BROJ/ NUMBER 1

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE *AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS*

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U IV KVARTALU 2019

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN
BOSNIA AND HERZEGOVINA IN 4th QUARTER 2019*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u četvrtom kvartalu 2019. godine veća je za 1,32% u odnosu na isti period 2018. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 0,36% dok je proizvodnja sortimenata lišćarskih vrsta veća za 2,83%.

Proizvodnja trupaca četinara veća je za 3,82% dok proizvodnja trupaca lišćara bilježi rast od 9,00%. Rast proizvodnje u odnosu na četvrti kvartal 2018. godine bilježi se kod sljedećih šumskih sortimenata: kod ostalog dugog drveta lišćara 49,01% i kod prostornog drveta lišćara 179,07%. Pad proizvodnje se bilježi kod jamskog drveta četinara od 1,08%, ostalog dugog drveta četinara od 20,93%, kod prostornog drveta četinara od 8,31% i kod ogrjevnog drveta lišćara od 4,43%. Kod proizvodnje ostalog grubo obrađenog drveta i ogrjevnog drveta četinara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 4th quarter of 2019 increased for 1,32% compared to the same period in 2018. Production of coniferous (softwood) assortments is for 0,36% lower while the production of broadleaf (hardwood) assortments increases for 2,83%.

Production of coniferous logs is 3,82% higher while production of broadleaf logs records increasing by 9,00%. Increase in production compared to 4th quarter of 2018 has been recorded in production of following forest assortments: in production of broadleaf other long wood by 49,01% and in production of broadleaf cordwood by 179,07%. The fall in production has been recorded in production of coniferous mining wood by 1,08%, coniferous other long wood by 20,93%, coniferous cordwood by 8,31% and in production of broadleaf fuelwood by 4,43%. Other roughly worked wood and coniferous fuelwood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

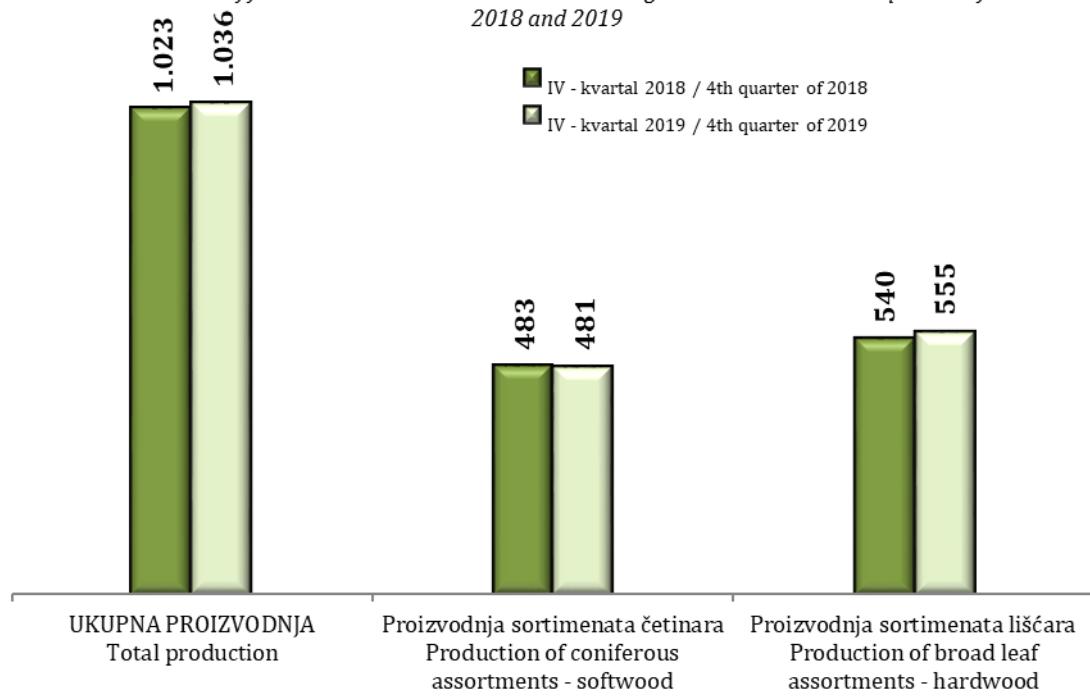

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U IV KVARTALU 2019

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 4th QUARTER OF 2019

	Proizvodnja (Production)			Prodaja (Sale)			
	IV kvartal 4 th quarter 2018	IV kvartal 4 th quarter 2019	Indeksi Indices X-XII 2019 X-XII 2018	IV kvartal 4 th quarter 2018	IV kvartal 4 th quarter 2019	Indeksi Indices X-XII 2019 X-XII 2018	
	m³			m³			
UKUPNO	1.022.720	1.036.267	101,32	1.037.143	1.048.576	101,10	TOTAL
ČETINARA	482.850	481.114	99,64	492.971	508.014	103,05	CONIFEROUS

Jamsko drvo lišćara	327	239	-	411	181	-	Mining wood, broadleaf
Ostalo dugo drvo lišćara	4.654	6.935	149,01	5.203	5.551	106,69	Other long wood, broadleaf
Prostorno drvo lišćara	9.137	25.499	279,07	9.333	25.154	269,52	Cordwood, broadleaf
Ogrjevno drvo četinara	353	415	-	503	501	-	Fuelwood, coniferous
Ogrjevno drvo lišćara	376.505	359.809	95,57	378.152	345.873	91,46	Fuelwood, broadleaf
Ostalo grubo obrađeno drvo	13	6	-	130	168	-	Other wood, roughly worked

Graf.1 Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - IV kvartal 2018. i 2019. god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 4th quarter of 2018 and 2019

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji
Percentage participation of different assortments in total production

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjeseca istraživanja.

Mjesečne izvještaje podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvnu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (Abies alba), smrča (Picea abies) te bijeli (Pinus sylvestris) i crni bor (Pinus nigra). Drvo četinara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (Abies alba), Spruce (Picea abies), Scots Pine (Pinus sylvestris) and European Black Pine (Pinus nigra). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Liščari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća liščara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih liščara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih liščara. Drvo liščara je složenije građe u odnosu na drvo četinara i u medjunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
