## **Foreword**

Agency for Statistics of Bosnia and Herzegovina in accordance with the Plan of activities for 2015, publishes the Bulletin of the annual structural business statistics (SBS) - 2013 in which the data relate to market enterprises, ie. include economic sections B, C, D, E, F, G, H, I, J, L, M, N, P, Q and S. Entrepreneurs are not included.

Bulletin contains main structural variables and indicators that are made based on the data "Annual structural business statistics survey for enterprises - SBS," which are jointly conducted by statistical institutions of Bosnia and Herzegovina (Agency for Statistics of Bosnia and Herzegovina, Institute for Statistics of Federation of BiH and Institute for Statistics of Republika Srpska) and which are in full compliance with applicable EU standards in this field of statistics (EU Regulation 295/2008), and in accordance with actual EU Classification of economic activities NACE Rev 2.

Bulletin consists of two parts. The first part contains basic methodological explanations with definitions of variables and indicators in order to allow proper and easier use of the presented data. The second part contains tables with data and graphics. Tables 1.0 - 6.0 show the data in 2013. year with graphical representations, and tables 7.0 - 9.1 show the comparable data for three years for the activities that are covered with surveys in the 2011, 2012 and 2013 year. Structural business statistics produce variables and indicators for the reference year in nominal amount, and show changes in one year compared to another.

It must be pointed out that the statistical data presented in this bulletin are not comparable with the data on the structure and business collected and/or processed according to methodologies that have a different access and/or using different concepts and definitions.

We use this opportunity to thank the Institute for Statistics of Federation of BiH and Institute for Statistics of Republika Srpska for good cooperation in all phases of survey, as for the joint efforts during the conducting of the structural business survey, controls carried out, data editing, analysis of results, etc.

Sarajevo, June 2015

Fadil Fatić  
Deputy director

## INTRODUCTION

Structural business survey is aimed at collecting, processing and publishing statistical data on the structure, activity, competitiveness and operating characteristics of enterprises and their business results at different levels of grouping by activity.

Structural business statistics surveys represent a general framework for collecting data on all active market units (enterprises and entrepreneurs). Based on these surveys, indicators are produced for the reference year and show changes in relation to the previous year. Most of the variables are expressed in values at current prices and, therefore, the indices of change refer to changes in value.

Data collected through Structural business surveys are used for analysis of the structure of business entities by activity (production value, value-added, employment etc.), analysis of factors used in the production process (number of persons employed, compensation of employees, investments etc.), analysis of national and regional development. In addition, Structural business statistics data are used also as input for national accounts estimates and for weights calculation in short-term statistics.

The content of Structural business statistics (SBS) in the European community is defined by the EU Regulation 295/2008 and implementing Regulations 250/2009, 251/2009 and 275/2010.

Statistics produced in line with these regulations are grouped in following modules:

- A common module for annual structural statistics, as defined in Annex I. This module has established a common framework for all market activities, in which service activities are defined for which a detailed module is not provided,
- A detailed module for structural statistics in industry, as defined in Annex II,
- A detailed module for structural statistics in trade, as defined in Annex III,
- A detailed module for structural statistics in construction, as defined in Annex IV,
- A detailed module for structural statistics in insurance, as defined in Annex V;
- A detailed module for structural statistics on credit institutions, as defined in Annex VI;
- A detailed module for structural statistics on pension funds, as defined in Annex VII;
- A detailed module for structural statistics on business services, as defined in Annex VIII;
- A detailed module for structural statistics on business demography, as defined in Annex IX.

For each module, annual, multi-annual and regional data series are defined. In addition, the data series that should be produced for kind of activity units are defined for module II and IV.

Regular statistical survey of structural business statistics in Bosnia and Herzegovina, with enterprise as a observation unit was conducted with aim of producing annual series of data for enterprises, for the first four Annexes of EU Regulation 295/2008.

Survey for 2013 covers full Sections of activities from B to J and L to N, private enterprises from Sections P and Q and Section S, except division 94 from Section S.

Further development of structural business statistics will be based on full implementation of first four Annexes, which means including entrepreneurs, production of annual and multiannual series of data, regional series of data, as well as variables for the kind of activity units (KAU variables), and development of survey for other Annexes (Annexes V to IX) of EU Regulation.

## **NOTES ON METHODOLOGY**

### ***Legal basis***

The legal basis for the implementation of Structural Business surveys are Statistical programme of Bosnia and Herzegovina for 2013-2016, Annual statistical plan of the Agency for Statistics which is adopted based on Law on Statistics of BiH ("Official Gazette" No. 26/04 and 42/04), as plans and programmes of the entities Institutes which are harmonized with the Four-year program and Annual statistical plan of the Agency for Statistics of Bosnia and Herzegovina. In the European community, structural business statistics are defined by the EU Regulation 295/2008 and implementing Regulations 250/2009, 251/2009 and 275/2010.

### ***The aim of survey***

The aim of survey on Structural Business Statistics is monitoring of business market units and providing comparable SBS data in accordance with European standards. Data collected through structural business surveys are used for analysis of the structure of business entities by activities (production value, value-added, employment etc.), analysis of factors used in the production process (number of persons employed, compensation of employees, investments etc.), analysis of national and regional development. In addition, Structural Business Statistics data are used also as input for estimates national accounts and for weights which are used for calculation of the index in short-term statistics.

### ***Coverage***

The survey covered active enterprises from Statistical Business Register (SBR) which kept and maintained by the Agency for Statistics of BiH in cooperation with Institute for Statistics of Federation of BiH, Institute for Statistics of RS and Branch Office of Agency for Statistics BiH in Brcko District.

This Bulletin covered active enterprises, which are classified by main activity in the following Sections: B- Mining and Quarrying, C – Manufacturing, D - Electricity, gas, steam and air conditioning supply, E - Water supply; sewerage, waste management and remediation activities, F – Construction, G - Wholesale and retail trade; repair of motor vehicles and motorcycles, H - Transportation and storage, I - Accommodation and food service activities, J - Information and communication, L – Real estate activities, M - Professional, scientific and technical activities, N - Administrative and support service activities, P – Education, Q - Human health and social work activities and S - Other service activities, except 94 - Activities of membership organizations.

The survey does not cover entrepreneurs. The plan is to include entrepreneurs in the near future.

### ***Source and methods of data collection***

Data for the compilation of SBS variables and indicators are collected by statistical survey "Annual structural business statistical survey for the enterprises."

It was used the combined method of sample and full coverage. The method full coverage was used for enterprises with 20 or more persons employed, and the sample method for enterprises with less than 20 persons employed.

The sampling frame was based on the data from the SBR as of 31st of December 2012. Regular survey for 2013 includes activities which are covered by Annexes I, II, III and IV of Regulation 295/2008.

Stratification of the target population of the survey was conducted according to entity where enterprise is registered, class of enterprises in relation to the number of persons employed and activity of enterprise, in accordance with the following levels:

- Section B „Mining and Quarrying“ – level of division (2 codes KD BiH 2010)
- Section C „Manufacturing“ – level of division (2 codes KD BiH 2010)
- Section D „Electricity, gas, steam and air conditioning supply“ - level of group (3 codes KD BiH 2010)
- Section E „Water supply; sewerage, waste management and remediation activities“- level of division (2 codes KD BiH 2010)
- Section F „Construction“ - level of division (2 codes KD BiH 2010)
- Section G „Wholesale and retail trade; repair of motor vehicles and motorcycles“ – level of division (2 codes KD BiH 2010)
- Section H „Transportation and Storage“ - level of division (2 codes KD BiH 2010)
- Section I „Accommodation and food services activities (Hotels and Restaurants)“ – level of division (2 codes KD BiH 2010)
- Section J „Information and communication“ - level of division (2 codes KD BiH 2010)
- Section L „Real estate activities“ – level of group (3 codes KD BiH 2010)
- Section M „Professional, scientific and technical activities“ - level of division (2 codes KD BiH 2010)
- Section N „Administrative and support service activities“ - level of division (2 codes KD BiH 2010)
- Section P „Education“ – level of group (3 codes KD BiH 2010)
- Section Q „Human health and social work activities“ – level of division (2 codes KD BiH 2010)
- Section S „Other service activities“ - level of division (2 codes KD BiH 2010)

Stratification of frame for SBS survey for the reference 2012 was done by following employment class for all activities, except Section G (Wholesale and retail trade; repair of motor vehicles and motorcycles):

1. I class 0 – 19 persons employed
2. II class 20 – 49 persons employed
3. III class 50 and more persons employed.

For Section G “Wholesale and retail trade; repair of motor vehicles and motorcycles“ following employment class were used

1. I class 0 – 1 persons employed
2. II class 2 – 9 persons employed
3. III class 10 - 19 persons employed
4. IV class 20 - 49 persons employed
5. V class 50 - 249 persons employed
6. VI class 250 and more persons employed

In Bosnia and Herzegovina the sampling frame was 24.790. Based on this frame, sample of 11.423 units was selected for BiH; from which for Federation of BiH 6.889 units, for Republika Srpska 3.823 units and for Brcko District 711 units.

Sampling frame and sample by activity section and employment class is shown in the next table:

**Sampling frame and sample by activity section and employment class for BiH for 2013**

Section	Sampling frame				Sample			
	Employment Class				Employment Class			
	I	II	III	Total	I	II	III	Total
<b>B</b>	138	27	26	191	121	27	26	174
<b>C</b>	3.379	574	487	4.440	1.519	574	487	2.580
<b>D</b>	77	11	27	115	72	11	27	110
<b>E</b>	200	77	71	348	148	77	71	296
<b>F</b>	1.644	238	137	2.019	642	238	137	1.017
<b>G</b>	9.088	589	273	9.950	2.862	589	273	3.724
<b>H</b>	1.663	117	55	1.835	605	117	55	777
<b>I</b>	601	62	27	690	206	62	27	295
<b>J</b>	785	57	36	878	401	57	36	494
<b>L</b>	285	14	9	308	199	14	9	222
<b>M</b>	2.265	84	38	2.387	794	84	38	916
<b>N</b>	515	42	32	589	263	42	32	337
<b>P</b>	258	27	10	295	132	27	10	169
<b>Q</b>	446	14	9	469	164	14	9	187
<b>S</b>	261	8	7	276	110	8	7	125
<b>Total</b>	<b>21.605</b>	<b>1.941</b>	<b>1.244</b>	<b>24.790</b>	<b>8.238</b>	<b>1.941</b>	<b>1.244</b>	<b>11.423</b>

The total response rate for all activities and employment class in BiH was 78.4%, in Federation of BiH was 76.7%, in Republika Srpska was 85.6% and in Brcko District was 56.7%.

Entity institutes and Brcko District organized and carried out fieldwork in their respective territory. Printing of the survey materials (questionnaires, instructions and letters), distribution to the reporting units, collection, remind, check and data entry, micro data editing and estimations of totals were carried out in the entity institutes, and for Brcko District was carried out Agency for Statistics of BiH.

### **Observation units**

Several statistical units are used for the compilation of SBS survey. Most data refer to the „enterprise“ as a statistical unit. For the calculation of regional data is used local unit, and for the calculation of KAU variables is used kind of activity unit.

The observation units in this survey are enterprises perform the activity in the economic territory of Bosnia and Herzegovina. These enterprises are classified in the sections of activity that are listed in previous table. Each enterprises are attributed a certain activity code according to the Classification of Activities BiH 2010 on the basis of their principal activity. The principal activity of the enterprise is determined and updated by the Statistical Business Register. Criteria for determining the principal activity is the share of turnover in total turnover or share of number of persons employed in total number of persons employed of enterprise.

However, the enterprise statistics refer to the all activities carried out by the enterprises, including their secondary activities.

Data published in this bulletin refer to enterprise and in accordance with the EU recommendations they are grouped by next classes of employment:

- Small enterprises (0 to 49 persons employed),
- Medium enterprises (50 to 249 persons employed) and
- Large enterprises (250 and more persons employed).

### **Classifications**

Classification of Activities of Bosnia and Herzegovina 2010 – KD BiH 2010 was used for conducting Structural Business Statistics survey, which is in line with the EU NACE Rev. 2, according to which the data are published in this bulletin.

In the countries of EU, statistical data are collected and processed divided by statistical regions. As in BiH has not yet introduced the classification of regions according to EU NUTS classification, data are shown only by administrative breakdown, ie. for BiH, entities and BD.

Certain SBS parameters are shown also by groups of products based on Classification of products by activity - KPPD BH 2010 (EU CPA 2008).

### **Definitions of variables and indicators**

#### **Variables**

##### **Number of enterprises**

A count of the number of market enterprises registered to the population concerned in the business register corrected for errors, in particular frame errors. Only active units which either had turnover or employment at any time during the reference period should be included. Dormant (temporarily inactive) and inactive units are excluded.

### ***Number of persons employed***

The number of persons employed is defined as the total number of persons who work in the observation unit (including working proprietors, partners working regularly in the unit and unpaid family workers working regularly in the unit), as well as persons who work outside the unit who belong to it and are paid by it (e.g. sales representatives, delivery personnel, repair and maintenance teams). It includes persons absent for a short period (e.g. sick leave, paid leave or special leave), and also those on strike, but not those absent for an indefinite period. It also includes part-time workers who are regarded as such under the laws and who are on the pay-roll, as well as seasonal workers, apprentices and home workers on the pay-roll. Unpaid family workers refer to persons who live with the proprietor of the unit and work regularly for the unit, but do not have a contract of service and do not receive a fixed sum for the work they perform. The number of persons employed excludes manpower supplied to the unit by employment agencies or brokerage of employment.

### ***Number of employees***

The number of employees is defined as those persons who work for an employer and who have a contract of employment and receive compensation in the form of wages, salaries, fees, gratuities, piecework pay or remuneration in kind. The number of employees includes part-time workers, seasonal workers, and persons on strike or on short-term leave, but excludes those persons on long-term leave. The number of employees does not include voluntary workers.

### ***Turnover***

Turnover comprises revenues calculated from sales of products, goods and services by the reporting unit to third parties during the reference period. Turnover includes all duties and taxes on the goods or services invoiced by the unit with the exception of the value added type taxes (VAT). It also includes all other charges (transport, packaging, etc.) passed on to the customer, even if these charges are listed separately in the invoice.

Goods produced for own consumption or investment should be excluded from turnover. Reduction in prices, rebates and discounts as well as the value of returned packing must be deducted. Income classified as other operating income, financial income and extra-ordinary income and revenue from the use by others of enterprise assets yielding interest, royalties and dividends and other income is excluded from turnover. Operating subsidies received from public authorities are also excluded.

### ***Production value***

The production value measures the amount actually produced by the unit. The production value is defined as turnover or revenue from sales of goods and rendering of services, plus or minus the changes in stocks of finished products and work in progress; minus the purchases of goods and services for resale (only for the goods and services sold during the reporting period); plus capitalized production, plus other operating income (including subsidies on products and production). Income and expenditure classified as financial or as revenue in the form of interests and dividends in company accounts is excluded from production value. Capitalized production includes the own-account production of all goods that are retained by their producers as investment. The latter includes the production of fixed tangible assets (buildings, etc.) as well as intangible assets (development of software, etc.). Capitalized production is unsold production and is valued at production cost. These capital goods are also included in investment.

### ***Value added at factor cost***

Value added at factor cost is the gross income from operating activities after adjusting for operating subsidies and indirect taxes. It can be calculated from turnover, plus capitalised production, plus other operating income, plus or minus the changes in stocks of goods and services, minus the purchases of goods and services, minus other taxes on products which are linked to turnover but not deductible, minus the duties and taxes linked to production. The duties and taxes linked to production are compulsory, unrequited payments, in cash or in kind which are levied by general government in respect of the production and importation of goods and services, the employment of labour, the ownership or use of land, buildings or other assets used in production irrespective of the quantity or the value of goods and services produced or sold.

### ***Personnel costs***

Personnel costs are defined as the total remuneration, in cash or in kind, payable by an employer to an employee (regular and temporary employees as well as home workers) in return for work done by the latter during the reference period. Personnel costs also include taxes and employees' social security contributions retained by the unit as well as the employer's compulsory and voluntary social contributions. Included are all gratuities, workplace and performance bonuses, ex gratis payments, thirteenth month pay (and similar fixed bonuses), payments made to employees in consideration of dismissal, lodging, transport, cost of living and family allowances, commissions, attendance fees, over-time, night work etc. Payments for agency workers are not included in personnel costs.

### ***Gross operating surplus***

Gross operating surplus is the surplus generated by operating activities after the labour factor input has been recompensed. It can be calculated from the value added at factor cost less the personnel costs. It is the balance available to the unit which allows it to recompense the providers of own funds and debt, to pay taxes and eventually to finance all or a part of its investment.

### ***Total purchases of goods and services***

Purchases of goods and services include the value of all goods and services purchased during the accounting period for resale or consumption in the production process, excluding capital goods the consumption of which is registered as consumption of fixed capital. The goods and services concerned may be either resold with or without further transformation, completely used up in the production process or, finally, be stocked. Included in these purchases are the materials that enter directly into the goods produced (raw materials, intermediary products, components), plus non-capitalised small tools and equipment. Also included are the values of ancillary materials (lubricants, water, packaging, maintenance and repair materials, and office materials) as well as energy products. Included in this variable are the purchases of materials made for the production of capital goods by the unit. Services paid for during the reference period are also included. In this figure are payments for all work carried out by third parties on behalf of the unit including current repairs and maintenance, installation work and technical studies. Amounts paid for the installation of capital goods and the value of capitalised goods are excluded. Also included are payments made for non-industrial services such as legal and accountancy fees, patents and license fees (where they are not capitalised), insurance premiums, costs of meetings of shareholders and governing bodies, contributions to business and professional associations, postal, telephone, electronic communication, telegraph and fax charges, transport services for goods and personnel, advertising costs, commissions (where they are not included in

wages and salaries), rents, bank charges (excluding interest payments) and all other business services provided by third parties. Included are services which are transformed and capitalised by the unit as capitalised production. Expenditure classified as financial expenditure in the form of interests and dividends is excluded from the total purchases of goods and services. Purchases of goods and services are valued at the purchase price, i.e. the price the purchaser actually pays for the products, including any taxes less subsidies on the products bought excluding value added type taxes. All other taxes and duties on the products are therefore not deducted from the valuation of the purchases of goods and services. The treatment of taxes on production is not relevant in the valuation of these purchases.

### ***Indicators***

These indicators are calculated based on the calculated values of the variables.

#### ***Turnover per person employed***

Turnover per person employed is obtained by dividing the total turnover with a total number of persons employed. This indicator expresses the ability of selling of business unit of specific activity.

#### ***Value added per person employed***

Value added per person employed is obtained by dividing the total value added with a total number of persons employed. This indicator is used to measure productivity.

#### ***Value added at factor cost in production***

Value added at factor cost in production is obtained by dividing the total value added with the production value.

#### ***Average personnel costs per employee***

Average personnel costs per employee is obtained by dividing the total personnel cost with number of employees. This indicator shows the average costs of employees in certain activity.

#### ***Gross operating rate - profitability***

Gross operating rate show share of gross operating surplus in turnover.
