INTRODUCTION

Pursuant to Article 14, paragraph (2) of the Law on Statistics of BiH (Official Gazette of BiH, No. 26/04 and 42/04), the Agency for Statistics of Bosnia and Herzegovina (Agency), in consultation and cooperation with the Federal Institute for Statistics of FBiH (FZS) and the Institute of Statistics of Republika Srpska (RZS RS), shall prepare a draft of the Agency's Work Plan (Work Plan).

The starting point for the drafting of the Work Plan is the general goals and directions of implementation specified in the Statistical Program of Bosnia and Herzegovina for the period 2025-2028 and the Strategic Directions for the Development of Statistics of Bosnia and Herzegovina 2030.

The work plan establishes priority tasks as well as statistical activities of interest to Bosnia and Herzegovina, which will ensure that, in the specified period, further harmonization of statistical surveys and indicators with the standards of the European Statistical System and the needs of users is conducted.

The work plan is based on the needs of users of official statistics, but also on the requirements of the European Union as stated in the Statistical Requirements Compendium. For candidate and potential candidate countries, the Statistical Requirements Compendium is used to assess compliance with the acquis in the field of statistics.

All surveys are classified into the appropriate statistical subject area, as follows:

1. Demographic and social statistics
2. Economic statistics
3. Sectoral statistics
4. Environmental statistics
5. Cross-domain statistics
6. Statistical infrastructure and methodology

The following data are provided about the statistical survey:

- description of activities,
- the result of the activity,
- form of data submission,
- periodicity of implementation,
- deadlines for submitting data, and
- deadlines for dissemination of interim and final results

The work plan for 2026 plans to implement a total of statistical surveys/activities.

Director

Vesna Čužić

I. PRIORITY ACTIVITIES

| | |
|---|--|
| 1. DEVELOPMENT OF STATISTICAL INFRASTRUCTURE | |
| INCREASING THE USE OF ADMINISTRATIVE DATA SOURCES FOR THE PRODUCTION OF OFFICIAL STATISTICS | <p>Taking a more active role of statistical institutions in finding appropriate administrative sources to reduce the burden on data providers and generally rationalize costs and improve the quality of statistical indicators.</p> <p>Before using administrative data sources, it should be examined whether the concepts and definitions used in administrative sources correspond to the required statistical purpose and sufficiently satisfy the required concepts and definitions.</p> |
| HARMONIZATION OF OFFICIAL STATISTICS WITH QUALITY MANAGEMENT STANDARDS | <p>Statistics meet European quality standards (European Statistics Code of Practice) and serve the needs of institutions, governments, research institutions, businesses and the general public. The production and dissemination of high-quality, comparable and timely official statistics ensures the availability of impartial statistical data.</p> <p>Harmonization with the requirements of the European Union Statistical System (ESS) will be continuously implemented in terms of the number of statistical indicators, publication deadlines and applied methodology.</p> |
| HARMONIZATION OF OFFICIAL STATISTICS WITH STANDARDS ON PROTECTION OF CONFIDENTIAL STATISTICAL DATA | <p>The Rulebook on the Protection of Statistical Data in the Agency prescribes procedures and measures for implementing the protection of statistical data, information, IT equipment, software, as well as the premises in which equipment and installations are located, as well as the method of making backup copies and archiving data and products.</p> <p>Also, the "Guidelines for the Protection of Confidential Data in the Agency for Statistics of BiH" have been prepared, which provide detailed instructions on: how to protect confidential data, i.e. what steps the Agency should take to mitigate the risk that a certain reporting unit can be (directly or indirectly) identified in a data set; how to assess potential identification risks and manage the identification risk, using an appropriate method for the protection of confidential data; on methods of data protection in tables, data modification with specific examples; methods of data protection in microdata records with specific examples; active and passive data protection and rules on access to confidential data by external and internal users.</p> |
| 2. PRIORITIES BY STATISTICAL AREAS | |
| DEMOGRAPHIC AND SOCIAL STATISTICS | <p>Labor Market Statistics - Labor Cost Survey - The objective of the Labor Cost Survey is to provide data on wages and other labour costs paid by employers for employees, viewed from the perspective of employer costs, rather than from the perspective of employee income. The data provide employers and economic policy makers with insight into the state and structure of labour costs in BiH.</p> <p>Education Statistics - Formal Adult Education in Primary and Secondary Schools – Pilot. Collection and aggregation of data on the number of participants in formal adult education for primary and secondary school levels.</p> |

**ECONOMIC
STATISTICS**

National Accounts Statistics – Further increase in the level of consistency and comparability of BiH National Accounts statistics in accordance with the requirements and needs of the Council of Ministers, governments, economic analysts, financial markets and EUROSTAT, in accordance with the multi-annual plan for the development of national accounts. Methodological improvements in accordance with the requirements of new international methodologies (SNA2008/ESA2010). Continued transmission of data to EUROSTAT, in accordance with "Regulation (EU) No. 549/2013 of the European Parliament and of the Council of 21. 05. 2013 on the European system of national and regional accounts in the European Union".

Price statistics - Establishment and development of a harmonised index of consumer prices (HICP) for Bosnia and Herzegovina, which represents a standardised and internationally comparable inflation indicator necessary for harmonising statistical data with the requirements of the European Union. The development of the HICP will be carried out in accordance with the legal and methodological framework of the European Union: Regulation (EU) 2016/792 on HICP and house price indices, which defines the basic principles and rules for calculating the HICP, Commission Implementing Regulation (EU) 2020/1148, which lays down in detail the technical and methodological standards for the collection, processing and reporting of data, and Regulation (EU) 2019/2152 on European business statistics, which provides a broader legal framework for the collection and harmonisation of statistical data in accordance with Eurostat standards. The aim is to ensure compliance with Eurostat statistical standards, increase the transparency and reliability of statistical indicators and enable full international comparability of inflation data at the BiH level.

Structural Business Statistics (SBS) - production and publication of data on structural business statistics in the areas of industry, construction, trade and services; production of data for business services; production and publication of data on foreign affiliates in BiH - Inward FATS; data transmission to Eurostat.

Statistical Business Register (SBR) - Continuation of activities on the introduction of Enterprise Groups as a mandatory statistical unit in the SBR through the ongoing IPA Twinning 2019 project of support to EU statistical institutions in BiH, as well as the implementation of the new EBS "Regulation (EU) 2019/2152 of the European Parliament and of the Council of 27 November 2019 on European business statistics and repealing ten legal acts in the field of business statistics").

Short-term business statistics (SBS) - Development of new statistical indicators in the field of Short-term business statistics in accordance with the requirements of the new EBS Regulation for business statistics. In the field of statistics of industry, construction, trade and other services, in addition to the production and publication of regular monthly and quarterly statistical indicators, it is planned to continue work on the introduction of administrative data sources to produce short-term turnover indicators for BiH. Also, for the areas of wholesale and retail trade (G45, G46), activities will be carried out to develop deflators with the aim of producing a real turnover index. In the field of construction statistics, the development of a new indicator of the supply of commercial real estate (Commercial Real Estate Indicator - CREI) is planned, in accordance with the requirements of the new EBS

Regulation 2019/2152. Based on the results of the pilot survey conducted in 2025, work will continue in 2026 on planning the establishment of a regular survey, after all necessary prerequisites are met. The above activity is supported through the new IPA 2019 Twinning project.

Science, technology, information society - The Smart Specialization Strategy (S3) is part of the reformed cohesion policy of the European Commission, conceived as a territorially based approach grounded on the identification of strategic areas for intervention, established on the analysis of the strengths and potential of the economy of a given region, in order to highlight priorities for knowledge-based and innovation-based financing, and with the aim of strengthening cooperation between science, economy and public administration. Bosnia and Herzegovina has officially joined the process of developing the Smart Specialization Strategy for BiH. The Council of Ministers of BiH adopted a Decision on the appointment of members of the working group for the development of the Smart Specialization Strategy (S3) in BiH, and a representative of the Agency was also appointed. The role of the Agency is to provide support in monitoring achievements within the framework of indicators and provide data for the proposed framework for monitoring and evaluating S3. The aim of the Digital Agenda for the Western Balkans is to contribute to the transition of the region to a digital economy and to bring added value in the process of digital transformation, such as economic growth, job creation and better digital services. In 2026, it is planned to continue regular annual surveys on the use of information and communication technologies in enterprises (ICT-P), in households and individually (ICT-D), and Research and Development (R&D) as well as budgetary investments in research and development (GBARD).

II. INTERNATIONAL PROJECTS

| BHAS, FIS, RSIS, CBBH | EU | 2,000,000 EUR | IPA 2022 EU for increasing administrative capacity - BA2022AAP – Procurement of equipment; procurement of IT equipment for data exchange for statistical purposes | AD approved; finalization of technical specifications (as part of the EU Project) for increased use of administrative data sources in the production of official statistics in BiH is expected. |

| | | | | |
|------------------------------|----|------------------|---|---|
| BHAS, FIS, RSIS, CBBH | EU | 1,000,000 EUR | Twinning; IPA 2022 EU further strengthens statistical system | The finalization of the ToR (Terms of Reference) for the IPA 2022 Twinning project, whose Action Document has already been approved, is underway. The prepared draft project will be sent to the European Commission. They will carry out further necessary procedures. It is expected that the project implementation will begin in 2026. |
| Regional projects | | | | |
| BHAS, FIS, RSIS, CBBH | EU | 6.980.750 EUR | IPA 2022 regional (multi-beneficiary assistance program) Includes the following areas: national accounts; business statistics; component for the CBBH; social statistics; communication, quality management, etc. | 01.01.2024– 31.12.2027. (48 months) Project implementation in progress |
| BHAS, FIS, RSIS, CBBH | EU | --- | IPA 2026 regional <i>(multi-beneficiary assistance programme)</i> <i>Consultations are underway between Eurostat and the regional beneficiary countries regarding the areas will be included in this project</i> | The duration of the project, as well as the statistical areas to be covered, have not yet been defined. At the request of Eurostat, the Agency has submitted a proposal for priority areas. However, given that all enlargement countries from the region are included in the IPA MBP, it is expected that Eurostat will adapt the final selection of priority statistical areas to the requirements of most beneficiaries included in the IPA MBP in 2026. |

Note: The so-called national and regional projects are listed in the table. The national ones were initiated and prepared by BiH statistical institutions based on their needs. In addition, statistical institutions also participate in national projects whose primary beneficiaries are other BiH institutions. Regional projects involve several countries, and Bosnia and Herzegovina is one among other beneficiaries, and regional project are usually prepared by donors.

| EU legal basis and international standards | <p>Regulation (EC) no. 763/2008 of the European Parliament and the Council of July 9, 2008 on the population and housing census.</p> <p>Commission Regulation (EU) 2017/712 of April 20, 2017 on establishing the reference year and adopting the program of statistical data and metadata for the population and housing census provided for by Regulation (EC) no. 763/2008 of the European Parliament and the Council.</p> <p>Commission Implementing Regulation (EU) 2017/543 of March 22, 2017 on establishing rules for the application of Regulation (EC) no. 763/2008 of the European Parliament and the Council on the population and housing census with regard to the technical specifications of the characteristics and their breakdowns.</p> <p>Commission Implementing Regulation (EU) 2017/881 of May 23, 2017 on the implementation of Regulation (EC) no. 763/2008 of the European Parliament and the Council on the population and housing census regarding the method and structure of the quality report and the technical format for sending data and on the amendment of Regulation (EU) no. 1151/2010.</p> <p>Commission Implementing Regulation (EU) 2018/1799 of 21 November 2018 establishing a temporary direct statistical measure for the dissemination of selected features of the 2021 population and housing census geocoded on a 1 km² cell grid.</p> |
| Description of the activity | <p>Analysis of questions from the previous population census and international Recommendations for population and housing censuses for the 2030 cycle.</p> <p>There are numerous limitations and risks related to the development of a concrete roadmap. Without the necessary elements and decisions, the selection of the census method itself can pose a high risk, with potentially long-term negative consequences for the statistical system in BiH. In this regard, statistical institutions have planned certain project activities with the aim of considering possible solutions.</p> |
| Activity result | Initiated project activities. |

| | |
|--------------------------------|---|
| Form of data submission | - |
|--------------------------------|---|

Note:

The decision on the census method for BiH is very complex with risks for a number of reasons, given the trend of switching to the use of registers, choosing the traditional method for the next cycle would significantly distance BiH from this trend for a long period, and the prerequisites for switching to a register-based census require a long period of time, many dilemmas for which an appropriate answer needs to be found and the participation of a number of institutions, which the subcommittee's recommendation does not take into account. In this regard and with the aim of collecting elements that would enable the development of a roadmap in the future, all 3 statistical institutions applied through the Twinning project for an activity through which the possibility of using administrative sources and registers for the next census would be examined.

| Legal basis of the EU and international standards | <p>Regulation (EU) 2019/2152 of the European Parliament and of the Council of 27 November 2019 on European business statistics and repealing ten legal acts in the field of business statistics.</p> <p>Commission Implementing Regulation (EU) 2020/1197 of 30 July 2020 laying down technical specifications and modalities pursuant to Regulation (EU) 2019/2152 of the European Parliament and of the Council on European business statistics and repealing ten legal acts in the field of business statistics.</p> | |
|--|---|--|

| | | |
|--|--|---|
| <p>Description of activities</p> | <p>Defining the scope of the survey based on the selected frame of statistical units from the Statistical Business Register, using harmonised criteria agreed among all three statistical institutions in BiH; including the selected units by type of activity (KAU) in the regular survey; and selecting a representative sample of statistical units for conducting the survey in 2026..</p> <p>Regular implementation of the monthly retail trade survey with the aim of collecting monthly data on turnover excluding VAT and VAT from business entities – legal units whose main activity is registered under Division 47 of KD BiH 2010 – Retail trade, except of motor vehicles and motorcycles, as well as a smaller number of business entities whose main activity is registered in other divisions but which also perform retail trade activities. Regular monthly preparation and publication of nominal and real retail trade turnover indices, as well as the calculation of seasonally and calendar-adjusted indices using the JDemetra+ software. Regular preparation of metadata reports for the monthly retail trade survey.</p> <p>During 2026, activities will continue on the calculation of RTI indices using turnover data from administrative sources (VAT database), and on preparing the final version of the methodology for the use of administrative data in the production of the Retail Trade Turnover Index for BiH. In 2026, activities will start on the implementation of the new activity classification (NACE Rev. 2.1) in the field of retail trade. Work will also continue on further improving the STS IT application.</p> | |
| <p>Activity results</p> | <p>A sampling frame and a sample of statistical units for the monthly retail trade survey (M KPS TRG 01) were defined and selected based on data from the Statistical Business Register for 2025. Regular monthly collection of data on turnover excluding VAT and turnover including VAT was carried out; data analysis and processing were completed; nominal and real retail trade turnover indices (raw indices) were calculated, as well as SA and WDA indices using the JDemetra+ software.</p> <p>A comparative calculation of RTI indices was performed using turnover data from administrative sources (VAT database) and data collected through the statistical survey. Regular compilation and publication of retail trade turnover indices were ensured on a monthly basis at the BiH level. Regular monthly transmission of data to Eurostat was carried out in accordance with the required content, formats, and submission deadlines. A metadata report for the Retail Trade Turnover Index for BiH was prepared. Further improvements to the STS IT application were implemented.</p> | |
| <p>Data submission format</p> | <p>The data will be delivered in the previously agreed format. The level of detail includes aggregated data at the stratum/activity-class level and totals according to KD BiH 2010, in line with the previously defined table structure, and, where necessary, microdata (de-individualised) for each statistical unit.</p> | |

6. STATISTICAL INFRASTRUCTURE AND METHODOLOGY

6.1 METADATA AND CLASSIFICATIONS

6.1.1 Statistical standards for data and metadata (including Classifications)

| | |
|---|---|
| <p>Description of activities</p> | <p>Implementation of tasks from the document Strategy for the Development of the Metadata System, with particular focus on points 7.1 – Work Organization and 7.2 – Organization of Working Groups for the Implementation of the Strategy, as specified and described in the document Strategy for the Development of the Metadata System in the Statistical System of BiH. Through the metadata working group, plan the process of revising the document Strategy for the Development of the Metadata System in the Statistical System of BiH, focusing on adding an annex to the document to specify activities to be carried out in the next period, considering the current state of metadata and activities implemented so far.</p> <p>Continue activities to improve the system for collecting reference metadata and submitting it to Eurostat, developing system functionalities for collecting reference metadata that enable the generation of a national quality report from the collected data through the SIMS v 2.0 structure for a specific statistical domain. Activities will be extended to the collection of structural metadata for selected statistical domains as well as the harmonization of code lists for selected statistical domains.</p> <p>Continuation of cooperation with the CBBiH in the area of collecting reference metadata. Training of relevant statisticians for the preparation and submission of data to Eurostat in SDMX format.</p> <p>Regulation (EC) No. 1893/2006 of the European Parliament and of the Council of 20 December 2006 establishing the statistical classification of economic activities NACE Revision 2, amending Council Regulation (EEC) No. 3037/90, as well as certain EC regulations on specific statistical domains.</p> <p>Commission Regulation (EU) 2023/137 of 10 October 2022 amending Regulation (EC) No. 1893/2006 of the European Parliament and of the Council on the establishment of the statistical classification of economic activities NACE Revision 2.</p> <p>Monitoring the process of revising the international classification of activities NACE Rev.2 to the new NACE Rev. 2.1 for the purpose of preparing and harmonizing the BiH Classification of Activities 2010 with international standards.</p> <p>Full implementation of the Classification of Occupations in selected statistical surveys.</p> |
| <p>Activity results</p> | <p>Initial objectives and tasks outlined in the Strategy for Metadata Development have been implemented. Obligations for submitting reference metadata to Eurostat and publishing the collected metadata files on the official website have been fulfilled. The process and work phases have been defined for harmonizing the BiH Classification of Activities 2010 with the new international classification of activities NACE Rev.2.1.</p> |

6.1.2 Methodological support for conducting surveys

6.1.2.01 Updating sample frames for household surveys

| | |
|----------------------------------|--|
| Description of activities | <p>From October 2019 to October 2020, three statistical institutions actively participated in the implementation of the project “Support to the Statistical System of BiH in Preparation of Statistical Master Sample Frame,” financed by the EU, which focused on the preparation of a new master sample frame. During the implementation of this project, four waves of the new sample frame were carried out. Since October 2020, the three statistical institutions have continued updating the statistical sample frame in accordance with the previously defined three-year scheme. The sample frame is used for all household and/or individual surveys (continuous LFS, EU-SILC, HBS, ICT, AES, and will also be used for other surveys in the upcoming period).</p> |
| Activity results | <p>Continuation of activities on updating the sample frame.</p> |

6.2 STATISTICAL CONFIDENTIALITY AND DATA PROTECTION

6.2.1 Coordination of statistical confidentiality and access to microdata

| | |
|----------------------------------|--|
| Description of activities | <p>Statistical confidentiality is guaranteed by law and by secondary legislation adopted by the Director of the Agency.</p> <p>In the Law on Statistics of BiH, the principles and rules for the protection of statistical confidentiality are established in Chapter IX - Articles 23 to 29.</p> <p>Article 27 of the Law: “During the collection, processing, delivery, and dissemination of statistical data in BiH, the competent authorities, including authorities at the entity level, shall take all organizational, regulatory, administrative, and technical measures necessary to protect the confidentiality of data from unauthorized access, disclosure, and use.”</p> <p>Penalties are prescribed for any intentional violation of statistical confidentiality. The rules set out in the Law on Statistics of BiH are quite clear. According to Article 30, paragraph 1: “Any person who has access to confidential data in the performance of their duties and unlawfully and knowingly discloses any confidential data shall be guilty of a criminal offense punishable by a fine of up to 5,000 convertible marks or imprisonment for up to 2 years, or both.”</p> <p>The policy on the protection of statistical data and confidentiality is publicly known. In 2016, the Agency adopted the “Rulebook on the Protection of Statistical Data in the Agency.” The Rulebook prescribes procedures and measures for protecting statistical data, information, IT equipment, software support, as well as the premises housing equipment/installations in the Agency, and the methods for creating backup copies and archiving data and official statistics products.</p> <p>According to the Rulebook on the Protection of Statistical Data in the Agency, Article 14, all members of the Agency’s statistical staff are required to sign a confidentiality oath. This includes a statement that the staff member has received a printed copy of all relevant legal texts and is aware of the legal consequences of violating confidentiality rules. The text of the oath also includes the obligation to keep all information confidential even after the staff member ceases to be employed by the Agency.</p> |
|----------------------------------|--|

| | |
|--------------------------------|--|
| | <p>In addition, a Commission for the Protection of Statistical Data Confidentiality has been appointed as an advisory body to the Director of the Agency, with tasks including: ensuring consistent application of the Rulebook and other regulations related to data protection; and controlling requests for access to confidential data.</p> <p>The protection of statistical data follows three main objectives: a) Data confidentiality (protection against unauthorized access and processing); b) Data integrity (protection against unauthorized changes); and c) Data availability (protection against destruction). The protection of statistical data encompasses technical and organizational measures as well as procedures used for: determining the authorization and responsibilities of Agency staff regarding data protection; safeguarding the collection, processing, and transfer of data; protection of facilities, equipment, and documents; preventing unauthorized persons from accessing data processing or storage equipment; preventing intentional unauthorized destruction or loss of data, their alteration, and recording access, use, processing, and dissemination of data.</p> <p>Furthermore, the document “Guidelines for the Protection of Confidential Data in the Agency for Statistics of BiH” (adopted on 22 December 2021) provides instructions on: how to protect confidential data, i.e., the steps the Agency should take to mitigate the risk that a reporting unit can be (directly or indirectly) identified in a dataset; assessment of potential identification risks and management of identification risk using appropriate methods for protecting confidential data; types of data to be protected (tables – macrodata, microdata) and how sensitive data in tables and microdata are identified with concrete examples; methods for protecting data in tables; reshaping/redesigning tables; cell suppression - primary and secondary data suppression; data modification/perturbation, all illustrated with concrete examples; methods for protecting data in microdata records with a concrete example; active and passive data protection; rules for external and internal user access to confidential data</p> <p>Of course, when taking steps to protect confidential data, the goal is to safeguard the identity of the reporting unit while simultaneously retaining the maximum usefulness of the data. In simple cases, data can be protected manually, so the examples provided in these Guidelines are intended to illustrate these procedures, which are in fact key to the overall understanding of the data protection methods.</p> <p>However, in more complex cases, the use of specialized software for protection is necessary. This requires specialized skills and knowledge of the data to correctly protect confidential datasets, which cannot be fully described or exemplified in detail within these Guidelines.</p> |
| <p>Activity results</p> | <p>Full implementation of the provisions of the Rulebook on the Protection of Statistical Data in the Agency for Statistics of BiH, as well as compliance with the instructions from the Guidelines. Enabling coordination of activities in the field of statistical confidentiality and improving access to microdata.</p> <p>Publication of data in a form in which the statistical unit is adequately protected and providing access to statistically protected data to scientific research institutions and researchers.</p> <p>Various software packages are available to assist in assessing potential identification risks in microdata records, such as μ-ARGUS - a software package developed by Statistics Netherlands, and SUDA – software developed by the University of Manchester (UK). It is expected that in the upcoming period, the Agency will also have the opportunity to use these software tools.</p> |

6.3 Quality management – Reports on the quality of conducted statistical surveys

| | |
|----------------------------------|--|
| Description of activities | <p>Preparation of quality reports for statistical surveys based on the Methodological Guidelines for the Preparation of Quality Reports for Statistical Surveys.</p> <p>Continue activities to improve the system for collecting reference metadata and submitting it to Eurostat, developing system functionalities for collecting reference metadata that enable the generation of a national quality report from the collected data through the SIMS v 2.0 structure for a specific statistical domain.</p> |
| Activity results | <p>Quality reports for individual statistical surveys have been prepared and published. The quality report is an important source of information for data producers, providing an analytical overview of the entire statistical process, while also offering users of statistical results additional information for the correct use and interpretation of the results.</p> |

6.4 IT support, standards, and tools for statistical production

| | |
|----------------------------------|---|
| Description of activities | <p>Applications for statistical production: Development of applications for data entry and processing for the purposes of new statistical surveys; continuous maintenance and improvement of existing applications in accordance with requirements.</p> <p>Continuation of the implementation of the continuous Labour Force Survey (LFS), the Survey on Income and Living Conditions (SILC), and the third wave of the Private and Business Travel Survey (APPP).</p> <p>Preparations for conducting the Agricultural Census, which include creating a unified database as well as developing an application for data entry for the Agricultural Census.</p> <p>Continuation of work on the development of the metadata system in accordance with the adopted strategy and Eurostat recommendations; collection of metadata on statistical surveys conducted by the Agency for Statistics of BiH; collection and publication of reference metadata.</p> <p>IT strategy: continuation of work on the implementation of the existing IT strategy; adaptation of the IT strategy to new processes and trends in the IT industry and statistical institutions. Standards: continuation of work on the introduction and implementation of ICT standards.</p> <p>Applications and databases used for statistical production, as well as databases functioning as registers: development of applications for data entry, processing, and report generation for new statistical surveys; continuous maintenance and improvement of existing applications in accordance with submitted requirements; continuous administration of databases used for statistical production, as well as databases functioning as registers; preparation of complex analyses for statistical surveys in accordance with submitted requirements; provision of IT support for planned activities conducted under IPA 2022.</p> <p>Provision of IT support for conducting survey research: continuation of the continuous Labour Force Survey (LFS), the Survey on Income and</p> |
|----------------------------------|---|

| | |
|-------------------------|---|
| | <p>Living Conditions (SILC) - fourth wave, the Private and Business Travel Survey (APPP), and the Household Budget Survey (HBS) - according to the regular survey schedule.</p> <p>Preparations for conducting the Agricultural Census, including the creation of a unified database and the development of an application for data entry for the Agricultural Census.</p> <p>Continuation of work on the development of the metadata system in accordance with the adopted strategy and Eurostat recommendations; collection of metadata on statistical surveys conducted by the Agency for Statistics of BiH; collection and publication of reference metadata; regular submission of metadata to Eurostat using Eurostat's Metadata Handler web application.</p> <p>IT strategy: continuation of work on the implementation of the existing IT strategy; adapting the IT strategy to new processes and trends in the IT industry and statistical institutions.</p> <p>Standards: continuation of work on the introduction and implementation of ICT standards.</p> |
| Activity results | High-quality IT support for statistical surveys in accordance with statistical standards. |

Note: Activities related to the development of applications for statistical production are carried out continuously throughout the year according to needs. They relate to the development of applications for new statistical surveys, as well as the improvement of existing ones, i.e., their adaptation to ongoing changes. Continuous training of the staff involved in these activities is essential for their improvement.

6.4.1 IT Infrastructure Management

| | |
|----------------------------------|---|
| Description of activities | <p>Activities for the maintenance and improvement of IT infrastructure:</p> <p>Regular activities - maintenance of computer and server equipment; active and passive network equipment; VoIP telephony systems.</p> <p>Process standardization - documentation: network and communication diagrams; procedures for access to and use of the Agency's IT infrastructure; updating backup policy; updating password policy; updating IT strategy; creation of a register of the Agency's IT equipment; introduction of level II and III regular maintenance of IT infrastructure by expert companies and equipment manufacturers when necessary (i.e., SLA contract, 24/7 maintenance, and guarantee of IT system functionality).</p> <p>Extraordinary activities - support for the census: preparation for replacement of obsolete network and computer equipment; implementation of Microsoft 365 technologies; preparation for the introduction of security software for business protection, asset management, and risk management.</p> |
| Activity results | More stable, secure, and functional ICT infrastructure, with documented procedures for access rights and IT infrastructure management. |

6.5 Dissemination

6.5.1 Public relations – User engagement

| | |
|---|---|
| <p>Description of activities</p> | <p>Increase trust in the Agency's statistical data by ensuring timely and reliable availability of information, organizing Open Days, and conducting professional workshops and seminars aimed at specific user groups.</p> <p>Enable faster and easier access to data through the website and multiple communication channels. Regularly publish engaging and useful statistical content on social media, including data visualization and infographics, to promote official statistics.</p> <p>Simplify and formalize communication with the media through clearly defined procedures – specifying who, when, and how statements can be given, along with the types of information that can be publicly released. Establish an expedited procedure for the preparation and approval of media statements.</p> <p>Continue regular monitoring of media publications by preparing thematically focused daily, weekly, and monthly press clipping reports.</p> <p>Establish systematic monitoring of user requests by maintaining a record that includes: user information, type and method of request submission, date of receipt, description of requested data (type and reference period), responsible staff, and the date and method of response. Enable submission of requests via an online form on the website.</p> |
| <p>Activity results</p> | <ul style="list-style-type: none"> • Structured public communication • Improved dissemination and higher-quality user relations • Increased user satisfaction and trust in official statistics • Higher website traffic • Regular monitoring of media publications and comprehensive records of user requests |

6.5.2 Publishing

| | |
|---|--|
| <p>Description of activities</p> | <p>On an annual basis, the Agency publishes over 400 press releases, around twenty publications, and regularly updates approximately 100 statistical time series of varying frequencies (monthly, quarterly, semi-annual, annual, and multi-year).</p> <p>Dissemination activities include proofreading and translating content into four languages and two scripts (Bosnian, Croatian, Serbian – Cyrillic, and English), publication on the website, as well as layout and communication with printing houses for printed publications.</p> <p>Within the annual Work Plan, the Agency publishes a publishing calendar. Dissemination also includes monitoring the timely submission of materials by responsible persons, preparing content, and ensuring its timely publication.</p> |
| <p>Activity results</p> | <ul style="list-style-type: none"> • Availability of statistical data in standard formats (press releases, publications, time series, databases, infographics, thematic geographic maps, etc.) • Meeting the needs of different user groups |

6.5.3 e-GDDS i PPLT

| | |
|---|--|
| <p>Description of activities</p> | <p>In cooperation with the CBBiH and under the auspices of the International Monetary Fund (IMF), the Agency established the national NSDP statistical portal (National Summary Data Page) within the e-GDDS (Enhanced General Data Dissemination System) project. Since then, the Agency has been updating statistical data on a monthly, quarterly, and annual basis in the areas of National Accounts (GDP), Consumer Price Index (CPI), Merchandise Trade, Production Index, Labor Market, Producer Price Index (PPI), and Demography – Population.</p> <p>The SDDS is an international standard developed by the International Monetary Fund (IMF) to help countries improve the transparency of their economic and financial data. Its aim is to promote the publication of accurate and up-to-date economic information that is essential for investors, analysts, and other data users.</p> <p>The SDDS includes a set of guidelines and standards for disseminating data related to various aspects of economic and financial statistics, including national accounts, inflation, fiscal data, foreign trade, and other relevant information. Countries that adopt the SDDS commit to regularly publishing these data in accordance with the prescribed standards and guidelines.</p> <p>The IMF publishes data on prices, production, tourism, labour, and trade (PPLT) in the monthly International Financial Statistics (IFS). Since September 2019, the Agency has been regularly coordinating activities and submitting monthly data for PPLT statistics to the IMF Statistics Department.</p> |
| <p>Activity results</p> | <p>Improved transparency, timely availability of up-to-date economic and financial data that are essential for investors, analysts, and other users of statistical data. Availability of data in machine-readable SDMX (Statistical Data and Metadata eXchange) format for the specified datasets, enabling automatic use by third-party applications.</p> |

6.5.4 Social media

| | |
|---|--|
| <p>Description of activities</p> | <p>The Agency actively uses Facebook and Twitter in accordance with the Online Communication Strategy, with 2–3 planned posts per week on each channel. Posts include information on publications, press releases, and events, as well as specific visual content (infographics, charts).</p> <p>The Agency also shares interesting content from other statistical institutions' pages and monitors the effectiveness of its activities through defined indicators, adjusting the strategy based on the results.</p> |

1.5.5 Dissemination databases

| | |
|---|--|
| <p>Description of activities</p> | <p>The Agency has successfully established an SDMX-based dissemination environment and architecture, intended to serve in the future as a central platform for dissemination (central dissemination hub). In 2025, the Agency plans to begin populating this central dissemination database with data from individual statistical domains, with the primary focus on time series.</p> <p>This will result in the establishment of a more advanced and modern online dissemination database, providing end users with easy and intuitive access to data, as well as the ability to independently generate tables (with predefined variables) and charts for specific statistical areas. To ensure the proper display of statistical data in the online database, communication and collaboration will be established with all Agency staff producing statistical data, aiming to harmonize time series and correctly present data, as in practice there are cases where changes in methodology or other parameters result in series breaks.</p> |
| <p>Activity results</p> | <p>Availability of data for users through an online dissemination database with functionalities to generate desired tables and export them in standard electronic formats suitable for further processing and analysis. Through access to online dissemination databases, users can access data that cannot be disseminated through traditional publishing methods.</p> |

1.5.6 OGP

| | |
|---|---|
| <p>Description of activities</p> | <p>In the previous period, the Agency implemented the commitment entitled "Increasing the Availability, Openness, and Use of Official Statistical Data," which states: Through these activities, we plan to increase the availability, openness, and use of official statistical data in such a way that all data published by the Agency will be free of charge, in machine-readable format under an open data license, and continuously available on www.bhas.gov.ba in accordance with the 5-star implementation scheme. Alongside these activities, and through effective promotion including events and the creation of educational materials, we aim to encourage greater data use and the development of innovative solutions. This commitment is available on the official OGP initiative website.</p> <p>The Agency has delegated a new commitment, which involves continuing and expanding efforts toward enabling online access to databases, open data, bringing data closer to users through revision of textual content in press releases and bulletins, developing educational content, engaging with interested parties, and promotion</p> |

VIII. INTERNATIONAL COOPERATION AND EUROPEAN INTEGRATION

| | |
|----------------------------------|--|
| Description of activities | <ul style="list-style-type: none"> - Article 8, paragraph (2) of the Law on Statistics of BiH states that the Agency carries out international representation and cooperation with organizations and other bodies and fulfils BiH's international statistical obligations. These are also the responsibilities of the Department for International Cooperation. - With the entry into force of the Stabilization and Association Agreement between the EU and BiH in June 2015, a contractual relationship was established between the EU and BiH, significantly increasing BiH's obligations on its European path. On 15 December 2022, Bosnia and Herzegovina officially obtained candidate status for European Union membership. In the EU accession process, the obligation of statistical institutions is to ensure the availability of high-quality data, which is the ultimate goal for all levels of government in BiH. The Department for International Cooperation and European Integration supports this process, fulfilling its responsibilities effectively through the implementation of various activities. <p>The ongoing responsibilities of the Department for International Cooperation are:</p> <ul style="list-style-type: none"> - Communication and cooperation with international organizations and institutions, submission of statistical data, and sending reports. Particularly important international partners for BiH statistics include EUROSTAT, relevant UN organizations (UNECE, UNSD, UNICEF, etc.), as well as the World Bank, IMF, and OECD (especially the statistical departments of these organizations); - Cooperation with donors in the field of statistics, and coordination of donor assistance. Due to limited human resources, attention must be paid to avoid potential duplication and overlap of future projects; - Support in the implementation of various projects and coordination within the statistical system; - Programming and planning of future projects and preparation of documentation, in coordination with other institutions in BiH; - Support the participation of representatives of statistical institutions in various international meetings, conferences, trainings, seminars, workshops, and similar events. - Establishing bilateral cooperation with statistical institutions of other countries and with international organizations and institutions; - Collecting information and regularly reporting on the fulfilment of obligations under the European Partnership; - Translating documents; - One of the most important tasks of the Department is to ensure daily coordination within the statistical system of BiH, i.e., to guarantee a two-way flow of information between the Agency, the entity statistical institutes, and, for certain statistics, the CBBiH. This also includes the submission/exchange of reports or relevant information from international meetings to institutions that did not have their own representatives present. |
|----------------------------------|--|

| | |
|--------------------------------|---|
| | <ul style="list-style-type: none"> - Continuous and regular cooperation with relevant partners has been achieved; data and reports are submitted, such as progress reports, information for Eurostat's annual monitoring of BiH statistics' compliance with EU legislation, regular annual completion of questionnaires for Eurostat publications, various questionnaires for UN agencies, and information provided on the impact of the COVID-19 pandemic on BiH statistics. |
| <p>Activity results</p> | <ul style="list-style-type: none"> - BiH statistics (despite reduced donor activities) has secured technical and other support. Specifically, in 2025, the implementation of three significant national projects and one regional/multi-user project is ongoing in parallel. All these projects are financed by the EU. See the attached table. - Bilateral cooperation has been established with the National Institute of Statistics of Romania. A Romanian expert will conduct two training sessions related to the implementation of R, with the participation of statisticians and colleagues responsible for the sample from all three statistical institutions. The training will be financed through TAIEX. In this context, RoAid from Bucharest approved EUR 10,000 for the procurement of appropriate IT equipment for all three institutions. The Agency and the entity statistical institutes successfully implement activities jointly in all EU projects. The Department for International Cooperation assists in coordinating activities within BiH and with external partners. - The process of planning future projects financed through the IPA III fund (2020–2027) continues. These projects are generally implemented jointly by the three |

statistical institutions in BiH. This is an obligation for the entire country, and the statistical system has defined objectives described in the document *Strategic Directions for the Development of Statistics in BiH 2030*. So far, proposed projects exist for IPA 2022 and IPA 2024 under the IPA III fund. The IPA 2022 Action Document has been approved (which includes **IPA 2022** – EU for administrative capacity building – BA2022AAP – **Procurement of equipment; procurement of IT equipment for data exchange for statistical purposes**, as well as the AD for the **IPA 2022 Twinning project**), while the proposal for IPA 2024 has not been supported.

- Agency and entity statistical office staff attend meetings organized by Eurostat, UN statistical commissions, and other relevant international organizations as needed. Employees of the Agency and the entity statistical offices participate in all relevant meetings as well as in Eurostat training sessions (ESTP), which are important for the staff of BiH statistical institutions. Participation in these meetings, with the assistance of the Agency, is also made available as needed to representatives of other relevant institutions (e.g., CBBiH, Ministry of Civil Affairs, Indirect Taxation Authority, etc.).
- The Agency establishes, maintains, and continuously improves cooperation with the official statistical offices of neighbouring countries, the EU, and beyond. Information is exchanged, visits are organized, and best practices are utilized. The Agency's management, as needed, initiates bilateral cooperation and the signing of cooperation agreements with statistical institutions of other countries, while this Department provides the necessary technical and other support.
- To monitor the European Partnership process for BiH and plan future support for the statistical sector, Department staff participate in coordination meetings organized by the Directorate for European Integration (DEI) and prepare various types of reports, such as regular progress reports in the field of statistics, monitoring of action plans, reports on the status of individual areas, and reports on the implementation of EU-funded projects. All reports are submitted within the prescribed deadlines.
- The department actively participates in the process and activities of the BiH EU integration program coordinated by the DEI; all inputs from the Agency have been provided for the work of Working Group 18 on statistics. All activities within WG 18 are carried out with the active participation and cooperation of all three statistical institutions.
- Translation of key documents is ensured, as well as interpretation during meetings when necessary.
- Communication and cooperation with the entity statistical institutes is regular and intensifies during reporting periods for the European Partnership, when planning and preparing new projects, and implementing ongoing projects, as needed. (It is assessed that in the process of programming and preparing projects, as well as international cooperation in general, transparency in work, a positive and proactive attitude, and active participation of all three institutions are present.)
