Official currency	Convertible mark (KM)
Climate	Moderate continental and mediterranean

Administrative structure of Bosnia and Herzegovina (BiH):

The Federation of Bosnia and Herzegovina (FBiH), Republika Srpska (RS) i Brčko District BiH (BD BiH).

The capital of Bosnia and Herzegovina is Sarajevo.

The Federation of Bosnia and Herzegovina is administratively divided into 10 cantons, and cantons are subdivided into municipalities and cities. Republika Srpska is administratively divided into municipalities and cities. Brčko District of BiH is a separate administrative unit.

In BiH there are three National parks and two Nature parks. National parks are Sutjeska, Kozara and Una. Nature parks are Hutovo Blato and Blidinje.

In the 2013 Census, the concept of “usual residents” was applied for the first time in order to determine the total number of population. Under this concept, a person shall be considered as a resident of the place at which s/ he alone (in the case of a one-person household) or with members of her/ his household spends most of time, that is, daily rest, irrespective of where the person’s place of residence is registered. Therefore, the total population of a certain place includes persons who lived in that place for a continuous period of at least one year prior to the Census Critical Moment, and persons who at that particular moment lived there less than 12 months but intend to stay at that place for at least one year.

For the census conducted earlier in our country, before 1991, the official results referred to the so-called resident population, i.e. population who reside in the territory of Bosnia and Herzegovina, regardless of whether at the critical moment of the census, the persons were present at the place of residence or were temporary absent, in the country or abroad, due to some other reasons.

In the Population Census in 1961 and 1971 as a resident population persons were registered at the place where they worked at the Census moment, while in the 1981 and 1991 Census these persons were enumerated as a resident population in the places where their families lived.

2018	29.467	15.268	37.744	19.007	-8.277

Natural change is the difference (surplus or deficit) between the number of livebirths and the number of deaths in a given period.

Births and deaths: according to the legal regulations on registration, events of births and deaths are obligatory registered in population registers.

A liveborn child is every child that breathes at birth or shows any other signs of life (beating of the heart, pulsation of the umbilical cord, definite movements of voluntary muscles).

Total fertility rate in BiH 2007-2017

The total fertility rate (TFR) is the number of children that would be born alive to a woman during her childbearing years, if she were to pass through all her childbearing years conforming to the age-specific fertility rates of a given year.

Stillborn is considered a child delivered, or extracted from its mother displaying no signs of life, that is if it did not breath or display any other signs of life, and was carried longer than 22 weeks (approximately 6 months) with more than 500 g birthweight.

METHODOLOGY

Pre-school education is an activity that includes education, care and protection of children aged six months to the beginning of primary school and it is practiced in public and private pre-school institutions.

In the education statistics, **the school** is considered as a group of pupils/ students organized into one school unit who follow the teaching of a particular type and level, according to a unique plan and at a particular location.

The class is a group of pupils/students who are trained during a school year by one teacher or more teachers successively, at the same time in the same room.

Grade is a level of education in which pupils/students acquire a certain amount of knowledge according to the curriculum of a particular type of school in a certain interval of time, but the longest one in a school year.

Higher education institutions are colleges and universities.

College refers to a higher education institution, that implements at least one study program in one area of education.

University refers to a higher education institution that implements at least five different study programs from at least three fields of education.

Enrolled student is any person enrolled in a higher education institution.

Graduate student is a person who receives a bachelor's degree from a college, faculty or art academy.

2004 - 2018

RESEARCH AND DEVELOPMENT EXPENDITURE AS A PROPORTION OF GDP (%)

Investments in research and development allocations recorded a downward trend since 2013. Outlays on research and development are mainly incurred higher education (ca.48.2% of total domestic expenditure in 2018).

RESEARCHES ENGAGED IN RESEARCHES AND DEVELOPMENT

The number of researchers compared to 2012. On research and development in BiH employed 1.983 researchers.

THE NUMBER OF R&D EMPLOYEES BY GENDER

The number of R&D employees has been gradually increasing since 2012. There were 2 853 persons in full- time and part time employment engaged in R&D, out of 49.4% were women.

RESEARCHERS (IN FULL-TIME EQUIVALENT) PER MILLION INHABITANTS

The number of researchers in full-time equivalent is increasing compared to 2012. On research and development in BiH employed 1.566.4 researchers in full-time equivalent.

Working age population: includes all persons of 15 years of age or older, divided in two basic categories: labour force (economically active) and economically inactive population. **The Labour Force or the active population** is composed of the employed and the unemployed persons. **The inactive** are all persons of 15 years of age or older who were not employed during the reference week and who during four weeks (the reference and the three preceding weeks) did not look for employment, as well as persons who were not ready to start work in following weeks should they be offered employment. **Methodological principles** behind the Labour Force Survey are based on the recommendations and definitions of the International Labour Organisation - ILO and the European Statistical Office - EUROSTAT.

Employed by sections of economic activity classification¹⁾ in BiH 2019, structure in %

¹⁾ groups of activity's section (NACE Rev 2): agriculture (A), industry (B,C,D,E,F,G,H,I,J,K,L,M,N), services (O,P,Q,R,S,T,U,V)

Activity rate is calculated as the ratio of labour force and the working age population. **The employment rate** is calculated as the ratio of employed persons and the workingage population. **The unemployment rate** is calculated as the ratio of unemployed persons and the labour force.

The unemployed are persons of 15 years of age or older who:

- a) in the reference period did not engage in any activities for which they received a salary or fee;
- b) spent four weeks (the reference and three preceding weeks) actively looking for employment or found a job and were about to start work in the near future;
- c) might start work during two weeks following the reference week should they be offered employment.

Government Finance Statistics (hereinafter: GFS) provides insight into the development of financial operations of the government sector in BiH, based on which are realized revenues and expenses by component, investments in fixed assets and fiscal balance (net lending/borrowing) as well as financial items (financial assets and obligations).

The basic conceptual framework for the compilation of GFS statistical data is related to the international standards published in the IMF GFS Manual 2014. The GFS data are based on the same conceptual framework as other macroeconomic statistical data, and therefore can directly be compared with other macroeconomic statistics that follow the IMF's international statistical standards.

According to the GFS Manual, the general government sector is defined in a way to include all entities performing government functions as their core business. The billing includes all budgets (at the level of BiH, entity, cantonal and municipal level), funds for pension and disability insurance, employment, health care, child care, vocational rehabilitation and employment of persons with disabilities and solidarity fund in RS, as well as non-budgetary funds for the construction of roads and highways in both entities and the Federal Fund for assistance to victims of natural disasters in the FBiH.

Revenues are broken down into categories: taxes, social contributions, grants and other income.

Expenditures include: compensation of employees, use of goods and services, depreciation, interest payments, subsidies, grants, social assistance and other expenses.

General government debt statistics of Bosnia and Herzegovina have been prepared in accordance with applicable ESA 2010 concepts and EU Regulation (EC) No 479/2009 (so-called **Maastricht debt**).

This debt of the general government and its sub-sectors is calculated as gross consolidated debt, which does not include accrued interest, and is measured at nominal value.

Debt consolidation is done among other sectors of the economy to calculate general government debt.

Maastricht debt includes the following financial instruments on the liabilities side defined by the ESA regulations:

- Cash and deposits
- Debt securities
- Credits and loans

Debt securities are divided into short- and long-term securities, while loans include loans from resident banks and foreign lenders (primarily multilateral financial institutions) of Bosnia and Herzegovina.

¹⁾ Not all activities nor the enterprises of the indicated areas are covered. Coverage is presented in the Notes on Methodology of Thematic bulletin Structural Business Statistics 2017 (www.bhas.gov.ba)

Structural business surveys aim to collect, process and publish statistical data on the structure, competitiveness and characteristics of business entities and their results at different levels of activity.

Number of enterprises covers all enterprises engaged in market production and which are registered in the business register of the population that is the subject of observation.

Number of persons employed is defined as the total number of persons who work in the observation unit (including owners who work, partners working regularly in the unit and unpaid family members working regularly in the unit), as well as persons who work outside the unit to which they belong and which pays them (e.g. sales representatives, delivery personnel).

Turnover covers revenues calculated from sales of products, goods and services provided by reporting unit to third parties during the reference period.

Value added at factor cost is the gross income from operating activities after adjusting for operating subsidies and indirect taxes.

Personnel costs are the total remuneration, in cash or in kind, paid by the employer to an employee (regular and temporary employees as well as home workers) in return for work done by the employee during the reference period.

Total purchases of goods and services include the value of all goods and services purchased during the accounting period for resale or consumption in the production process, excluding capital goods the consumption of which is registered as consumption of fixed capital.

Structure of the number of persons employed in the total of covered activities

INDICATORS are calculated on the basis of the calculated values of the variables.

Turnover per person employed is obtained by dividing the total turnover with a total number of persons employed. This indicator expresses the ability of selling of business unit of specific activity.

Value added per person employed is obtained by dividing the total value added with a total number of persons employed. This indicator is used to measure productivity.

Share of value added on the value of production is obtained by dividing the total added value with a total value of production.

Average personnel costs per employee is obtained by dividing the total personnel costs with number of employees. This indicator shows average personnel costs in certain activity.

Gross operating rate represents the percentage of gross operating surplus in turnover.

Turnover per person employed by activity section, KM

Average price level in Bosnia and Herzegovina in 2018 as compared to the average in 2017 is higher by 1,4%, which is caused by average growth of prices in divisions of Alcoholic beverages and tobacco by 6.6%, Transport by 8.9%, Food and non-alcoholic beverages by 1.4%, Housing by 2.7%, Health by 1.8%, Recreation and culture by 1.1%, Education by 0.1%, Restaurants and hotels by 0.4%.

Consumer Price Index allows to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumer's needs. Consumer Price Index represents a measure of inflation in state.

CPI is calculated on the basis of the representative list of products that consists of 615 items in the year of 2018. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12 geographical locations (5 towns in Federation of BiH, 6 towns in Republika Srpska and in District Brčko BiH).

C. Manufacturing	104,6
D. Electricity, gas and hot water supply	102,5

Producer Price Index is a short-term statistical indicator that represents the measurement of change of prices of industrial products produced and sold by enterprises. This statistical indicator serves as the measure of inflation. It can also serve as the indicator of macroeconomical performances, escalator in long-term contracts, deflator for output values, intermediate consumption, and capital consumption in National Accounts, and an important tool in creating monetary and fiscal politics.

PPI in Bosnia and Herzegovina is calculated based on the representative list of products and it's producers making a sample of cca. 531 producers and 918 products. Each month 1854 prices are collected directly form producers through the unique questionnaire.

Since 1/1/2017 published indices are based on the average of 2015.

Production on own account (0) is the production accomplished by the observation unit (enterprise/local unit) on own account by utilizing the purchased or its own raw materials. The observation unit is the owner of a finished product and sells its own products in the market.

Production under contract (1) is contractual agreement between a principal and a contractor. It represents production that is done when a contracted business entity, from raw materials owned by the principal, produces or processes a product defined by the Nomenclature of Industrial Products BiH 2010.

Sale value and value of provision is total value of products produced in own (regular) production (0) or contracted (1), and which were sold (invoiced) in the reporting year.

TOTAL PRODUCTION (0+1) Value of sale and value of provision by regions and year

PRODUCTION UNDER CONTRACT (1) Value of provision by region and year

PRODUCTION ON OWN ACCOUNT (0) Value of sale, by region and year

Annual Growth Rates in Retail Trade, in current prices

Turnover of retail trade includes the value of all goods sold to individuals for personal use or use in household in the observed period. The turnover of consumables includes turnover generated by business subjects registered in the activities 47.11 and 47.2 (mainly food, beverages and tobacco products). The turnover of non-food products includes retail trade of various goods generated by business subjects registered in the activities 47.19, 47.4-47.9.

Value index of retail trade is expressed in **current prices** (unadjusted for price change). For users of statistical data it is very important to monitor the dynamics of the occurrence over time and for this purpose, we use the real index of retail trade. Volume index is expressed in **constant prices**, and is calculated by deflating retail trade turnover by adjusted consumer price index.

Annual growth rates in retail trade, in constant prices

Nominal value of retail trade turnover in 2018, structure in %

¹⁾ For 2009, BH Telecom has provided only data for mobile network prepaid subscribers.

Telecommunication services include the telecommunication traffic realized in fixed and mobile telephone networks.

The domestic traffic in fixed and mobile network includes the total traffic realized in the own fixed and mobile network, the traffic directed to other fixed and mobile networks.

The international traffic includes the total traffic realized in the fixed and mobile network that starts within and ends outside Bosnia and Herzegovina.

A fixed network is a telecommunications network in which all elements are connected by using wires.

Mobile network is a telecommunications network in which some elements are not connected by using wires. In that way, a connection is possible even when users are physically moving.

Yield of fruit and grapes is shown as granary yield of standard humidity after deducting all losses during the harvest and transportation.

Trees and vines of bearing age are those trees and vines capable of bearing fruit under standard conditions, regardless of whether or not they bore fruit during reporting year.

Yield per tree or per vine is computed for the bearing trees or vines.

Utilised agricultural area is total area taken up by arable land, permanent grassland (meadows and pastures), permanent crops and kitchen gardens, used by the holding regardless of the type of tenure or whether it is used as common land.

Harvested area is the part of the cropped area that is harvested. It can therefore be equal to or less than the cropped area.

Harvested production is total production, including on-holding losses and wastage, quantities consumed directly on the farm and marketed quantities, indicated in units of basic product weight.

Logs	2.005.065	2.001.522
Firewood	1.326.315	1.317.380
Stack(cord) wood	581.064	572.640
Technical roundwood	173.490	170.304

IMPORT AND EXPORT OF LOGS IN AND TO BiH, 2018

1000 m ³	Conifers	Broad leaved trees
Import	71,3	9,7
Export	44,5	10,2

Conifers: species from systematic class of naked-seed plants (*Gymnospermae*) mostly from Pinaceae tree family. Here belong commercial domestic or foreign tree species from genera *Pinus* (pine), *Picea* (spruce), *Abies* (fir), *Larix* (larch), *Pseudotsuga* (Douglas fir) etc.

Broad-leaved trees: Commercial domestic and foreign tree species from systematic class of covered-seed plants (*Angiospermae*) and genera *Quercus* (oak), *Fagus* (beech), noble broadleaf hardwood - genera *Fraxinus* (ash), *Acer* (maple), *Ulmus* (elm), *Prunus avium* (wild cherry tree) and other hardwood and softwood broadleaves - genera *Populus* (poplar), *Alnus* (alder), *Carpinus* (hornbeamtree), *Tilia* (lime) etc.

Logs: Forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Technical roundwood: Forestry wood products with favourable physical and mechanical properties whose natural shape, dimensions and properties are used for manufacture of wood products like: pit props, utility poles, construction scaffolding pillars, masts, wooden piles etc and small technical wood like hop or vineyards poles, rods, wooden stakes, wooden sticks, arms, wooden bands etc.

* Data refer to public forests

Stack(cord) wood: Wood of bad technical quality, round or split, which is used for chemical processing of pulp, wooden wool, tannin etc.

Industrial wood: includes all forest wooden assortments for mechanical and chemical processing including technical wood.
