ADMINISTRATIVNA KARTA BOSNE I HERCEGOVINE

ADMINISTRATIVE MAP OF BOSNIA AND HERZEGOVINA

OPĆI PODACI O BOSNI I HERCEGOVINI

GENERAL DATA ABOUT BOSNIA AND HERZEGOVINA

Službeni naziv

Bosna i Hercegovina (BiH)

Official name

Bosnia and Herzegovina (B&H)

Zemljopisna lokacija

Bosna i Hercegovina se nalazi na zapadnom dijelu Balkanskog poluostrva.

Geographical location

Bosnia and Herzegovina is situated in the west part of the Balkan Peninsula.

Pogranične zemlje

Srbija i Crna Gora na istoku, Republika Hrvatska na sjeveru, zapadu i jugu.

Border countries

Serbia and Montenegro on the east, Republic of Croatia on the north, west and south.

Administrativna podjela

BiH je podijeljena na dva entiteta: Federaciju Bosne i Hercegovine (FBiH), Republiku Srpsku (RS) i Brčko Distrikt BiH.

Administrative distribution

B&H is divided on two entities: Federation of Bosnia and Herzegovina (FB&H) and Republika Srpska (RS) and District Brčko BiH.

Entetska struktura

FBiH je administrativno podijeljena na 10 kantona. Kantoni su podijeljeni na općine. Na području FBiH je 79 općina. Republika Srpska je administrativno podijeljena na 62 općine. Grad Brčko je zasebna administrativna jedinica - Distrikt.

Entity's structure

FB&H is administratively divided on 10 cantons. These cantons are divided into municipalities. There are 79 municipalities in FB&H. The Republika Srpska is administratively divided into 62 municipalities. The city Brčko is a separated administrative unit - District.

Površina

Bosna i Hercegovina ukupno pokriva 51 209,2 km²
Kopno 51 197 km²
More 12,2 km²

Surface

*Bosnia and Herzegovina covers totally 51 209,2 km²
Land 51 197 km²
Sea 12,2 km²*

Klima

Pretežito kontinentalna, mediteranska na jugu

Clime

In the majority continental, mediterranean on south

Broj stanovnika

Procjena prisutnog stanovništva (30.06.2016.)
3.511.372.

Number of habitants

*Estimation of current population (30.06.2016.)
3.511.372.*

Struktura stanovnika

Bošnjaci, Srbi i Hrvati i pripadnici ostalih naroda

The structure of population

Bosniacs, Serbs, Croats, and other participants of others nations

Glavni grad

Sarajevo

Capital city

Sarajevo

Službeni jezici

bosanski, srpski i hrvatski (bosanski, i hrvatski se pišu latiničnim pismom, a srpski se piše ciriličnim pismom).

Official languages

Bosnian, Serbian and Croatian (Bosnian, and Croatian are written on Alphabet, and Serbian are written on Cyrillic).

Zvanična valuta

Konvertibilna marka (KM), (1KM = 0,511292 Euro)

Official value

Convertible mark (KM), (1KM = 0,511292 Euro)

PREDGOVOR

Bilten o stanovništvu je publikacija Agencije za statistiku Bosne i Hercegovine, koja na sveobuhvatan način prikazuje službene statističke podatke o stanovništvu na razini Bosne i Hercegovine.

Prema Zakonu o statistici BiH («Službeni glasnik BiH», broj 34/2002) Agencija za statistiku BiH nadležna je da sukladno međunarodno prihvaćenom metodologijom izrađuje i objavljuje statističke podatke za Bosnu i Hercegovinu, a na temelju podataka zavoda za statistiku entiteta, Brčko distrikta BiH i drugih institucija na razini BiH.

Izražavamo zahvalnost Federalnom zavodu za statistiku, Republičkom zavodu za statistiku Republike Srpske i Brčko distriktu BiH koji su omogućili Agenciji za statistiku BiH da na temelju njihovih statističkih podataka pripremi ovu publikaciju.

Na svim primjedbama i sugestijama za poboljšanje slijedećeg Biltena, Agencija za statistiku biti će zahvalna.

FOREWORD

Demographic Statistics Bulletin is a publication of the Agency for Statistics of Bosnia and Herzegovina that contains a comprehensive overview of official statistical data on the population for the territory of the Bosnia and Herzegovina.

According to the Statistical Law of Bosnia and Herzegovina («Official Gazette B&H», number 34/2002) the Agency for Statistics of Bosnia and Herzegovina is in charge «of the production and publishing, of aggregated statistics for Bosnia and Herzegovina in accordance with the International accepted methodology, based on data submitted by the Entity Statistical Institutes.»

We would like to take this opportunity to express our gratitude to the Institute of Statistics of the Federation of Bosnia and Herzegovina, the Republic Institute of Statistics of the Republika Srpska and the District Brčko BiH who provided data for this publication.

All suggestions by users of statistical data, which lead to further improvement of this publication, will be gratefully accepted.

METODOLOŠKA OBJAŠNJENJA

NOTES ON METHODOLOGY

Izvori i metode prikupljanja podataka

Podaci o stanovništvu i kućanstvima prikupljaju se popisima svakih deset godina prema jedinstvenoj metodologiji na cijelokupnom teritoriju Bosne i Hercegovine.

DEFINICIJE

Podaci iz popisa

U Popisu 2013. godine po prvi put je za utvrđivanje ukupnog broja stanovništva primijenjen koncept „uobičajenog stanovništva“. Po ovom konceptu osoba se smatra stanovnikom onog mjesta u kojem sama (u slučaju sramačkog kućanstva) ili s članovima svog kućanstva provodi najveći dio svog vremena, odnosno dnevni odmor, neovisno od toga gdje ima prijavljeno prebivalište. Time su u ukupno stanovništvo određenog mjesta uključene osobe koje su u tom mjestu živjele neprekidno najmanje godinu dana prije kritičnog momenta Popisa, kao i osobe koje su u tom momentu živjele kraće od 12 mjeseci s namjerom da u tom mjestu ostanu najmanje godinu dana.

Kućanstvom se smatra svaka obiteljska ili druga zajednica osoba (višečlano kućanstvo), tj. skupina od dvije ili više osoba koje zajedno zauzimaju cijelu stambenu jedinicu ili njen dio i osiguravaju sebi hranu, a moguće i ostale potrepštine za život. Članovi ove skupine mogu udruživati svoje prihode u manjoj ili većoj mjeri. Kućanstvom se smatra i svaka osoba koja živi sama („sramačko kućanstvo“), tj. osoba koja živi sama u posebnoj stambenoj jedinici ili koja zauzima, kao stanar, posebnu sobu (ili sobe) u nekoj stambenoj jedinici, ali ni s jednim stanarom te stambene jedinice zajednički ne čini dio višečlanog kućanstva.

Podaci prema starosti iskazuju se prema navršenim godinama života. Svaka skupina starosti obuhvata osobe koje su navršile godine života unutar granica intervala. Tako su npr. u skupini 10-14 godina obuhvaćene osobe koje imaju 10 i više godina, ali još nisu navršile 15 godina života.

Podaci o stanovništvu prema zakonskom bračnom statusu su prikupljeni na temelju izjave osoba o njihovom formalno-pravnom bračnom statusu. U Popisu 2013. godine prvi put su prikupljeni i podaci o osobama koje žive u neformalnoj zajednici.

Sources and methods of data collection

The data on population and households have been collected by Census every ten years and by unified methodology on all areas of B&H.

DEFINITIONS

The data of the population census

In the 2013 Census, the concept of "usual residents" was applied for the first time in order to determine the total number of population. Under this concept, a person shall be considered as a resident of the place at which s/he alone (in the case of a one person household) or with members of her/his household spends most of time, that is, daily rest, irrespective of where the person's place of residence is registered. Therefore, the total population of a certain place includes persons who lived in that place for a continuous period of at least one year prior to the Census Critical Moment, and persons who at that particular moment lived there less than 12 months but intend to stay at that place for at least one year.

A **household** shall be any family or other group of persons ("multi-person household"), that is, a group of two or more persons who combine to occupy the whole or a part of a housing unit and to provide themselves with food and possibly other essentials for living. A household shall also be any person who lives alone ("one-person household"), that is, a person who lives alone in a separate housing unit or who occupies, as a lodger, a separate room (or rooms) in a housing unit, but does not join with any of the other occupants of that housing unit to form a part of a multi-person household.

Data by age are expressed by completed years of age. Each age group includes persons who turned the years put as the limits of one interval. For example, the age group of 10-14 years includes all persons who have reached 10 years and more, but have not yet turned 15.

Population data concerning the legal marital status were obtained based on the persons' statements on their formal marital status.

Prema formalno-pravnom kriteriju, stanovništvo staro 15 i više godina je razvrstano prema bračnom statusu u četiri kategorije: nikad oženjen/udata, oženjen/udata, razveden/razvedena i udovac/udovica.

Nikad oženjenim/udatim se smatraju sve osobe koje nikad nisu sklopile brak prema važećim zakonskim propisima.

Oženjenim/udatim se smatraju osobe koje su zaključile brak prema važećim zakonskim propisima i svaki brak upisan u matičnu knjigu vjenčanih. Ukoliko je osoba brak sklopila samo u crkvi ili džamiji, ne smatra se oženjenom/udatom.

Razvedenim se smatraju osobe čiji je brak razveden pravosnažnom presudom nadležnog suda.

Udovcima/udovicama se smatraju osobe čija je bračna zajednica prestala smrću jednog od supružnika, odnosno proglašenjem nestalog bračnog supružnika umrlim.

Vitalna statistika

Živorodenim se djetetom smatra svako dijete koje prilikom rođenja diše i pokazuje druge znakove života, kao što su kucanje srca, pulsiranje pupčane vrpce i nesumljivo kretanje voljnih mišića. Ako dijete ubrzo nakon poroda umre, najprije se registrira kao živorodeno, a zatim kao umrlo dojenče.

Od 2001. godine prema preporukama Skupštine Svjetske zdravstvene organizacije i Međunarodnog udruženja ginekologa (FIGO) **mrtvorodenim** se smatra dijete rođeno, odnosno izvađeno iz tijela majke bez ikakvih znakova života, tj. ako nije disalo niti pokazivalo neki drugi znak života, a nošeno je dulje od 22 sedmice (približno 6 mjeseci) i koje ima porođajnu težinu 500 gr i više. Izbacivanje mrtvog ploda koji je nošen manje od 22 tjedna, smatra se pobačajem (abortusom), bez obzira na to da li je riječ o prirodnom ili namjernom prekidu trudnoće, i ne registrira se u matičnim knjigama, niti su ti podaci iskazani u ukupnom broju mrtvorodenih.

U statistici umrlih jedinica promatranja je svaka umrla osoba.

Umrli je svaka živorodena osoba kod koje je nastupio trajni prestanak svih vitalnih funkcija koje započinju rođenjem bez mogućnosti ponovnog oživljavanja. Ovdje nisu uključeni mrtvorodeni.

According to formal criteria, population aged 15 and over have been grouped by marital status into four categories: never married, married, divorced and widower/widow.

Never married refers to persons who have never entered into marriage under the applicable legal regulations.

Married refers to persons who entered into marriage under the applicable legal regulations and any marriage entered into the register of marriages. If a person got married in a church or mosque only, such person shall not be considered to be married.

Divorced refers to persons whose marriage has been divorced by a binding judgement of a court having jurisdiction thereof.

Widower/Widow refers to persons whose marriage ended by the death of one of the spouses, that is, by declaring a missing spouse dead.

Vital statistics

Live birth is the complete expulsion or extraction from its mother of a product of conception, which, after such separation, breaths or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles. If a product of such a birth dies, it is first registered as live-born and then as died.

As of 2001 following the recommendations of the World Health Assembly and the International Federation of Gynecology and Obstetrics (FIGO), a **stillborn child** is considered a child born or taken out from mother's body who exhibits no signs of life (not breathing, not moving, no heartbeat) where pregnancy has lasted more than 22 weeks (approximately 6 lunar months) and weight at childbirth has been 500 gr. or more. Expulsion of a dead fetus carried less than 22 weeks considered a miscarriage (abortion), irrespective of whether natural or artificial. These cases are not registered in population registers, nor shown in the tables on stillborn.

In statistics of deaths the unit of observation is every deceased person.

A dead person is every live-born person in which there is a permanent disappearance of all evidence of life at any time after live birth has taken place, without capability of resuscitation. Stillbirths are not included here.

Umrlom dojenčadi smatraju se djeca koja su umrla prije navršene prve godine života.

Ustatisticisklopljenihbrakovajedinicapromatranja je svaki zakonito sklopljen brak, a kod statistike razvoda brakova svaki brak koji je pravosnažnom presudom nadležnog suda razveden, poništen odnosno proglašen nevažećim.

Red rođenja djeteta Za određivanje reda rođenja uzimaju se u obzir sva djeca koju je majka rodila, uključujući dakle, i mrtvorodenu djecu, bez obzira da li su rođena u braku ili izvan braka.

Stručna pomoć kod rođenja je pomoć doktora medicine ili diplomirane babice. Kako bi se dobio ukupan broj rođenih sa stručnom pomoći, treba sabrati rođene u zdravstvenoj ustanovi i rođene "na drugom mjestu" sa stručnom pomoći.

Mjesto i utvrđivanje smrti Po ovom obilježju razvrstane su umrle osobe, prema tome je li smrt nastupila u zdravstvenoj ustanovi ili na drugom mjestu (u stanu, polju, itd). Ako je smrt nastupila u zdravstvenoj ustanovi, ujedno se smatra da je smrt utvrđio ljekar, a ako je smrt nastupila izvan zdravstvene ustanove, onda se umrli razvrstavaju još i prema tome je li smrt utvrđio ljekar ili neka druga osoba.

Migracija predstavlja prostornu pokretljivost stanovništva.

Migrant je osoba koja sudjeluje u procesu prostorne pokretljivosti stanovništva (doseljenik, odseljenik).

Unutarnja migracija predstavlja preseljenje osoba unutar teritorija Bosne i Hercegovine, prateći pri tom mjesto iz kojeg je osoba odjavila prebivalište, kao i mjesto novog prebivališta.

Prebivalište je općina ili distrikt u kojem se državljanin nastani s namjerom da tamо stalno živi (Sl.glasnik BiH broj 32/01; član 3. tačka 7).

Starost migranta predstavlja se kao broj navršenih godina života u trenutku njegovog preseljenja. Svaka starosna kohorta obuhvata osobe koje su navršile godine života u granicama intervala.

Postupak izrade temeljnih demografskih pokazatelja

Opća stopa nataliteta predstavlja odnos između broja živorođenih i procijenjenog broja stanovnika, računato na 1000 stanovnika.

Opća stopa mortaliteta predstavlja odnos između broja umrlih i procijenjenog broja stanovnika, računato na 1000 stanovnika.

Dead infants are considered children who died under one year of age.

In statistics of marriages the unit of observation is every marriage that is recognised by law. In statistics of divorces the unit of observation is every marriage that is dissolved or cancelled by a valid decision of the municipal court in charge.

Birth order In establishing birth order all children are taken into account (live births and stillbirths), irrespective of whether born in or out of wedlock.

Medical assistance at birth is the assistance by a medical doctor or a qualified midwife. The total data of live births with medical assistance includes the number of children born in medical facility and those born in "in some other place" but with medical assistance.

Place of death and establishing of death By this characteristic, the deceased person are classified in consideration of whether the person died in health institution or some other place (house, field, etc). If the place of death is health institution it is considered that death is established by a physician. If place of death is some other place then are dead persons classified by whether of death was established by physician or some other person.

Migration represents spatial mobility of population.

Migrant is a person which participates in the process of spatial mobility of population.

Internal migration is relocation of persons within the territory of Bosnia and Herzegovina, thus considering the place of deregistration as well as new place of residence.

The municipality or district in which a citizen is placed with the purpose of permanent living is considered as a permanent residence. (The Official Gazette of B&H, No 32/01, article 3, point 7).

Age of migrants is presented as an age reached at the moment of migration. Each age group includes persons who reached the age within limits of an interval.

Procedure of making basic demographic indicators

General natality rate is the ratio between the number of live-born children and the estimated number of inhabitants per 1000 population.

General mortality rate is the ratio between a number of dead and an estimated number of inhabitants per 1000 population.

Opća stopa prirodnog prirasta predstavlja razliku između stope nataliteta i stope mortaliteta za godinu promatranja.

Stopa smrtnosti dojenčadi predstavlja odnos između broja umrle dojenčadi i broja živorođenih iste godine, računato na 1000 živorođenih.

Stopa nupcijaliteta predstavlja odnos između broja sklopljenih brakova u tijeku jednogodišnjeg razdoblja i procijenjenog broja stanovnika, računato na 1000 stanovnika.

Stopa divorcijaliteta predstavlja odnos između broja razvedenih brakova u tijeku jednogodišnjeg razdoblja i procijenjenog broja stanovnika, računato na 1000 stanovnika.

Temeljni materijal statistike prirodnog kretanja stanovništva priprema se i obrađuje u Federalnom zavodu za statistiku Federacije BiH, Republičkom zavodu za statistiku Republike Srpske i Brčko Distrikta BiH.

General rate of natural increase is the difference between the natality and mortality rates in a given year.

Infant mortality rate is the ratio between the number of dead infants and the number of live-born children in a given year per 1000 population.

Marriage rate is the relation between the number of marriage in one year period and the estimated number of inhabitants per 1000 population.

Divorce rate is the relation between the number of divorces in one year period and the estimated number of inhabitants per 1000 population.

Basic material on demographics statistics is being prepared and processed in the Entity Statistical Institutes and District Brcko.

¹⁾ Specifične stope fertiliteta predstavljaju odnos između broja živorođene djece od majke određene starosti prema 1000 žena te iste starosti

²⁾ Fertility rates represent a ratio between a number of live born children by a mother of certain age by 1000 women of the same age

²⁾ Za godine 1996, 1997. i 1998. stope su rađene na temelju projekcije broja stanovnika za BiH za 1995., koju je uradio Odsjek za stanovništvo Ujedinjenih Naroda, Revizija 1998

²⁾ For the years 1996, 1997 and 1998 the rates are based on the projections on a number of population in B&H for 1995 prepared by the UN Population Division, Revision 1998

³⁾ Za godine 1999, 2000. i 2001. stope su rađene na temelju projekcije broja stanovnika za BiH za 2000., koju je uradio Odsjek za stanovništvo Ujedinjenih Naroda, Revizija 2000

³⁾ For the years 1999,2000 and 2001 the rates are based on the projections on a number of population in B&H for 2000 prepared by the UN Population Division, Revision 2000

⁴⁾ Za godine 2002, 2003, 2004, 2005. i 2006. stope su rađene na temelju procjene broja stanovnika za BiH za 2002., koja je urađena u Agenciji za statistiku BiH

⁴⁾ For years 2002, 2003, 2004, 2005 and 2006 the rates are based on the estimate of a number of population in B&H for 2002 prepared by Agency for statistics of B&H

⁵⁾ Za godine 2007, 2008, 2009, 2010. i 2011. stope su rađene na temelju starosne i spolne strukture iz Ankete o potrošnji kućanstva iz 2007. godine primjenjene na procjenjeni broj stanovnika BiH iz ovog biltena

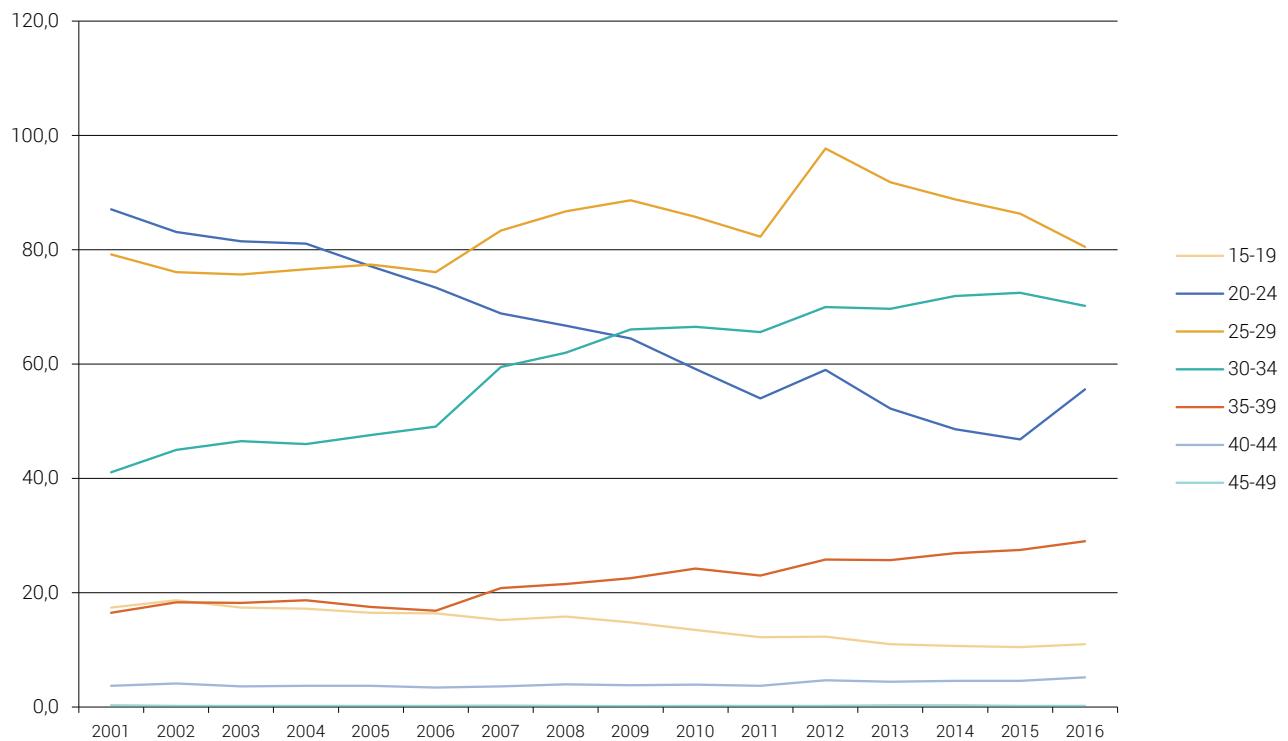

⁵⁾ For the years 2007, 2008, 2009, 2010 and 2011 the rates are based on the estimate on age and sex structure from Household Budget Survey in B&H 2007 applied to the total number of population from this Bulletin

⁶⁾ Za 2012, 2013, 2014. i 2015. stope su rađene na temelju starosne i spolne strukture iz Ankete o potrošnji kućanstva iz 2012. godine primjenjene na procjenjeni broj stanovnika BiH iz ovog biltena, a za 2016. prema prethodnoj procjeni starosne strukture

⁶⁾ For the year 2012, 2013, 2014 and 2015 the rates are based on the estimate on age and sex structure from Household Budget Survey in B&H 2012 applied to the total number of population from this Bulletin, for 2016 based on preliminary estimation of age and sex structure

⁷⁾ Stopa ukupnog fertiliteta predstavlja ukupan broj živorođene djece na jednu ženu

⁷⁾ Total fertility rate represents the total number of live births by a female
