GODINA/ YEAR XV

SARAJEVO, 10.08.2020.

BROJ/ NUMBER 4

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE *AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS*

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U II KVARTALU 2020.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN
BOSNIA AND HERZEGOVINA IN 2nd QUARTER 2020*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u drugom kvartalu 2020. godine manja je za 1,90% u odnosu na isti period 2019. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 3,06% dok je proizvodnja sortimenata lišćarskih vrsta manja za 0,66%.

Proizvodnja trupaca četinara manja je za 8,54% dok proizvodnja trupaca lišćara bilježi pad od 8,38%. Pad proizvodnje se bilježi kod jamskog drveta četinara od 8,33% i kod prostornog drveta lišćara od 22,95%. Rast proizvodnje od 26,29%, u odnosu na drugi kvartal 2019. godine bilježi se kod ostalog dugog drveta četinara, kod prostornog drveta četinara od 13,39% i kod ogrjevnog drveta lišćara od 3,52%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrijevnog drveta četinara i jamskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 2nd quarter of 2020 decreased for 1,90%, compared to the same period in 2019. Production of coniferous (softwood) assortments is, for 3,06% lower while the production of broadleaf (hardwood) assortments decreases for 0,66%.

Production of coniferous logs is 8,54% lower while production of broadleaf logs records decreasing of 8,38%. Decreased production has been recorded to coniferous mining wood by 8,33% and to broadleaf cordwood by 22,95%. Production increase of 26,29% compared to 2nd quarter of 2019 has been recorded in production of coniferous other long wood, in production of coniferous cordwood by 13,39% and in production of broadleaf fuelwood by 3,52%. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

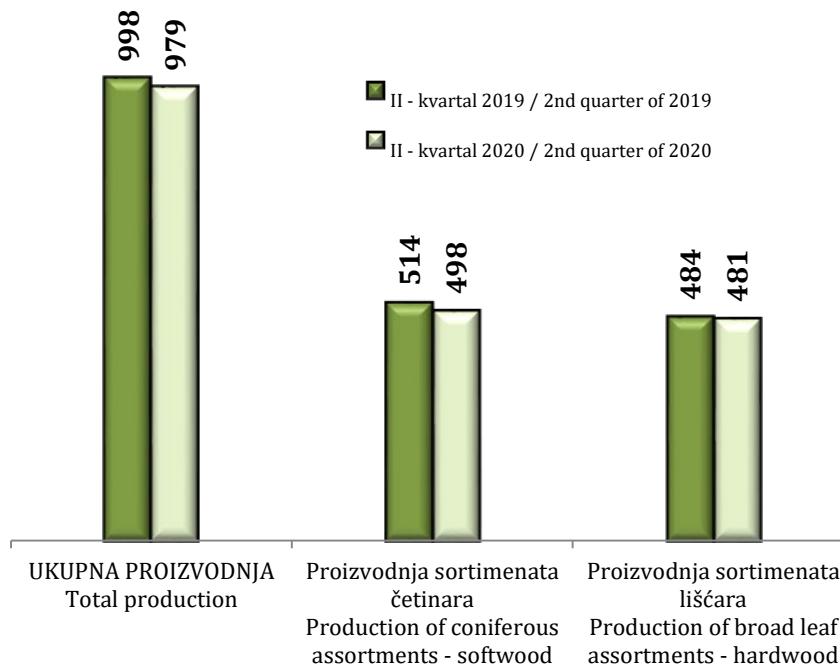

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U II KVARTALU 2020.

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 2nd QUARTER OF 2020

	Proizvodnja (Production)			Prodaja (Sale)			
	II kvartal 2 nd quarter 2019	II kvartal 2 nd quarter 2020	Indeksi Indices IV-VI 2020 IV-VI 2019	II kvartal 2 nd quarter 2019	II kvartal 2 nd quarter 2020	Indeksi Indices IV-VI 2020 IV-VI 2019	
	m³			m³			
UKUPNO	997.843	978.933	98,10	969.950	969.712	99,98	TOTAL

u 1000 m³ - II kvartal 2019. i 2020. godine**

*Production of forest assortments in Bosnia and Herzegovina in 1000
m³ - 2nd quarter of 2019 and 2020*

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u II kvartalu 2020. godine

Percentage participation of different assortments in total production of forest assortments in 2nd quarter of 2020

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopštenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjeseca mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju netodrvnu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (Abies alba), smrča (Picea abies) te bijeli (Pinus sylvestris) i crni bor (Pinus nigra). Drvo četinara ima jednostavniji građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (Fagus sylvatica), hrast kitnjak (Quercus petraea) te vrste plemenitih lišćara iz rođova Fraxinus (jasen), Acer (javor), Ulmus (brijest) i Prunus avium (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (Abies alba), Spruce (Picea abies), Scots Pine (Pinus sylvestris) and European Black Pine (Pinus nigra). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (Fagus sylvatica), Sessile Oak (Quercus petraea), so cold noble broad leaf trees like species from genera Fraxinus (Ash), Acer (Maple), Ulmus (Elm), Prunus avium (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Jamsko drvo obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ruke, obruči, pletarski štapovi, pruće i sl.

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
