOM 2019 nomenclature (NIP BiH 2010 updated by EU PRODCOM list for 2019).

Since 2011, Agency for Statistics of BiH regularly delivers the data on industrial production by products at the state level to EUROSTAT.

We hereby express our gratitude to the Institute for Statistics of the Federation of Bosnia and Herzegovina and the Institute for Statistics of Republika Srpska and Branch Office Brcko of the Agency for Statistics of Bosnia and Herzegovina who timely provided complete and quality data for the preparation of this publication.

Vesna Čužić, Actg. Dir.
Sarajevo, October 2020

1 NACE is an acronym derived from the French title for EU classification of economic activities: "Nomenclature statistique des Activités économiques dans la Communauté Européenne". NACE Rev. 2 is a valid version of EU classification of economic activities, it was established by Regulation EC No. 1893/2006, on December 20th, 2006, and it has been applied in the EU since January 1st, 2008

2 Commission Regulation (EC) No 36/2009, since July 11th, 2008.

4 Commission Regulation (EU) No 163/2010, since February 9th, 2010

INTRODUCTION

Data on annual industrial production in Bosnia and Herzegovina were published for the first time in the beginning of 2005, covering the production on own account of the year 2003. From that point onward, the results of the annual survey on industry have been included in the publishing plan of the Agency for Statistics of Bosnia and Herzegovina.

Starting with annual data for 2005, in addition to the data on the regular industrial production (production on own account) the data on production under contract have also been published on the regular basis.

The annual survey on industry in Bosnia and Herzegovina IND - 21 (serving as basis for data presented in this publication) is oriented to the collection and processing of data on industrial production at the level of product, while data collection, processing and publishing related to the structure of production, following the standard EU requirements (SBS Regulation⁵), is conducted separately, annually, as structural survey.

The annual survey on industry, at the product level, is fully harmonized between all official statistical institutions of Bosnia and Herzegovina, and is largely compliant with international, primarily European, standards and regulations. The following main objectives were set upon annual survey on industry:

- data collection, processing and publishing of annual statistics on industrial production in BiH, covering the territories of both entities (and their administrative units), and territory of Brčko District, according to the list of products specified in Nomenclature of Industrial Products of Bosnia and Herzegovina — (NIP BiH), which is based on EU PRODCOM list and which is regularly adjusted to annual amendments to EU PRODCOM list;
- collection and processing of data necessary to establish harmonized system of weights to be used in compilation of monthly volume indices of industrial production in Bosnia and Herzegovina, in entities and in Brčko District, in accordance with European standards and regulations;
- dissemination of data on industrial production to domestic and international users.

PRODCOM survey is oriented to the product and provides data related to the volume of production, volume and value of sales of industrial production, at the level of a single product, as it is specified in Nomenclature of Industrial Products. The subject of the survey is industrial production in the reporting year at the territory of Bosnia and Herzegovina.

This publication presents in a systematic way the data collected through 2019 annual survey on industry and gives an overview on volume of production, volume and value of sales of industrial products (goods and services) in Bosnia and Herzegovina, which are results of regular production of reporting units (0) and production carried out by the reporting units under contract (1).

Data on industrial production in 2019 are collected using the Nomenclature of Industrial Products of Bosnia and Herzegovina — NIP BiH/PRODCOM 2019 (NIP BiH 2010 originally and harmonized with EU PRODCOM list 2019). NIP BiH 2010 is published in Official Gazette of Bosnia and Herzegovina no. 12/11 and 41/11. Since 2010, NIP BiH 2010 is obligatory standard for annual statistical surveys in industry, but starting with 2013, it is implemented as obligatory standard for all statistical surveys in the field of industry and for all statistical surveys that require collection, processing and presentation of results, based on industrial products. Direct comparison of PRODCOM data for 2010 - 2019 with already published data from previous years cannot be done on the product level without prior work on regrouping the historical data according to the new Nomenclature of Industrial Products. Special correspondence and tables and conversion coefficients for the old and new nomenclature have to be used for the purpose of product data regrouping and comparison between two nomenclatures.

5 Structural Business Statistics Regulations. i.e. SBS-R (EU Council Regulations No 295/2008, 250/2009, 251/2009 and 275/2010)

METHODOLOGICAL EXPLANATIONS

ORGANIZATION OF THE SURVEY

Agency for Statistics of Bosnia and Herzegovina (BHAS), Institute for Statistics of the Federation of BiH (FIS) together with its cantonal offices, Institute for Statistics of Republika Srpska (RSIS) together with its regional offices and Branch Office of the Agency for Statistics of Bosnia and Herzegovina - Brcko District (EBD) participates in the implementation of annual survey on industry.

Since 2011, BHAS, FIS and RSIS harmonized the methodology of annual survey on industry, i.e. jointly agreed upon the contents and the form of questionnaire and prepared instructions for filling it up. They also created correspondence tables between old and new nomenclatures of industrial products and conversion coefficients for use in historical data regrouping (based on information and contacts with observation units and based on expert's estimates).

As a standard practice, BHAS, FIS, RSIS and EBD are in charge of maintenance and updating the Statistical business register, which serves as basis in defining the coverage of statistical units for PRODCOM survey.

FIS, RSIS and EBD determined the scope of statistical units for the survey, organized the whole field work i.e. they printed and distributed questionnaires and all accompanying documents necessary for survey to be carried out and data collected, processed and published. All major ambiguities and difficulties which occurred in the methodology were resolved in direct contact with reporting units.

IT applications for data entry, control and processing were developed in both entity statistical institutes, reflecting the objectives of the annual survey on industry and structure and contents of the defined questionnaire. BHAS made the agreement with FIS and RSIS on the deadlines, contents, type and form of data to be transmitted for further processing, and developed IT application for taking over, aggregation and compilation of PRODCOM results for the level of Bosnia and Herzegovina. FIS, RSIS and EBD collected the completed questionnaires and performed all activities related to data entry, analysis and control. After appropriate checks and controls, the collected data were submitted to BHAS in the required form. BHAS aggregated and conducted analysis of data collected by FIS, RSIS and EBD and prepared and published PRODCOM results for Bosnia and Herzegovina.

CONCEPTS AND DEFINITIONS INDUSTRY

The term industry, as it is used in annual survey on industry IND-21, refers to the three sections of the classification of activities KD BiH 2010 (EU NACE Rev.2), in line with the requirements of the EU PRODCOM Council Regulation No. 324/91 and Commission Regulation No. 914/2004:

- B – MINING AND QUARRYING
- C – MANUFACTURING
- D – ELECTRICITY, GAS, STEAM AND CONDITIONING SUPPLY
- E - WATER SUPPLY; SEWERAGE, WASTE MANAGEMENT AND REMEDIATION ACTIVITIES is defined additionally for national purposes.

Definition of industry is the same as the definition used by EU statistics. However, certain products that were excluded from EU PRODCOM list (following the changes in EU statistical standards) are still included in NIP BiH 2010, due to their importance for BiH economy and because no other specific survey exists in BiH to enable collecting of such data. Example for that is division 38 in the section E according to KD BiH 2010. In such a way, it is possible to collect necessary data and adequately follow changes in production and structure of total industrial production in Bosnia and Herzegovina.

Concepts and definitions of all basic terms used in annual PRODCOM survey on industry (such as principal, secondary and supporting activity, statistical units, product, goods, services, regular production i.e. production on own account, production under contract i.e. outsourcing, etc.) are taken from the introduction to NACE Rev 2, from EU Regulation on the statistical units for the observation and analysis of the production system in EU⁶, from introduction to ISIC Rev. 4⁷ and from introduction to PRODCOM list 2010.

⁶ Council Regulation (EEC) No 696/93 on the statistical units for observation and analysing within European Community

⁷ ISIC Rev. 4 - International Standard Industrial Classification

Those definitions and concepts are harmonized with methodological frame of SNA 93/SNA 2008 and ESA 95/ESA 2010⁸.

STATISTICAL UNITS

Statistical units in business statistics are autonomous institutions and parts thereof that are contributing in performing an economic activity. They are undertaking economic transactions of goods and services by utilizing their own labour force (manpower) for producing goods and services that could be sold, given to other parties without any compensation, or use for further processing and production. The important attribute of statistical unit is its autonomy in making financial obligations and its right to be owner of tangible and intangible assets.

Observation units are those statistical units that statistics is compiled for, with the aim of monitoring their features. The basic limitation set upon statistical observation unit is its autonomy in regard to financing and production process.

This results in two types of observation units:

1. Units that are completely autonomous in regard to financing and production process (enterprise) and
2. Units which are autonomous only in regard to production process (enterprise units).

Autonomy in decision-making means that such enterprise units are keeping administrative records on all basic characteristics of the process.

Reporting units are those statistical units that are required to provide data. They could be observation units that are subject of interest, but also they could be completely different units. Reporting units of the annual survey on industry are legal units i.e. enterprises that are, in the Register of business subjects, classified in the sections B, C, D and E (industry in wider sense), as well as enterprises not classified in industry sections, but have their business parts performing industrial activities. Observation units are enterprises and enterprise units that are engaged in industrial activities. Results of the industrial activity are goods and services, i.e. products as they are defined in Nomenclature of Industrial Products.

Enterprise is the smallest combination of legal units that makes an organizational unit producing goods or services, and which has a certain degree of autonomy in decision-making, especially for the allocation of its current resources. An enterprise carries out one or more activities at one or more locations.

Local unit is an enterprise or part thereof (e. g. a workshop, factory, warehouse, office, mine or depot) situated in a geographically identified place. At or from this place, economic activity is carried out for which — save for certain exceptions — one or more persons work (even if only part time) for one and the same enterprise.

Activity of statistical unit is determined at the class level of Classification of Activities KD BiH 2010 (four-digit code).

PRODUCTS

Product — is the outcome of some industrial activity, which is defined in the nomenclature of industrial products. It is a generic term for goods and services, i.e. goods which have physical characteristics as well as services.

Goods — are physical objects for which a market demand exists, over which ownership rights can be established and whose ownership can be transferred from one legal unit to another by engaging in transactions on markets. They are in demand because they may be used to satisfy the needs or wants of households or the community or to produce other goods or services. The production and exchange of goods are quite separate activities. Some goods may never be exchanged while others can be bought and sold numerous times. The separation of the production of goods from its subsequent sale or resale is an economically significant characteristic of goods that is not shared by services.

⁸ UN System of National Accounts 1993 - SNA 93 and SNA 2008 and European System of Accounts 1995 - ESA 95 (EU Council Regulation No 2223/96), harmonized with SNA 93, and proposal ESA 2010 harmonized with SNA 2008

Commodity — is a transportable good that may be exchanged. It may be product from production line, a unique item (artwork) or the material medium for providing services (software diskette). This is the concept used for customs classifications.

Semi-finished products — are products that have undergone the phase of processing but require further processing before they are ready for use. They may be sold to other manufacturers for further processing, and one of the typical examples includes rough metal castings sold for finishing elsewhere.

Finished product — is each product that has undergone some level of processing during production and reached such a degree of transformation or treatment that it is assigned specific code and description listed in the nomenclature of industrial products. Such definition of finished product also covers all finishing works related to the specific products, such as cleaning, packing, quality testing, sorting etc. Damaged products (waste) are not to be considered as finished products.

Intermediate product — is a product that reached level of processing that it became specified in nomenclature of industrial product produced by enterprise or one of its parts. Such product is used in the same enterprise or other part of the enterprise for further processing in order to become new product (or to be assembled in such a way to create new product), as defined in nomenclature of industrial products. These products are separately presented in the survey as products consumed for further processing in the same enterprise/local unit. Goods and product purchased from third parties to be resold in the same shape as purchased, as well as products used for investment in fixed assets of the enterprise or parts of the enterprise are not considered as intermediate products.

Unfinished Product — is a product that has not reached required phase in processing or treatment as it is specified in NIP BiH 2010, so it is not subject of the survey.

Services — are not separate entities i.e. outputs over which ownership rights can be established. They cannot be traded (they can be exchanged) separately from their production. Services are heterogeneous outputs produced by order and typically consist of changes in the conditions of the consuming units realized by the activities of producers at the demand of the consumers. By the time their production is completed they must be provided to the consumers. Providing of services must be restricted to activities that are capable of being carried out in one unit for the benefit of another.

PRODUCTION

Production is an activity resulting in a product. The term is used with reference to the whole range of economic activities. In the domain of industry, production is the process resulting in industrial products, as defined in Nomenclature of Industrial Products, referring to goods and services.

Production is the procedure that transforms raw materials, semi-finished products and other similar inputs for which it is typical, after the process is over, that they are changed by form and features i.e. they result in a new product. Industrial statistics uses more precise terms in defining production: **regular production, service production** of industrial products (**production under contract**), **total production, industrial services** (treatment, repairs and maintenance etc.), depending on the main characteristics of the activity which is done and depending on ownership of raw materials and other inputs of the process, and also depending on behalf of whom the production or services are performed.

Regular - own production This production is accomplished by the observation unit (enterprise/local unit) utilizing purchased or its own raw materials. The observation unit is the owner of a finished product and sells its own products in the market and reports all volume and value data on production. It should be emphasized that industrial services included in NIP BiH 2010 as special products (treatment on own account, repairs and maintenance) are defined in the same way as all other industrial products.

Production, processing under contract - (Outsourcing)

Outsourcing is contractual agreement according to which the Principal requires the Contractor to carry out specific tasks that are in the domain of Principal activity, such as parts of a production process or even the full production process. The principal and the contractor cannot be enterprise and local units within the same

enterprise, i.e. production under contract between different plants belonging to the same enterprises is not possible. Sometimes, the term "production under contract" is used as well.

Contractor, based on contract agreement with Principal, produces or processes specific product.

Outsourcing is a very important concept that should be properly used in determining the scope of industrial statistics and carrying out industrial surveys. It is the most frequent case and represents essentially a boundary between manufacturing and wholesaling.

Principal is the unit that enters into a contractual relationship with another unit (Contractor) for that other unit to carry out specific tasks, such as parts of a production process or even the full production process.

Contractor is the unit that carries out specific tasks, such as parts of a production process or even the full production process, on a contractual relationship with a Principal. The term sub-contractor is also used.

DATA

Annual PRODCOM survey on industrial production (PRODCOM survey) collects data on total production completed, internal consumption (production spent for further processing in the same enterprise), stocks and sales of individual products, as defined in Nomenclature of Industrial Products NIP BiH 2010, updated by the current PRODCOM list 2019. In such a way, for some specific product, data on production are presented as the source side and data on internal consumption, sales and final stocks as expenditure side in the balance of available quantities. Data are collected for two different types of production:

- Own production
- Production under contract (outsourcing).

EU PRODCOM regulation defines four types of PRODCOM results (**T**, **S**, **I** and **V**) that should be produced (in accordance with valid PRODCOM list) in order to enable international comparability:

Total Production — T is the actual quantity of the certain product, defined by the Nomenclature of Industrial Products, produced during the reference year in the observation unit, irrespective of whether sold to the third parties in the country or abroad (exports), put into stock of finished products (for sale) or used for further processing (intermediate products), or combined. Total production should be reported by volume i.e. as physical quantity expressed in specified measuring unit, whether the products are:

- processed into another product,
- fitted into another product,
- put in stock.

This also includes those products that are incorporated by the enterprise into the manufacture of other product. In addition, production by value and volume should be reported for total production.

Production Sold — S covers the quantity and total value of products no matter when they were produced and which are sold (invoiced) during the reporting period. Production sold should be reported by value and volume (quantity) expressed in specified measuring unit. Value of Production Sold is calculated on the basis of the ex-works selling price and quantity sold during the reporting period. Value of Production Sold always includes packaging costs, even if they are charged separately. However, the following are not included:

- turnover tax and consumer tax charged from consumer,
- separately charged and invoiced costs,
- discounts granted to customers.

Industrial services — I cover treatment, repairs and maintenance, and assembly work (mounting, installation and assembling) that is done by observation unit (enterprise/local unit) and invoiced separately. Industrial services (service is "the product") should be reported separately for each specific type of service by the value of the service, i.e. the provision paid for it (in this case, industrial service is the "PRODCOM product" listed in NIP BiH 2010).

Total production in volume — **V** refers to physical products (goods) and shows the actual quantity of the single product produced during the reference year in the observation unit, expressed in specified measuring unit. Sold production is not reported.

Data collected through survey in BiH enables compilation of each above-mentioned types of results. The Agency for Statistics of B&H publishes PRODCOM data for BiH at the product level for the following variables: production quantity, sold/delivered quantity and Production value sold / fee paid (in 000 KM) while PRODCOM data for BiH are submitted to Eurostat according to the prescribed types of production (T, S, I and V).

Production under contract i.e. “outsourcing” (production of goods and provision of industrial services based on contract) is very important type of industrial production that occurs rather frequently in BiH and this is the reason why it is given special attention in annual survey on industry by presenting it in this publication separately from regular production (production on own account).

Data on production under contract are reported by enterprise/local unit that carries out this type of production (it is the observation unit), in particular the following data: volume of production and provision paid for production service (amount paid by principal for the service). Principal (if resident of BiH) is reporting on volume and value of sold production.

Unit Value of the Sold Products — represents an average value of each product, not a real average price of the product. This is not data that is collected directly, but the value obtained by dividing the sold value of the product (sum of data from all production units) by the total volume of the product expressed in KM.

DATA COLLECTION – REPORTING

According to the requirements of EU PRODCOM Regulation, a reporting unit gives, for the production on own account, all information asked in questionnaire. When production under contract is reported, there are two types of reporting units: Contractor and Principal.

- **Contractor** should report on production (that it is really doing) giving information only on production volume and on the provision received from Principal for production service. Contractor should not report on sales.
- **Principal** (only the one that is resident of Bosnia and Herzegovina) should report only on sales giving information on volume and value of production sold and not on volume of production. Principal that is not resident of Bosnia and Herzegovina is not covered by this survey and consequently no data could be collected from such unit.

DATA PUBLISHING

For the level of Bosnia and Herzegovina, the results are selected for publishing data on volume of industrial production and its effect on the market (sale by volume and value), each of the results is presented separately i.e. production on own account and production under contract. The production sold comprises also sales of the stocks done during the reporting period. Also, the following sum of data on own production and data on production under contract are selected for publishing:

- **Volume of production** on own account and volume of production under contract (data given by Contractor),
- **Value of sold** production on own account and value of provision paid for production under contract (data provided by Contractor). This sum is very appropriate variable to compare with available data on total turnover.

IMPORTANT NOTES

CLASSIFICATIONS AND NOMENCLATURES

For the purpose of presenting the results on annual industrial production in Bosnia and Herzegovina, the activity headings and codes are taken from the Classification of Activities - KD BiH 2010, the subcategory headings and codes are taken from the Classification of Products by Activity - KPPD BiH 2016 and the product headings and codes are taken from the Nomenclature of Industrial Products NIP BiH 2010, updated with EU PRODCOM List 2019 (NIP BiH/PRODCOM 2019)

Classification of Activities KD BiH 2010, which is fully harmonized with NACE Rev. 2., (Law on KD BiH 2010, Official Gazette of Bosnia and Herzegovina, No. 100/08 and 32/10, as well as Decision on KD BiH, Official Gazette of Bosnia and Herzegovina, No. 47/10) is in official use in BiH since 01.01.2011.

Nomenclature of Industrial Products — NIP BiH 2010, was officially published in the Official Gazette of BiH, No. 12/11 and 41/11. Since 2010, NIP BiH 2010 has been obligatory standard for annual statistical surveys in industry, with obligation of updating with EU PRODCOM list each year. For the reference year 2019, PRODCOM results are collected and processed by using NIP BiH/PRODCOM 2019 nomenclature.

NIP BiH/PRODCOM 2019 comprises some products that belong to the activity classification sections and divisions that are not included in the original EU PRODCOM list 2019, as follows:

- Division 05 — "Mining of coal and lignite" and
- Division 06 — "Extraction of crude petroleum and natural gas" within the Section B — "Mining and quarrying"
- Division 19 — "Manufacture of coke and refined petroleum products" within the Section C — "Manufacturing" (excluding subcategory 19.10.30)
- Division 35 — "Electricity, gas, steam and air conditioning supply" within the Section — D "Electricity, gas, steam and air conditioning supply"
- Division 36 — "Water collection, treatment and supply" within the Section – E "Water supply; sewerage, waste management and remediation activities"
- Division 38 — "Waste collection, treatment and disposal activities; materials recovery" within the Section – E "Water supply; sewerage, waste management and remediation activities"

SURVEY COVERAGE

It was agreed that for BiH the aforementioned criteria will be implemented through harmonized coverage of enterprises in the entities and BD in such a way that the population of interest will include all the enterprises and their parts having a number of employees ≥ 10 and additionally those enterprises and their parts with annual turnover ≥ 500.000 KM. Framework for selection of enterprises included in the study was prepared on the basis of data of the Statistical business register.

TABLE PRESENTATION OF RESULTS

Table 1. Industrial production and sold/ delivery of industrial products in Bosnia and Herzegovina in 2019.

in 000 KM

Code	Product and activity	Type of production	Measuring unit	Production quantity	Sold/delivered quantity	Production value sold / fee paid
