Border countries	Croatia, Serbia, Montenegro
Estimated resident population (30.06.2014.)	3.827.343
Population density (inhab/km ²)	75
Official languages	Bosnian, Serbian, Croatian
Alphabets	Latin, Cyrillic
Official currency	Convertible mark (KM)
Climate	Moderate continental and mediterranean

Administrative structure of Bosnia and Herzegovina (BiH)

The Federation of Bosnia and Herzegovina (FBiH) Republika Srpska(RS), and Brcko District BiH (BD BiH).

The capital of Bosnia and Herzegovina is Sarajevo.

The Federation of Bosnia and Herzegovina is administratively divided into 10 cantons, and cantons are subdivided into municipalities and cities.

Republika Srpska is administratively divided into municipalities and cities.

In BiH there are three National parks and two Nature parks.

National parks are Sutjeska, Kozara and Una. Nature parks are Hutovo Blato and Blidinje.

For the census conducted earlier in our country, before 1991, the official results referred to the so-called resident population, i.e. population who reside in the territory of Bosnia and Herzegovina, regardless of whether at the critical moment of the census, the persons were present at the place of residence or were temporary absent, in the country or abroad, due to some other reasons.

In the Population Census in 1961 and 1971 as a resident population persons were registered at the place where they worked at the Census moment, while in the 1981 and 1991 Census these persons were enumerated as a resident population in the places where their families lived.

POPULATION IN BiH ACCORDING TO CENSUSES

Censuses 1879-1991, in thousands of people

AVERAGE LIFE EXPECTANCY AND AVERAGE AGE OF POPULATION IN BiH

	Female	Male
Life expectancy		
1981-1982	73,5	68,2
1988-1989	74,6	69,2
Average age of population		
1981	30,5	28,7
1991	35,0	33,0
2007	39,4	37,2
2011	40,8	38,6

POPULATION MIDYEAR ESTIMATES AND NATURAL CHANGE IN BiH

2007-2014, "de facto" total population in thousands

2013	3.832	30.684	15.835	35.662	18.217	-4.978
2014	3.827	30.268	15.597	35.980	18.360	-5.712

Natural change is the difference (surplus or deficit) between the number of livebirths and the number of deaths in a given period.

A liveborn child is every child that breathes at birth or shows any other signs of life (beating of the heart, pulsation of the umbilical cord, definite movements of voluntary muscles).

A dead person is every live born person whose evidence of life permanently disappeared.

TOTAL FERTILITY RATE IN BiH

2005-2014

The total fertility rate (TFR) is the number of children that would be born alive to a woman during her childbearing years, if she were to pass through all her childbearing years conforming to the age-specific fertility rates of a given year.

Stillborn is considered a child delivered, or extracted from its mother displaying no signs of life, that is if it did not breath or display any other signs of life, and was carried longer than 22 weeks (approximately 6 months) with more than 500 g birthweight.

STILLBIRTHS BY SEX AND STILLBIRTHS RATE IN BiH,

2005-2014

	Total	Female	Male	Stillborn per 1000 liveborn

Form, measure or service are considered every case of protection provided by Centre of social welfare or Social welfare service on the basis of legal acts and regulations concerned with this field. Data on forms, measures, and services refer to the number of conducted, that is, used forms, measures and services in the reference period, and not to the number of persons.

Institutions for children and adolescents without parental care provide temporary or permanent care, food, health care, upbringing, education and vocational training for children and youth in need of such a form of protection.

Working age population includes all persons of 15 years of age or older, divided in two basic categories: labour force (economically active) and economically inactive population.

The Labour Force, or the active population, is composed of the employed and the unemployed persons.

The inactive are all persons of 15 years of age or older who were not employed during the reference week and who during four weeks (the reference and the three previous weeks) did not take any measures to look for employment, as well as persons who were not ready to start work in subsequent weeks should they be offered employment.

Methodological principles behind the Labour Force Survey are based on the recommendations and definitions of the International Labour Organisation - ILO and the European Statistical Office - EUROSTAT.

() the data are less certain if the coefficient of variance (CV) is less than 0,20, but equal to or more than 0,10 or expressed in percentages $10\% \leq CV < 20\%$

(!) the data are uncertain if the coefficient of variance (CV) is less than 0,30, but equal to or more than 0,20 or expressed in percentages $20\% \leq CV < 30\%$

Activity rate is calculated as the ratio of labour force and the working age population.

The employment rate is calculated as the ratio of employed persons and the working-age population.

The unemployment rate is calculated as the ratio of unemployed persons and the labour force.

The unemployed are persons of 15 years of age or older who:

- a) in the reference period did not engage in any activities for which they received a salary or fee;
- b) spent four weeks (the reference and three preceding weeks) actively looking for employment or found a job and were about to start work in the near future
- c) might start work during two weeks following the reference week should they be offered employment.

The employed are persons of 15 years of age or older who, during the reference week:

- worked for at least one hour for a salary or fee, regardless of their formal status, or
- did not work, but had a job to return to.

The employed segment is composed of:

- employees (employed persons who receive salary or fees for their work)
- the self-employed (employers who manage a business subject and employ one or more employees, and persons who work for their own account and do not have employees)
- unpaid family members (working in family business).

GROSS FIXED CAPITAL FORMATION IN NEW FIXED ASSETS

2014, u %

Considering that gross fixed capital formation, according to the European system of accounts, includes gross fixed capital formation in fixed assets, changes in inventories and net acquisitions of valuables, we notice that with this survey only data on gross fixed capital formation in fixed assets and net acquisitions of valuables have been collected for legal entities.

Realized gross fixed capital formation in new fixed assets are related to the part of fixed assets that has been purchased directly from the contractor or producer of the equipment or self-produced, that is related to gross fixed capital formation assets still out of buying and selling transactions among users.

Gross capital formation for construction works includes the value of construction and equipment built-in into constructions (electro installations, central heating installations, lifts etc.) and related projects.

Gross fixed capital formation for equipment includes all expenses for fitting, transportation, custom duties, insurance costs and other costs for property transfer.

1) Not all activities nor the enterprises of the indicated areas are covered. Coverage is presented in the Notes on Methodology of Thematic bulletin Structural Business Statistics 2013

Structural business surveys aim to collect, process and publish statistical data on the structure, competitiveness and characteristics of business entities and their results at different levels of activity.

Number of enterprises covers all enterprises engaged in market production and which are registered in the business register of the population that is the subject of observation.

Number of persons employed is defined as the total number of persons who work in the observation unit (including owners who work, partners working regularly in the unit and unpaid family members working regularly in the unit), as well as persons who work outside the unit to which they belong and which pays them (e.g. sales representatives, delivery personnel).

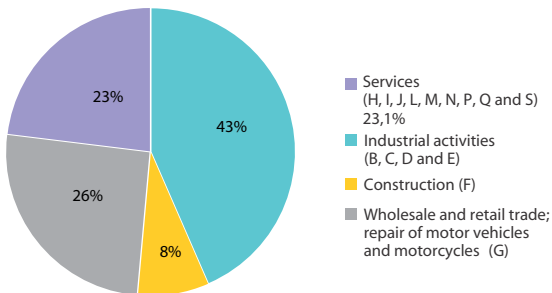

Turnover covers revenues calculated from sales of products, goods and services provided by reporting unit to third parties during the reference period.

Value added at factor cost is the gross income from operating activities after adjustment for operating subsidies and indirect taxes.

Personnel costs are the total remuneration, in cash or in kind, paid by the employer to an employee (regular and temporary employees as well as home workers) in return for work done by the employee during the reference period.

Total purchases of goods and services include the value of all goods and services purchased during the accounting period for resale or consumption in the production process, excluding capital goods the consumption of which is registered as consumption of fixed capital.

Indicators

Indicators are calculated on the basis of the calculated values of the variables.

Turnover per person employed is obtained by dividing the total turnover with a total number of persons employed. This indicator expresses the ability of selling of business unit of specific activity.

Value added per person employed is obtained by dividing the total value added with a total number of persons employed. This indicator is used to measure productivity.

Share of value added on the value of production is obtained by dividing the total added value with a total value of production.

Average personnel costs per employee is obtained by dividing the total personnel costs with number of employees. This indicator shows average personnel costs in certain activity.

Gross operating rate represents the percentage of gross operating surplus in turnover.

TURNOVER PER PERSON EMPLOYED BY ACTIVITY SECTION, KM

VALUE ADDED PER PERSON EMPLOYED BY ACTIVITY SECTION, KM

COMPARATIVE CPI BY GROUPS, 2014

Consumer Price Index allows to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumers needs. Consumer Price Index represents a measure of inflation in state.

It serves for harmonization of salaries and wages by collective contracts, pensions and social welfare payments. It serves as a guarantee the value of recurrent payments in escalator clauses for contractual relationships, it enables a comparison of inflation in country with inflation in other countries as well as a comparison of price movements within particular country and regions, it can also serve as a base for deflating national accounts data and other purposes.

CPI is calculated on the basis of the representative list of products that consists of 604 items in the year 2014. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12 geographical locations (5 towns in Federation of B&H, 6 towns in Republika Srpska and in District Brcko BiH).

In comparison to the year average in 2013, average price level in the year 2014 was lower by 0,9%, due to the average price decrease in groups of Food and non-alcoholic beverages (2,7%), Clothing and footwear (5.1%), Housing, water, electricity, gas and other fuels (0,3%), Furnishing, house equipment and regular maintenance of the household (0,5%) and Transport (1.0%). Other groups recorded price increase: Alcoholic beverages and tobacco (6.9%), Health (0.4%), Communications (2.8%), Recreation and culture (0.4%), Education (0.8%) and Restaurants and hotels (0,2%).

Producer Price Index is a short-term statistical indicator that represents the measurement of change of prices of industrial products produced and sold by enterprises. This statistical indicator serves as the measure of inflation. It can also serve as the indicator of macroeconomical performances, escalator in long-term contracts, deflator for output values, intermediate consumption, and capital consumption in National Accounts, and as an important tool in creating monetary and fiscal policies. PPI in Bosnia and Herzegovina is calculated based on the representative list of products and its producers making a sample of cca.531 producers and 918 products. Each month 1854 prices are collected directly from producers through the unique questionnaire. Since 1/1/2013 published indices are based on the average of 2011.

Production on own account (0) is the production accomplished by the observation unit (enterprise/local unit) on own account by utilizing the purchased or its own raw materials. The observation unit is the owner of a finished product and sells its own products in the market.

Production under contract (1) is contractual agreement between a principal and a contractor. It represents production that is done when a contracted business entity, from raw materials owned by the principal, produces or processes a product defined by the Nomenclature of Industrial Products BIH 2010.

Sale value and value of provision is total value of products produced in own (regular) production (0) or contracted (1), and which were sold (invoiced) in the reporting year.

* Data on type of facilities and construction works are classified according to the Classification of Types of Construction - KVGO BiH, which is based on the current European Classification of Types of Construction CC-Construction Classification.

** The data for 2010 does not include data for Brcko District.

*** Adjusted value for the year 2012, based on the correction made in the Statistical Yearbook of the Institute for Statistics of FBiH.

The annual data on construction works on BiH territory are collected through annual survey for legal entities whose main activity falls in the area of F- Construction, in compliance with the BiH Classification of economic activities BiH 2010, as well as Civil engineering works building units within non-construction entities.

Value of construction works put in place covers: value of work, all built in construction materials and products, value of fuel and energy, the value of usage of construction machinery.

Value of construction works put in place excludes value of its own subcontractors (to avoid double show), VAT, the value of land, supervision and design.

⁷For 2009, BH Telecom has provided only data for mobile network prepaid subscribers.

Telecommunication services include the telecommunication traffic realized in fixed and mobile telephone networks.

The domestic traffic in fixed and mobile network includes the total traffic realized in the own fixed and mobile network, the traffic directed to other fixed and mobile networks.

The international traffic includes the total traffic realized in the fixed and mobile network that starts within and ends outside Bosnia and Herzegovina.

A fixed network is a telecommunications network in which all elements are connected by using wires.

Mobile network is a telecommunications network in which some elements are not connected by using wires. In that way, a connection is possible even when users are physically moving.

FINAL CONSUMPTION OF NATURAL GAS IN BiH, 2014

Gross electricity production is the sum of the electrical energy production by all the generating sets concerned measured at the output terminals of the main generators.

Natural gas comprises gases, occurring in underground deposits, whether liquefied or gaseous, consisting mainly of methane.

Sm³ is standard cubic meter on temperature of 15 °C and under pressure of 760mmHg.

Coal is a fossil fuel. Coal quality is determined by its physical and chemical characteristics.

(0) marks the data lower than 0,5 of the measuring unit

Yield of fruit and grapes is shown as granary yield of standard humidity after deductions all losses during the harvest and transportation.

Trees and vines of bearing age are those trees and vines capable of bearing fruit under standard conditions, regardless of whether or not they beared fruit during reporting year.

Yield per tree or per vine is computed for the bearing trees or vines.

Utilised agricultural area is total area taken up by arable land, permanent grassland (meadows and pastures), permanent crops and kitchen gardens, used by the holding regardless of the type of tenure or whether it is used as common land.

Harvested area is the part of the cropped area that is harvested. It can therefore be equal to or less than the cropped area.

Harvested production is total production, including on-holding losses and wastage, quantities consumed directly on the farm and marketed quantities, indicated in units of basic product weight.

Yield means the harvested production per area under cultivation.

Cordwood	676.636	654.546
Tehnickal wood	155.309	146.722

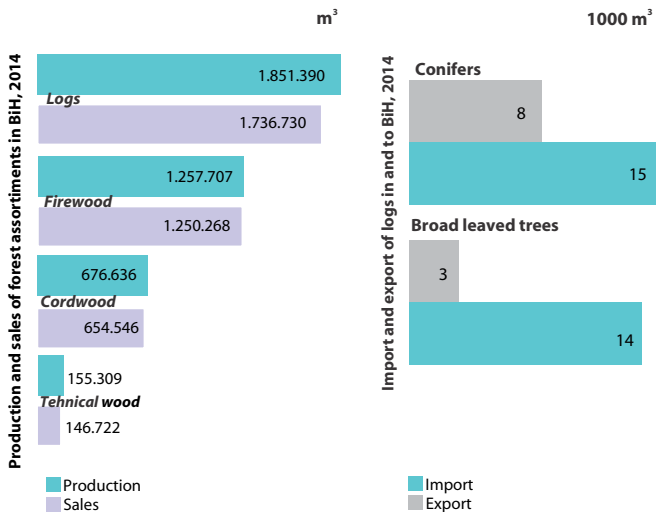

* Data refer to public forests

Production and sales of fores assortments in BiH, 2014

Conifers: Tree species from systematic class of naked-seed plants (Gymnospermae) mostly from Pinaceae tree family. Here belong commercial domestic or foreign tree species from genera Pinus (pine), Picea (spruce), Abies (fir), Larix (larch), Pseudotsuga (Douglas fir) etc.

Broad-leaved trees: Commercial domestic and foreign tree species from systematic class of covered-seed plants (Angiospermae) and genera Quercus (oak), Fagus (beech), noble broadleaf hardwood - genera Fraxinus (ash), Acer (maple), Ulmus (elm), Prunus avium (wild cherry tree) and other hardwood and softwood broadleaves - genera Populus (poplar), Alnus (alder), Carpinus (hornbeam tree), Tilia (lime) etc.

Logs: Forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling)

Technical roundwood: Forestry wood products with favourable physical and mechanical properties whose natural shape, dimensions and properties are used for manufacture of wood products like: pit props, utility poles, construction scaffolding pillars, masts, wooden piles etc and small technical wood like hop or vineyards poles, rods, wooden stakes, wooden sticks, arms, wooden bands etc.

Stack(cord) wood: Wood of bad technical quality, round or split, which is used for chemical processing of pulp, wooden wool, tannin etc.

Fuel wood: Wood used for heating and charcoal manufacture.
