1. FOREWORD

The data presented in this publication have been obtained on the basis of the Labour Force Survey (ARS 2008).

Statistical institutions in Bosnia and Herzegovina (the Agency for Statistics of Bosnia and Herzegovina-BHAS, the Federal Institute of Statistics-FZS, and the Republic Institute of Statistics of the Republic of Srpska-RZSRS) carried out a research project-The Labour Force Survey in May 2008, for the third time. This document is a part of the yearly programme statistical offices, and Department for International Development UK (DFID) with technical support provide by UNDP support a part of the Labour Force Survey (LFS) implementation in Bosnia and Herzegovina.

Methodological principles behind the Survey are based on the recommendations and definitions of the International Labour Organization-ILO and the requirements of the European Statistical Office-EUROSTAT, which set the standards for the international comparability of data in the area of labour statistics.

Research results are provided in the aggregated form, which, pursuant to the provisions of the Law on Statistics of Bosnia and Herzegovina (“Official Gazette of Bosnia and Herzegovina”, No. 26/04 and 42/04); the Law on Statistics of the Federation of Bosnia and Herzegovina (“Official Gazette of the Federation of Bosnia and Herzegovina”, No. 63/03); and the Law on Statistics of the Republic of Srpska (“Official Gazette of the Republic of Srpska”, No. 85/03), fully provides for the confidentiality of individual data on households and persons.

The publication is composed of two segments. The first segment contains the definitions and the methodological explanations, whereas the second segment contains tables with the data on employment rates, unemployment rates and inactivity. All the data contained in tables are processed at the level of the state of Bosnia and Herzegovina, the entity level and for the Brčko District of Bosnia and Herzegovina. The data for entities and the District are joined in the data set for the level of the state of Bosnia and Herzegovina and are fully mutually comparable.

Starting with the definitions, the Labour Force Survey relies on the ILO concept of labour force, as required by the EUROSTAT. It would be methodologically incorrect to compare the data from this publication with data that may be found in other statistical or administrative sources, as explained in the Chapter entitled “Definitions and Methodological Explanations“.

This is a joint research project of three statistical institutions that worked as a team on the preparation of the Survey instruments, its implementation in the field, data processing and analysis. We would like to express our thanks to the families who participated in the Survey, as well as the interviewers, controllers, supervisors and operators who contributed to the successful realization of this research with their diligence.

Director:

Zdenko Milinović, dipl. oec

1. PREDGOVOR

Podaci objavljeni u ovoj Publikaciji dobiveni su temeljem provedene Ankete o radnoj snazi (ARS 2008).

Statističke su institucije u Bosni i Hercegovini (Agencija za statistiku Bosne i Hercegovine-BHAS, Federalni zavod za statistiku-FZS i Republički zavod za statistiku Republike Srpske-RZSRS) u svibnju 2008. godine po treći put provele su istraživanje-Anketu o radnoj snazi (ARS). Ovo je istraživanje dio godišnjega programa rada statističkih institucija BiH. Dijelom provođenje ovog istraživanja omogućio je Odjel za međunarodni razvoj vlade Velike Britanije (the Department for International Development of the British Government-DFID) uz tehničku pomoć UNDP-a.

Metodološke postavke Ankete temeljene su na preporukama i definicijama Međunarodne organizacije rada (International Labour Organization-ILO) i zahtjevima Statističkog ureda EU (European Statistical Office-EUROSTAT), čime je osigurana međunarodna usporedivost podataka u domeni statistike rada.

Rezultati istraživanja dani su u agregiranom obliku, čime je, sukladno odredbama Zakona o statistici BiH ("Službeni glasnik Bosne i Hercegovine" br. 26/04 i 42/04); Zakona o statistici Federacije BiH ("Službene novine Federacije" br. 63/03); Zakona o statistici Republike Srpske ("Službeni glasnik Republike Srpske" br. 85/03), u potpunosti osigurana tajnost individualnih podataka o kućanstvima i osobama.

Publikacija se sastoji iz dva dijela. Prvi dio sadrži definicije i metodološka objašnjenja, dok su u drugom dijelu tablice u kojima su predloženi podaci o zaposlenosti, nezaposlenosti i neaktivnosti. Svi su podaci u tablicama obrađeni za razinu Bosne i Hercegovine, razinu entiteta i Brčko Distrikta BiH. Podaci za entitete i Distrikt spojeni su u set podataka za razinu BiH i potpuno su međusobno usporedivi.

Polazeći od definicija, čijom se primjenom praćenje radne snage oslanja na ILO koncept radne snage, što je i zahtjev EU Statističkog ureda (EUROSTAT), podatke iz Publikacije nije metodološki ispravno porediti s podacima koji se dobivaju iz drugih statističkih ili administrativnih izvora, što je objašnjeno u okviru poglavlja „Definicije i metodološke napomene“.

Ovo je istraživanje zajednički projekt tri statističke institucije, koje su timski radile na izradi instrumentarija za provedbu Ankete, njezinoj realizaciji na terenu, obradi i analizi podataka. Punu zahvalnost dugujemo kućanstvima koja su pristala na anketiranje, kao i anketarima, kontrolorima, supervizorima i operaterima koji su svojim savjesnim radom pomogli uspješnu realizaciju ovog istraživanja.

Ravnatelj:

Zdenko Milinović, dipl. oec

2. INTRODUCTION

The Labour Force Survey represents research conducted to gather data on the basic characteristics of the working-age population, based on which the total labour force in the country is reviewed, together with data on demographics, education, socio-economic standing and other characteristics of the population. The main goal of the research is to gather data on the three main, mutually exclusive segments of population: the employed, the unemployed and the inactive. The data are also to be used to monitor, measure, and estimate the economic and social changes in Bosnia and Herzegovina.

The Survey covered 10,509 households, including 6,066 in the Federation of Bosnia and Herzegovina, 3,443 in the Republika Srpska, and 1,000 in the Brčko District of Bosnia and Herzegovina. The sample did not include collective households (university dormitories, nursing homes, institutes for the mentally disabled, orphanages, homes for disabled adults, monasteries, convents, etc.).

The Labour Force Survey was carried out by Agency for Statistics of Bosnia and Herzegovina in cooperation with Republika Srpska Institute of Statistics and Federal Institute of Statistics.

Data source for Bosnia and Herzegovina and District of Brčko is Agency for Statistics of Bosnia and Herzegovina.

Data sources for entity level are Republika Srpska Institute of Statistics and Federal Institute of Statistics.

2. UVOD

Anketa o radnoj snazi je istraživanje kojim se prikupljaju podaci o temeljnim karakteristikama radno sposobnoga stanovništva, na osnovi kojih se vrši procjena ukupne radne snage u zemlji, kao i podaci o demografskim, obrazovnim, socio-ekonomskim i drugim karakteristikama stanovništva. Glavni je cilj ovog istraživanja dobivanje podataka o tri temeljna, međusobno isključiva kontingenta stanovništva: zaposlenih, nezaposlenih i neaktivnih osoba. Podaci su također i u funkciji praćenja, mjerenja i ocjenjivanja gospodarskih i društvenih kretanja u Bosni i Hercegovini.

Anketom je obuhvaćeno 10.509 kućanstava, i to: 6.066 u Federaciji BiH, 3.443 u Republici Srpskoj i 1.000 u Brčko Distriktu BiH. Uzorkom nisu obuhvaćena kolektivna kućanstva (studentski i đачki domovi, domovi za djecu i omladinu ometenu u razvoju, domovi za socijalno ugroženu djecu, domovi za umirovljenike, stare i iznemogle, domovi za odrasle invalide, manastiri, samostani i slično).

Anketu o radnoj snazi je provela Agencija za statistiku Bosne i Hercegovine u suradnji sa Republičkim zavodom za statistiku Republike Srpske i Federalnim zavodom za statistiku Federacije Bosne i Hercegovine.

Izvor podataka za razinu Bosne i Hercegovine i Distrikta Brčko je Agencija za statistiku Bosne i Hercegovine.

Izvor podataka na razini entiteta su Republički zavod za statistiku Republike Srpske i Federalni zavod za statistiku Federacije Bosne i Hercegovine.

***) Podatak je ekstremno nesiguran ako je koeficijent varijacije (CV) jednak ili veći od 0,30 ili izraženo u procentima $CV \geq 30\%$

4. DEFINITION AND METHODOLOGICAL EXPLANATIONS

Observation and survey units

The observation unit is a household living in a housing unit randomly selected to the sample, while the survey unit is a member of the selected household.

The basic social and demographic data were gathered on all the persons of the selected households, while the data on employment relate to persons of 15 or more years of age.

A household is considered to be each family or other union of persons who state that they live together and spend their income together to pay for the basic living expenses, notwithstanding whether all members are constantly present at the residence of the household, for example if some of them are temporarily living elsewhere, in a different town or country, for the purposes of employment, education, or other reasons.

A household may be the following:

- (a) Two or more persons, notwithstanding their family relations, sharing the same living area, who usually buy and consume food together (multi-member household) and
- (b) One person living in a housing unit alone, or living with other people, without taking part in the purchase and consumption of food with them (one-member household).

Reference period

The reference period is the time during which data were gathered. The majority of data relate to the economic activity of persons during a calendar week, from Monday through Sunday, called the **reference week**. A certain quantity of the data relate to other periods (four weeks, or a year, in relation to the reference week).

The LFS-2008 reference week was May 19 through May 25, 2008 and it preceded a period of fieldwork, i.e. interviews. Interviews were completed during the period of May 26.05. - 08.06.2008.

Working age population includes all persons of 15 years of age or older, divided into two basic categories: labour force (economically active) and economically inactive population.

The Labour force, or the active population, is composed of the employed and the unemployed.

The employed are persons of 15 years of age or older who, during the reference week:

- (a) Worked for at least one hour for a salary or fee, notwithstanding their formal status or
- (b) Did not work, but had a job to return to.

4. DEFINICIJE I METODOLOŠKA OBJAŠNjENJA

Jedinica promatranja i anketiranja

Jedinica promatranja je kućanstvo koje živi u stambenoj jedinici odabranoj u uzorak, a jedinica anketiranja je član odabranoga kućanstva.

Temeljni sociodemografski podaci prikupljeni su o svim osobama u odabranim kućanstvima, dok se podaci o radnoj aktivnosti odnose na osobe koje imaju 15 i više godina.

Kućanstvom se smatra svaka obiteljska ili druga zajednica osoba koje se izjasne da zajedno stanuju i zajednički troše svoje prihode za podmirivanje temeljnih životnih potreba, bez obzira jesu li svi članovi stalno u mjestu gdje je nastanjeno kućanstvo ili neki od njih borave određeno vrijeme u drugom naselju, odnosno stranoj državi zbog rada, školovanja ili iz drugih razloga.

Kućanstvo može biti:

- (a) dvoje ili više osoba, bez obzira na njihovu srodnost, koje dijele isti stambeni prostor i koje obično zajednički nabavljaju i troše hranu (višečlano kućanstvo) i
- (b) jedna osoba, koja u stambenom prostoru živi sama, ili živi sa drugim osobama, ali ne sudjeluje u zajedničkom nabavljanju i trošenju hrane (jednočlano kućanstvo).

Referentno razdoblje

Referentno razdoblje je vrijeme u kojem se vršilo prikupljanje podataka. Većina se podataka odnosi na gospodarsku djelatnost osoba u konkretnom kalendarskom tjednu, od ponedjeljka do nedjelje, koji se naziva **referentnim tjednom**. Određeni broj podataka se odnosi na druga razdoblja (četiri tjedna, ili godina u odnosu na referentni tjedan).

Referentni je tjedan za ARS-2008. bio od 19.05. do 25.05.2008. godine i prethodio je razdoblju terenskoga rada, odnosno anketiranja. Anketiranje je vršeno od 26.05. do 08. lipnja 2008. godine.

Radno sposobno stanovništvo obuhvaća sve osobe koje imaju 15 i više godina, podijeljene u dvije osnovne kategorije: radnu snagu (ekonomski aktivno) i ekonomski neaktivno stanovništvo.

Radnu snagu ili aktivno stanovništvo čine zaposlene i nezaposlene osobe.

Zaposlene osobe su osobe koje imaju 15 i više godina i koje su u referentnom tjednu:

- (a) radile najmanje jedan sat za plaću ili naknadu, bez obzira na njihov formalni status ili
- (b) nisu radile, a imale su posao na koji će se vratiti.

The employed segment is composed of:

- (a) employees (employed persons who receive salary or fees for their work);
- (b) the self-employed (employers who manage a business subject and employ one or more employees, and persons who work for their own account and do not have employees);
- (c) unpaid family workers (household members working in the family business).

The unemployed are persons of 15 years of age or older who:

- (a) in the reference period, did not engage in any activities for which they received a salary or fee;
- (b) spent four weeks (the reference and three preceding weeks) actively looking for employment or found a job and were about to start work in near future;
- (c) might start work during two weeks following the reference week should they be offered employment.

The inactive are all persons of 15 years of age or older who were not employed during the reference week and who during the four weeks (the reference and the three previous weeks) did not take any measures to look for employment, as well as persons who were not ready to start work in two subsequent weeks should they be offered employment.

The discouraged inactive are persons who did not look for employment during the reference period because they were convinced that they could not find work even though they wanted to work and are ready to start work during the two subsequent weeks should they be offered employment.

The previously mentioned statuses are the statuses of interviewed persons, pursuant to the definitions of the ILO, and the employment status of an interviewee according to their personal opinion is defined as the **subjective work status**.

Kontigent zaposlenih osoba čine:

- (a) zaposlenici (osobe u zaposlenju koje za svoj rad primaju plaću ili naknadu);
- (b) samozaposlenici (poslodavci koji upravljaju poslovnim subjektom i zapošljavanju jednog ili više uposlenika, te osobe koje rade za osobni račun i ne zapošljavaju uposlenike);
- (c) neplaćeni pomažući članovi kućanstva (članovi koji rade u obiteljskom biznisu).

Nezaposlene osobe su osobe koje imaju 15 i više godina i koje:

- (a) nisu u referentnom tjednu obavljale nikakvu aktivnost za plaću ili naknadu;
- (b) u tijeku četiri tjedna (referentni i tri prethodna) aktivno su tražile posao ili su našle posao i u skoroj budućnosti će početi raditi;
- (c) mogle bi početi raditi tijekom iduća dva tjedna ako im bude ponuđen posao.

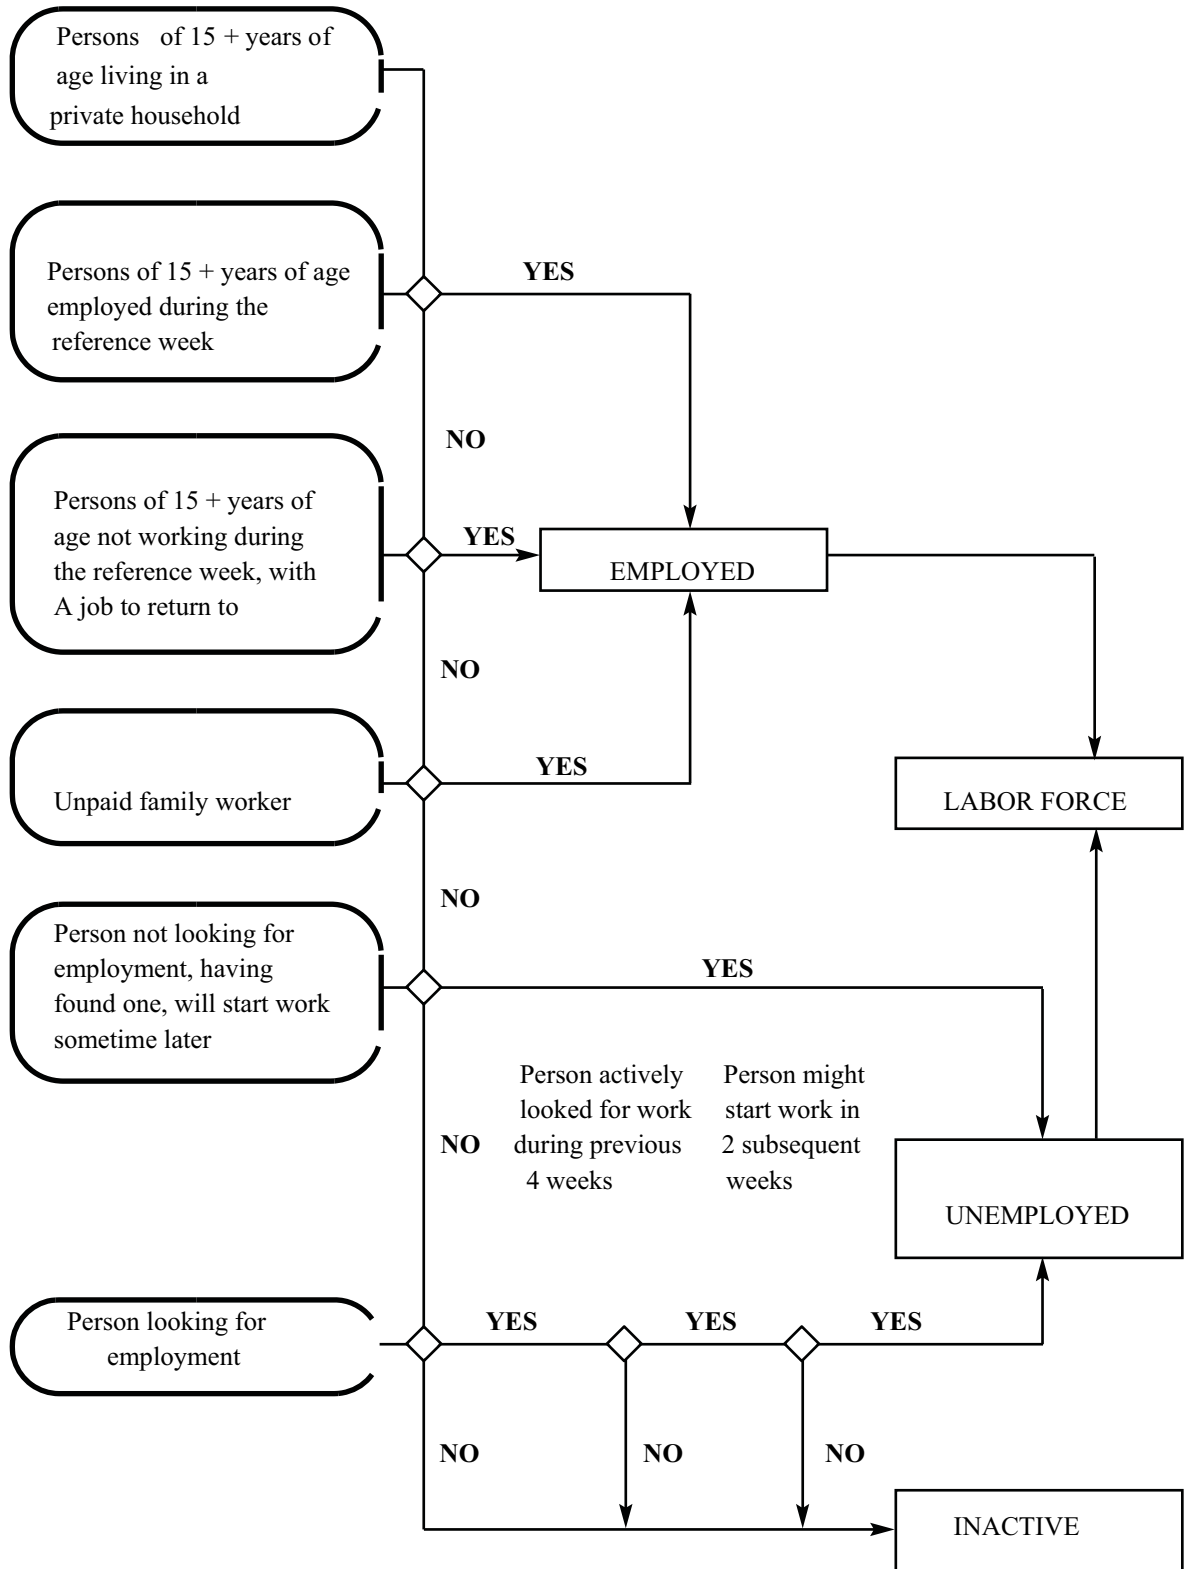

Neaktivno stanovništvo čine sve osobe koje imaju 15 i više godina i koje u referentnom tjednu nisu radile te koje tijekom četiri tjedna (referentni i tri prethodna) nisu poduzimale nikakve radnje s ciljem traženja posla kao i osobe koje nisu spremne početi raditi u iduća dva tjedna ako bi im posao bio ponuđen.

Obeshrabrene neaktivne osobe su osobe koje nisu tražila posao u referentnom razdoblju jer su uvjerene da ne mogu naći posao iako žele raditi i spremne su da počnu raditi u iduća dva tjedna ako bi im posao bio ponuđen.

Prethodno navedeni statusi su statusi anketirane osobe prema definicijama Međunarodne organizacije rada (ILO), a radni status anketirane osobe prema njezinu vlastitom mišljenju je **subjektivni radni status**.

The procedure of defining the status of the working age population is provided in the following graph:

Classification of the working age population pursuant to the definitions of the ILO

Basic indicators

The basic indicators that are derived from the data gathered in the Survey are the following:

$$\text{Activity rates} = \frac{\text{Labour force}}{\text{Working age population}} \times 100;$$

$$\text{Employment rates} = \frac{\text{The employed}}{\text{Working age population}} \times 100;$$

$$\text{Unemployment rates} = \frac{\text{The unemployed}}{\text{Labour force}} \times 100;$$

Classifications

In the encoding and processing of data gathered in this Survey, the following classifications were used:

- (a) **Classification of lines of activity**, that is comparable to the classification of the lines of activity by the United Nations (ISIC-rev.3.) and the classification by the European Union (NACE rev.1.1);
- (b) **Classification of the levels of education**, that is comparable to the international standard education classification (ICSED -1997);
- (c) **Classification of the professional status of the employed**, that is comparable to the international classification of employment statuses (ICSE).

Comparability of the survey and administrative data

The data gathered in the Labour Force Survey are not methodologically comparable to the data gathered from other statistical or administrative sources.

The data comparability is limited due to the following reasons:

- (a) **The source of data**: administrative data are based on the statistical research on the employed, based on the personnel records of business subjects and the records of the unemployed registered at the Employment Agencies, while the Survey data are based on the estimated data gathered in direct interviews of the target group within the households selected randomly;
- (b) **Reporting unit**: the reporting unit for the gathering of administrative data is a legal subject, whereas the survey reporting unit is each member of a randomly selected household;

Temeljni indikatori

Osnovni indikatori koji se izvode na temelju podataka iz Ankete su sljedeći:

$$\text{Stopa aktivnosti} = \frac{\text{Radna snaga}}{\text{Radno sposobno stanovništvo}} \times 100;$$

$$\text{Stopa zaposlenosti} = \frac{\text{Zaposleni}}{\text{Radno sposobno stanovništvo}} \times 100;$$

$$\text{Stopa nezaposlenosti} = \frac{\text{Nezaposleni}}{\text{Radna snaga}} \times 100;$$

Klasifikacije

Prilikom šifriranja i obrade podataka dobivenih ovom Anketom, korištene su sljedeće klasifikacije:

- (a) **Klasifikacija djelatnosti**, koja je usporediva s klasifikacijom djelatnosti Ujedinjenih naroda (ISIC-rev.3.) i klasifikacijom Europske Unije (NACE rev.1.1);
- (b) **Klasifikacija razine obrazovanja**, koja je usporediva s međunarodnom standardnom klasifikacijom obrazovanja (ICSED -1997);
- (c) **Klasifikacija profesionalnoga statusa zaposlenih osoba**, koja je usporediva s međunarodnom klasifikacijom položaja u zaposlenju (ICSE).

Usporedivost anketnih i administrativnih podataka

Podaci dobiveni iz Ankete o radnoj snazi nisu metodološki usporedivi s podacima koji se dobivaju iz drugih statističkih ili administrativnih izvora.

Usporedivost podataka je ograničena iz sljedećih razloga:

- (a) **Izvor podataka**: administrativni se podaci temelje na statističkom istraživanju o zaposlenima, koje se zasniva na kadrovskoj evidenciji pravnih subjekata i na evidencijama nezaposlenih koji su prijavljeni na biroima za zapošljavanje, dok se anketni podaci zasnivaju na procijenjenim podacima dobivenim izravnim intervjuom ciljane skupine u okviru kućanstava odabranih slučajnim uzorkom.
- (b) **Izvještajna jedinica**: jedinica izvještavanja za prikupljanje administrativnih podataka je pravni subjekt, dok je anketna jedinica izvještavanja svaki član slučajno odabranoga kućanstva.

- (c) **Observation period:** administrative data relate to the last day of a month, whereas the Survey data relate to the activities of persons during the reference period;
- (d) **Data gathering methods:** the data from the administrative sources are gathered by reports delivered by business subjects, whereas the Survey data are gathered in a direct interview, from persons, members of households randomly selected in the sample;
- (e) **Data gathering cycles:** administrative data are gathered monthly or semi-annually, while the Survey in Bosnia and Herzegovina is carried out once a year;
- (f) **Definitions of employment and unemployment:** administrative data only encompass persons formally employed, or persons registered as unemployed with the employment agencies, whereas, in the Survey, each of the categories is defined in detail, pursuant to international recommendations.

Sample ¹⁾

The last census in Bosnia and Herzegovina was taken in 1991. Considering the major migrations of the population since then, and the fact that the Survey research is based on the random sample of households as units of observation, it was necessary to provide up-to-date data based on which the sample could be selected. UNDP supported formulation and implementation of the Sample Frame Update project, for which funding was provided by the Government of the UK through its Department for International Development (DFID). Within this project an Expanded Master Sample was established by updating the information for 1,456 census areas in the period of January/February 2006. 10,509 households from Bosnia and Herzegovina were selected from the Expanded Master Sample, namely: 6,066 for the Federation of Bosnia and Herzegovina, 3,443 for the Republic of Srpska and 1,000 for Brčko District.

The sample was designed as a stratified two-stage random sample.

Weights were calculated in two steps. In the first step, each of the selected households was allocated the weight of the sample selection as the inverted value of probability of selecting each household. In the second step, adjustments were made on the basis of failure to respond. Post-stratification, i.e. adjustment of weights per age group and gender, was not executed due to lack of reliable estimates of population per age group or gender.

The rate of unresponsiveness in the Survey is 11.9%, which includes the rate of rejection of 4.2%.

1) The sample selection, weighting and estimate of the analysis of the basic indicators was carried out by Dr Vesna Lužar -Stiffler. Detailed explanation is contained in the Report by Dr Vesna Lužar -Stiffler: „BiH 2008 LFS – Sample selection”, 2008.

- (c) **Razdoblje promatranja:** administrativni se podaci odnose na zadnji dan u mjesecu, dok se anketni podaci odnose na aktivnost osoba u referentnom razdoblju.
- (d) **Metod prikupljanja:** podaci iz administrativnih izvora dobivaju se putem izvješća koje dostavljaju pravni subjekti, dok se anketni podaci prikupljaju izravnim upitnikom od osoba u kućanstvima koja su odabrana u uzorak.
- (e) **Periodika prikupljanja:** administrativni podaci se prikupljaju mjesečno, odnosno polugodišnje, dok se anketa u BiH provodi jedanput godišnje.
- (f) **Definicije zaposlenosti i nezaposlenosti:** administrativni podaci obuhvaćaju samo osobe u formalnoj zaposlenosti, odnosno osobe koje su kao nezaposlene prijavljene na biroima za zapošljavanje, dok se u anketi svaka kategorija potanko definira u skladu s međunarodnim preporukama.

Uzorak ¹⁾

Posljednji je popis stanovništva u BiH proveden 1991. godine. Budući da je nakon toga došlo do velikih pomjeranja stanovništva, a kako je anketno istraživanje bazirano na uzorkom odabranim kućanstvima kao jedinicama promatranja, bilo je potrebno osigurati ažurnije podatke na temelju kojih bi se odabrao uzorak. Uz pomoć UNDP-a, formuliran je i proveden projekt Ažuriranje okvira uzorka u BiH, za koji je financijska sredstva obezbijedila Vlada Velike Britanije, putem svog Odjela za međunarodni razvoj (DFID). U okviru projekta je formiran Prošireni master-uzorak ažuriranjem 1.456 popisnih krugova u razdoblju siječanj / veljača 2006. godine. Iz Proširenog master-uzorka izvršen je izbor 10.509 kućanstava za BiH, a od toga: 6.066 za Federaciju BiH, 3.443 za Republiku Srpsku i 1.000 za Distrikt Brčko.

Uzorak je dizajniran kao stratificirano dvoetafni slučajni uzorak.

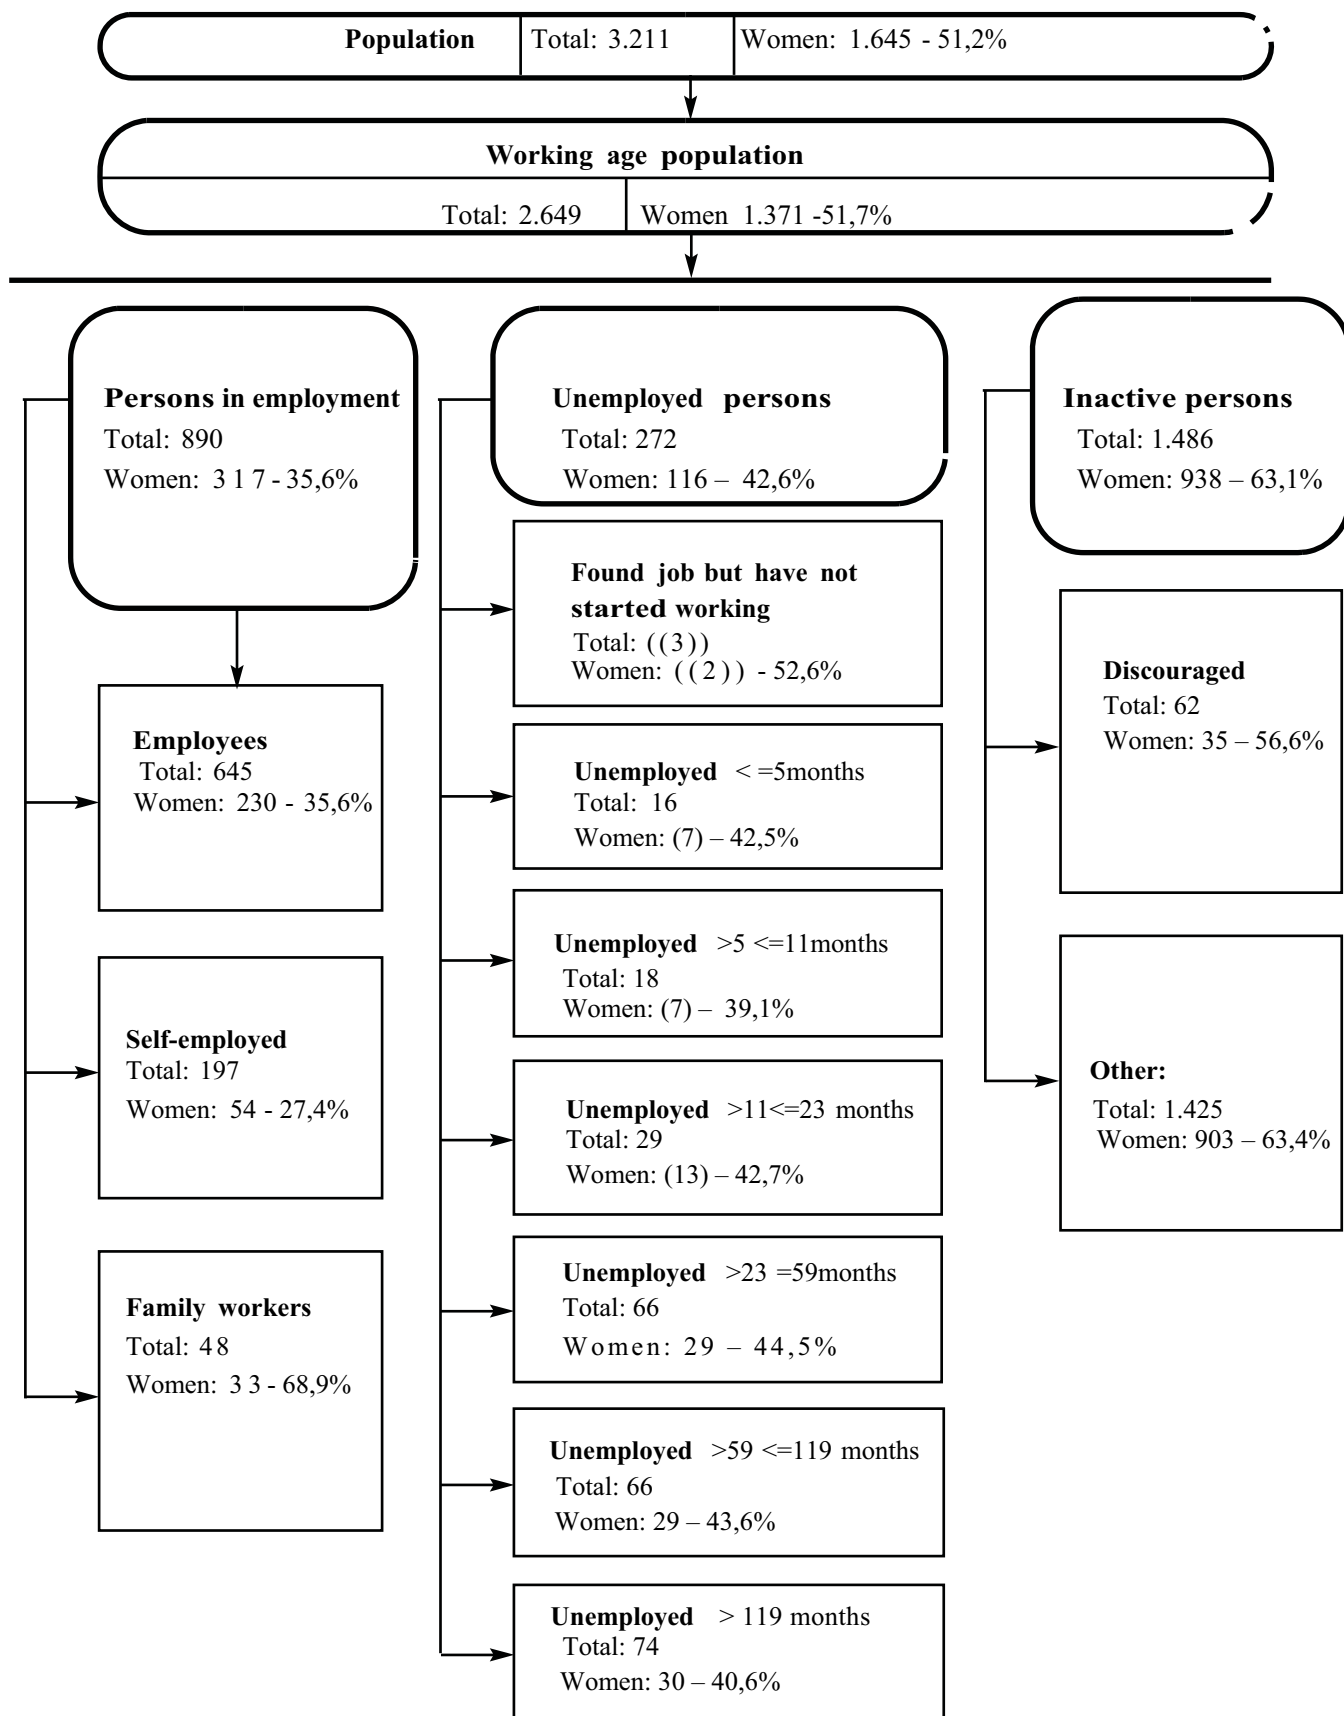

Ponderi su izračunati u dvije etape. U prvoj je etapi svakom odabranom kućanstvu pridružen ponder odabira iz uzorka kao inverzna vrijednost vjerovatnoće izbora svakog kućanstva. U drugoj je etapi urađeno prilagođavanje na temelju neodziva. Nije urađena poststratifikacija, odnosno prilagođavanje pondera sukladno starosnim skupinama i spolu zbog nepostojanja pouzdanih procjena stanovništva u svezi sa spolom i starosnim skupinama.

Stopa neodgovora u Anketi je 11,9%, u okviru koje je stopa odbijanja 4,2%.

1) Izbor uzorka, ponderaciju i procjenu analize ključnih indikatora uradila je doc. dr. Vesna Lužar-Stiffler. Potanko objašnjenje dato je u izvješću doc. dr. Vesne Lužar-Stiffler: „BiH 2008 LFS – Odabir uzorka”, 2008.

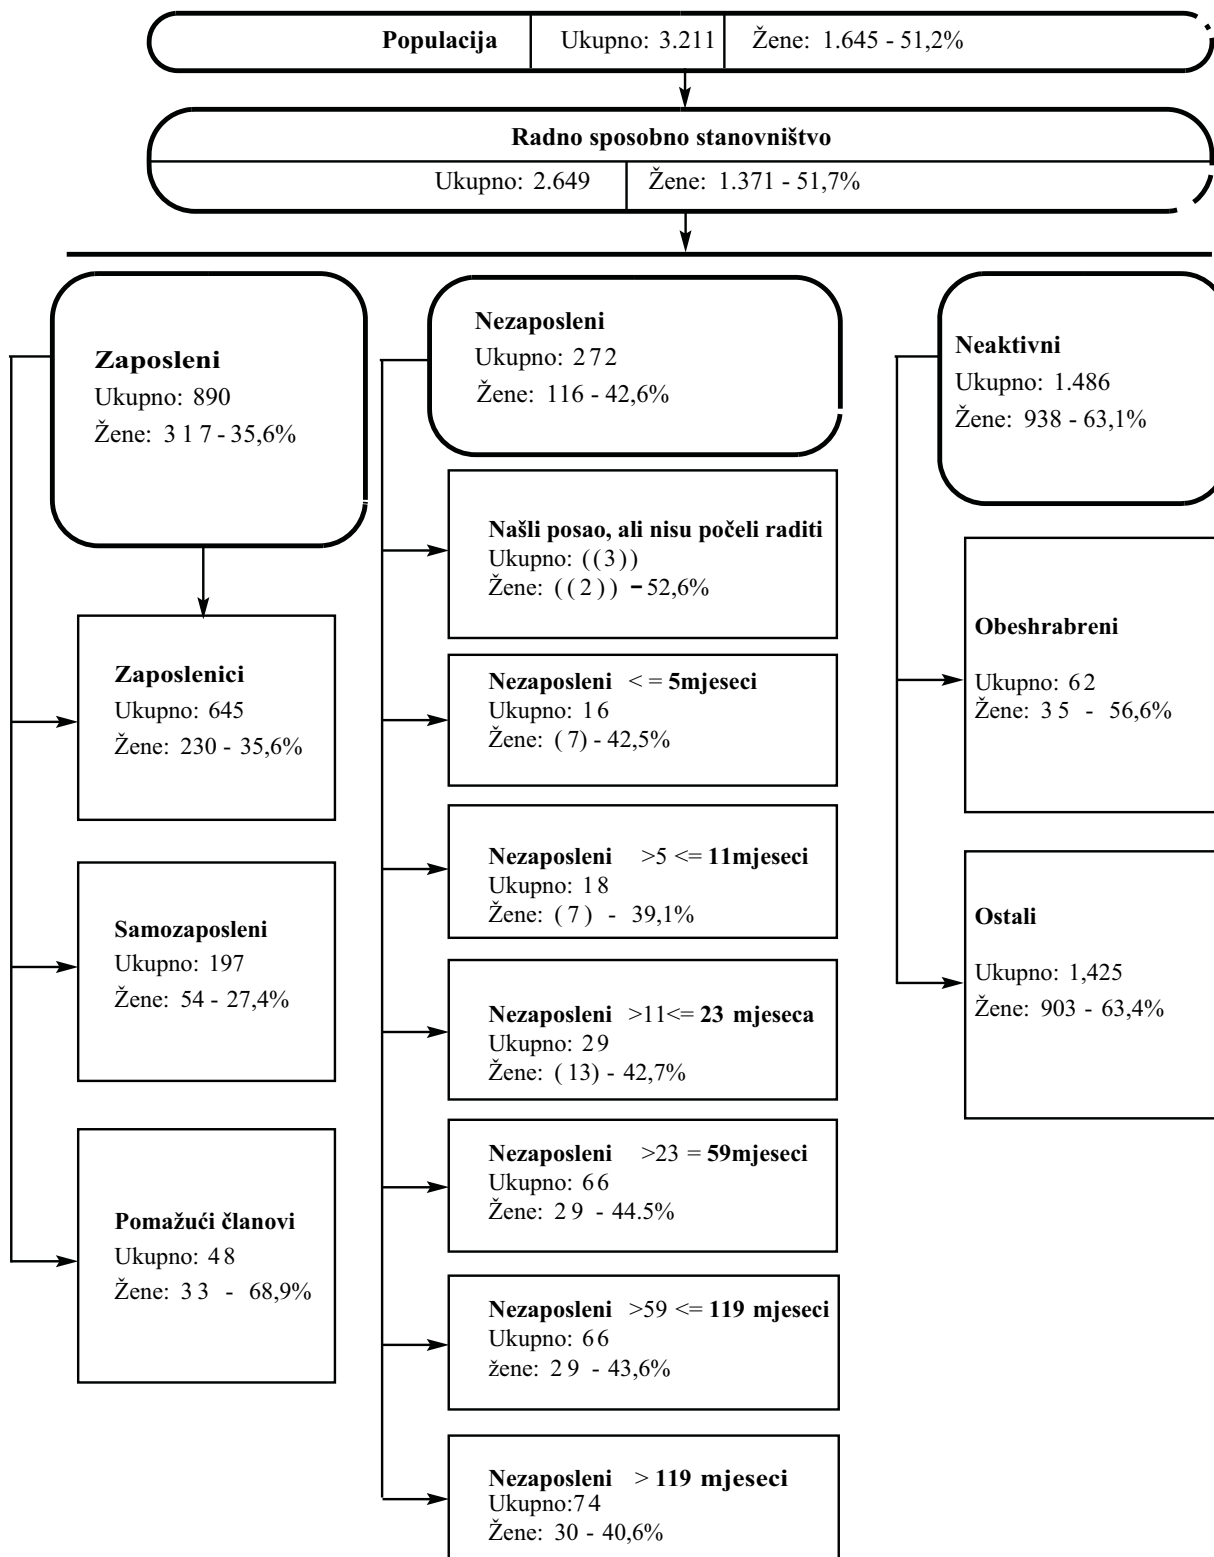

A review of basic segments of population is given in the following graph:

Population in accordance to the activity, in thousands

Pregled osnovnih kontigenata stanovništva dat je u slijedećoj shemi:

Stanovništvo prema aktivnosti, izraženo u tisućama
