OSNOVNI POJMOVI

Gender (rod) predstavlja društveno uslovljene razlike između žena i muškaraca koje su, za razliku od bioloških i fizioloških razlika, naučene, promjenljive i zavise od različitih faktora: kulture, religije, društvenog i političkog uređenja, ekonomske situacije, klase, starosne dobi, etničke pripadnosti itd.

Gender statistika je oblast koja prožima sva statistička područja. Cilj joj je identifikovanje, prikupljanje, diseminacija i analiza statističkih podataka razvrstanih po spolu, kako bi se shvatilo na koji način gender pitanja utiču na pojedince i društvo općenito. Gender statistika bi trebala predstavljati dio institucionalnih mehanizama potrebnih da se razviju spolno ravnopravne politike. Ova statistika je bitna za monitoring i evaluaciju uspješnosti i efektivnosti razvoja spolno ravnopravnih politika.

Jednakost spolova podrazumijeva jednaka prava, odgovornosti i mogućnosti između žena i muškaraca. Jednakost ne promoviše identičnost žena i muškaraca, već uvažava njihovo pravo na različitost. Ravnopravnost spolova podrazumijeva ravnopravnu vidljivost, ospozobljenost i učešće spolova u svim vidovima javnog i privatnog života.

Ravnopravnost spolova je u suprotnosti sa neravnopravnosću spolova, a ne sa različitošću spolova.

Diskriminacija na osnovu spola predstavlja privilegovanje, isključivanje ili ograničavanje zasnovano na spolu, zbog koga se pojedinkama/cima otežava ili negira priznanje, uživanje ili ostvarivanje ljudskih prava i sloboda.

Direktna spolna diskriminacija je svjestan i promišljen čin (i njegovi rezultati) kojim se favorizuje jedan spol u odnosu na drugi, odnosno, osoba se tretira nepovoljnije u odnosu na drugu osobu, u istoj ili sličnoj situaciji, a na osnovu spola.

Indirektna spolna diskriminacija proizilazi iz društvenih, ekonomskih, političkih, kulturnih ili drugih aspekata koji stavaraju situaciju nejednakosti, odnosno kada prividno neutralna norma, kriterij ili praksa jednaka za sve dovede u nepovoljan položaj osobu jednog spola u poređenju sa osobama drugog spola.

Gender stereotipi proizilaze iz (često zastarjelih) prepostavki o ulogama, sposobnostima i osobinama muškaraca i žena. Oni mogu da uzrokuju materijalne ili psihološke kočnice, koje će ženama ili muškarcima da onemoguće izbor ili će ih onesposobiti da u potpunosti uživaju svoja prava.

Zakon o ravnopravnosti spolova u Bosni i Hercegovini je usvojen u maju 2003. godine. Izmjene i dopune su usvojene 2009. godine, a 2010. godine usvojen je Zakon o ravnopravnosti spolova u Bosni i Hercegovini – prečišćeni tekst („Službeni glasnik BiH“, br. 32/10). Prema općim odredbama, ovim zakonom uređuje se, promoviše i štiti ravnopravnost spolova i garantuje jednakе mogućnosti svim građanima, kako u javnoj, tako i u privatnoj sferi društva, te sprječava direktnu i indirektnu diskriminaciju prema spolu. Puna ravnopravnost spolova garantuje se u svim sferama društva, a naročito u oblasti obrazovanja, ekonomiji, zapošljavanju i radu, socijalnoj i zdravstvenoj zaštiti, sportu, kulturi, javnom životu i medijima, bez obzira na bračno i porodično stanje. Diskriminacija po osnovu spola i spolne orientacije je zabranjena.

Popis stanovništva, domaćinstava i stanova proveden je na teritoriji Bosne i Hercegovine u periodu od 1. do 15. oktobra 2013. godine. Osnovni cilj Popisa je da prikupi podatke o broju i teritorijalnoj distribuciji stanovništva u BiH, kao i njegove demografske, geografske, socio-ekonomske, kulturološke i druge karakteristike, koje će služiti za pripremu i implementaciju razvojnih planova u svim sferama društvenog i ekonomskog života u Bosni i Hercegovini.

BASIC CONCEPTS

Gender presents socially conditioned differences between women and men which are, in contrast to the biological and psychological differences, learned, changeable and dependent on different factors: culture, religion, social and political organization, economic situation, class, age, ethnicity, etc.

Gender statistics is a field that permeates all statistical areas. Its goal is identification, collection, dissemination, and analysis of statistical data disaggregated by sex, in order to understand how gender issues affect individuals and society in general. Gender statistics should represent part of the institutional mechanisms needed to develop gender equality policies. This statistics is important for monitoring and evaluation of the success and effectiveness of the development of gender-equal policies.

Gender equity means equal rights, responsibilities, and opportunities for women and men. Equity does not promote uniformity of women and men, but respects their right to be different.

Gender equality means an equal visibility, qualification, and participation of genders in all aspects of public and private life. Gender equality is an opposition to inequality between genders, rather than the differences between genders.

Gender based discrimination means favouritism, exclusion or restriction on the grounds of gender because of which the recognition, exercising, or enjoyment of a person's human rights and freedoms are impeded or denied.

Direct gender discrimination is a conscious and deliberate act (and its results) that favour one gender over the other, i.e. a person is treated less favourably than another person in the same or a similar situation, only based on gender.

Indirect gender discrimination arises from social, economic, political, cultural, or other aspects creating situation of inequality, i.e. when an apparently neutral provision, criterion, or practice equal for all leads a person to disadvantaged position compared to the persons of the other gender.

Gender stereotypes come from (often-outdated) assumptions about the roles, capabilities, and characteristics of men and women. They can cause material or psychological brakes, which will deny choices to women or men or will incapacitate them to fully enjoy their rights.

The Law on Gender Equality in Bosnia and Herzegovina was adopted in May 2003. Amendments to the Law were adopted in 2009, and in 2010 The Law on Gender Equality in Bosnia and Herzegovina – consolidated text („Official Gazette of Bosnia and Herzegovina”, no. 32/10) was adopted. According to the General Provisions, this law governs, promotes and protects gender equality and guarantees equal opportunities for all citizens in both public and private spheres of society, and prohibits direct and indirect discrimination on the grounds of gender. Full gender equality is guaranteed in all sectors of society, particularly in the fields of education, economy, employment, and labour, social and health care, sport, culture, public life and media, irrespective of marital or family status. Discrimination based on gender and sexual orientation is prohibited.

The Census of Population, Households and Dwellings was conducted on the territory of Bosnia and Herzegovina in the period 1-15 October 2013. The main goal of the Census is to collect data on the number and territorial distribution of population in BiH, as well as its demographic, geographic, socio-economic, cultural and other characteristics, which will serve for the preparation and implementation of development plans in all spheres of social and economic life in Bosnia and Herzegovina.

PREDGOVOR

Agencija za statistiku Bosne i Hercegovine u kontinuitetu objavljuje publikaciju "Žene i muškarci u BiH", koja obuhvata podatke iz različitih statističkih i drugih oblasti razvrstane po spolu. Podaci daju kratak prikaz položaja žena i muškaraca u bosanskohercegovačkom društvu.

Kroz ovu publikaciju, Agencija za statistiku BiH nastoji dati svojevrstan doprinos u postizanju jednakosti i ravnopravnosti među spolovima.

Publikacija se sastoji od sljedećih poglavlja: stanovništvo, zdravstvo i mortalitet, obrazovanje, nauka i istraživanje, zaposlenost, socijalna zaštita, životni standard, kriminalitet, politička vlast i javna uprava. U njoj su dati tabelarni i grafički prikazi podataka, a pored apsolutnih podataka prikazanih po spolu, data je i spolna raspodjela prikazana u procentima. U ovogodišnjoj publikaciji se nastoji ostvariti i bolji vizuelni prikaz podataka, pa su određeni podaci prikazani kroz slike i infografiku. Ova publikacija može poslužiti kao izvor informacija svim korisnicima zainteresovanim za položaj žena i muškaraca i za jednakost spolova u Bosni i Hercegovini.

Zakon o ravnopravnosti spolova u Bosni i Hercegovini donesen je 2003. godine. Zakon uređuje, promoviše i štiti jednakopravnost spolova i garantuje jednakе mogućnosti svim građanima, kako u javnoj, tako i u privatnoj sferi društva, te sprječava direktnu i indirektnu diskriminaciju zasnovanu na spolu.

U članu 18. ovog zakona stoji da svi statistički podaci i informacije koji se prikupljaju, evidentiraju i obrađuju u državnim tijelima na svim nivoima, javnim službama i ustanovama, državnim i privatnim preduzećima i ostalim subjektima, moraju biti iskazani po spolu.

Većina podataka prikazanih u ovoj publikaciji su rezultat istraživanja koje provodi Agencija za statistiku BiH, kao i postojeće statističke dokumentacije, te za njih nije naveden izvor podataka. Manji dio podataka je preuzet iz drugih državnih i entitetskih institucija, čije je ime navedeno ispod tabele i grafikona.

Nadamo se da će publikacija doprinijeti unaprijeđenju spolne ravnopravnosti i poboljšanju položaja žena u Bosni i Hercegovini.

Mr.sc. Velimir Jukić, direktor

FOREWORD

Agency for Statistics of Bosnia and Herzegovina in continuity is publishing the bulletin "Women and Men in BiH", which includes data from a variety of statistical and other areas categorized by gender. The data briefly present the status of women and men in BiH society. Through this publication, the Agency for Statistics of BiH seeks to give a specific contribution to the achievement of equality between the sexes.

The bulletin consists of the following chapters: population, health and mortality, education, research and development, employment, social welfare, living standard, crime, political power, General elections 2014, public administration and violence against women. The bulletin contains tabular and graphical presentation of data, and in addition to absolute data disaggregated by sex, a percentage of the sex distribution is presented as well. This publication aims to achieve a better visual presentation of data, so the particular data are presented through pictures and infographics. This bulletin can serve as a source of information for all users interested in the status of women and men and gender equality in Bosnia and Herzegovina.

The Law on Gender Equality in Bosnia and Herzegovina is passed in 2003. The law regulates, promotes and protects gender equality and guarantees equal opportunities for all citizens, both in the public and private domain of society, and preventing direct and indirect discrimination based on gender.

Article 18 of the Law states that all statistical data and information collected, recorded and processed in state bodies at all levels, public services and institutions, public and private corporations and other entities, must be presented by gender.

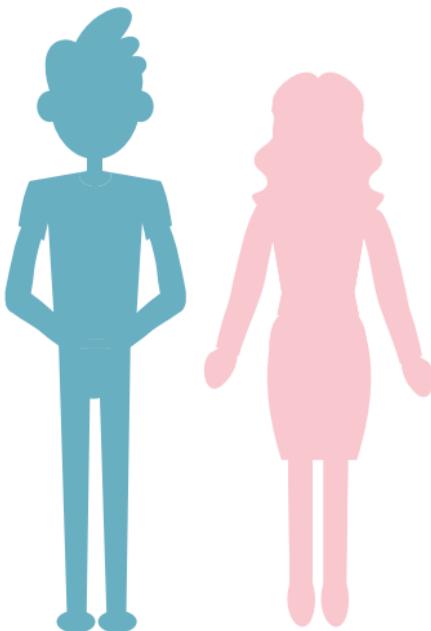

Most data presented in this publication are the result of the survey carried out by the Agency for Statistics of BiH, as well as existing statistical documentation, and for them there is no specified data source. A small portion of the data is taken from other state and entity institutions whose name is listed under the tables and graphs.

We hope that this publication will contribute to improvement of gender equality and advancement of status of women in Bosnia and Herzegovina.

Mr.sc. Velimir Jukić, Director

STANOVNIŠTVO PREMA POPISU 2013.
POPULATION BY CENSUS 2013

Stanovništvo u BiH, prema spolu u 2013.
Population in BiH, by sex in 2013

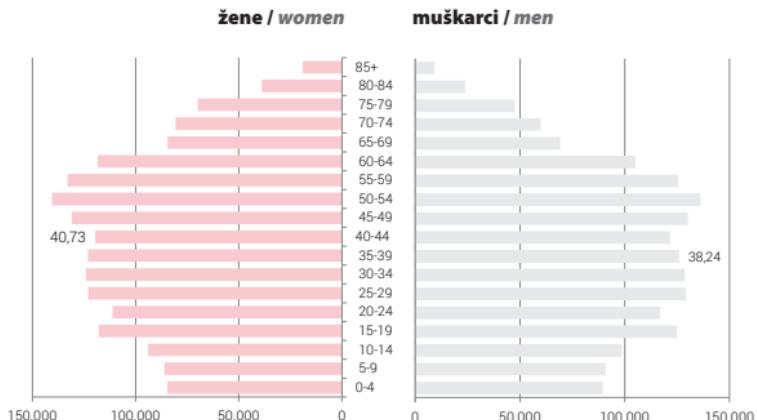

49,1%
1 732 270

50,9%
1 798 889

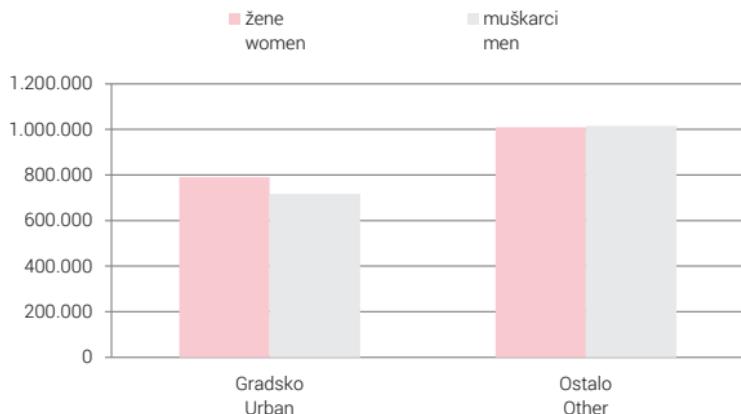

Prema Popisu stanovništva, domaćinstava i stanova, provedenom u Bosni i Hercegovini u periodu od 1.10. do 15.10.2013. godine, u BiH je živjelo 3.531.159 osoba, od čega 1.798.889 žena i 1.732.270 muškaraca.

According to the Census of Population, Households and Dwellings, conducted in BiH in the period from 1-15 October 2013, there is 3,531,159 people living in BiH, out of which 1,798,889 are women, and 1,732,270 are men.

Stanovništvo u BiH, prema spolu, petogodištima i prosječnoj starosti, u 2013. / Population in BiH, by sex, five-year age group and average age, in 2013

Stanovništvo u BiH prema spolu i tipu naseljenog mjesta u 2013. / Population in BiH by sex and type of settlement in 2013

Koefficijent maskuliniteta prema starosnim grupama u 2013. *Masculinity coefficient by age groups in 2013*

Koefficijent maskuliniteta predstavlja broj muškaraca na 100 žena.

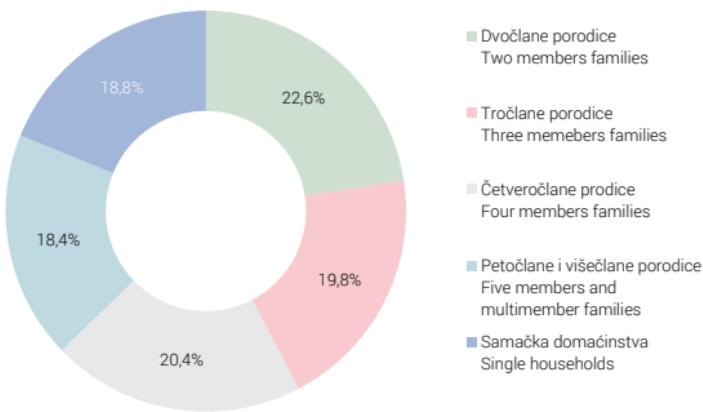

Prema podacima Popisa stanovništva iz 2013. godine, uočava se najveća stopa maskuliniteta u starosnoj grupi od 15 do 19 godina starosti, gdje na 100 žena dolazi skoro 106 muškaraca. Idući prema starijoj životnoj dobi, stopa maskuliniteta ima tendenciju opadanja, pa od 45 godina i više, u populaciji ima više žena nego muškaraca, te od tog perioda koefficijent maskuliniteta naglo opada, a najniži je u starosnoj grupi 85+ i bilježi vrijednost od 47,6, što znači da u najkasnijoj životnoj dobi, na 100 žena dolazi oko 48 muškaraca.

Masculinity coefficient is a relation between the number of men per 100 women.

According to the 2013 Population Census, the highest masculinity rate is noted in the age group of 15-19 years, where there is almost 100 men per 100 women. Approaching to the older age group, the masculinity rate has a tendency to decrease, and from 45 years or more, there are more women than men, and from that age, the masculinity coefficient decreases sharply. The lowest is in the age group 85+ where recorded value is 47,6, which means that in the latest age, there is 48 men per 100 women.

Struktura porodičnih i neporodičnih domaćinstava prema broju članova

Structure of family and non-family households per number of persons

Od ukupnog broja domaćinstava, 46% ih živi u gradskom tipu naseljenog mjesto, dok 54% domaćinstava živi u ruralnim dijelovima države. Prosječan broj članova domaćinstva je 3,04 člana.

Out of total number of households, 46% live in the urban type of settlement, and 54% live in the rural part of the state. Average number of household members is 3,04.

Ukupna stopa nepismenosti u BiH, prema Popisu iz 2013. godine bila je 2,82. Stopa nepismenosti za muškarce je iznosila 0,79, a za žene čak 4,76.

The total illiteracy rate in BiH, according to the 2013 Census, was 2.82. The rate of illiteracy for men was 0.79, and for women 4.76

Najveća stopa nepismenosti je u grupi starijih žena i iznosi 5,29 za žene starosti 55-69 godina i čak 25,85 za žene starije od 70 godina, što znači da je svaka četvrt žena strarija od 70 godina u BiH nepismena.

The highest illiteracy rate is in the group of older women, and it is 5.29 for women aged 55-69, and 25.85 for women over 70, which means that every fourth woman older than 70 years in BiH is illiterate.

Struktura nepismenih osoba prema starosnim grupama i spolu u BiH, u 2013.

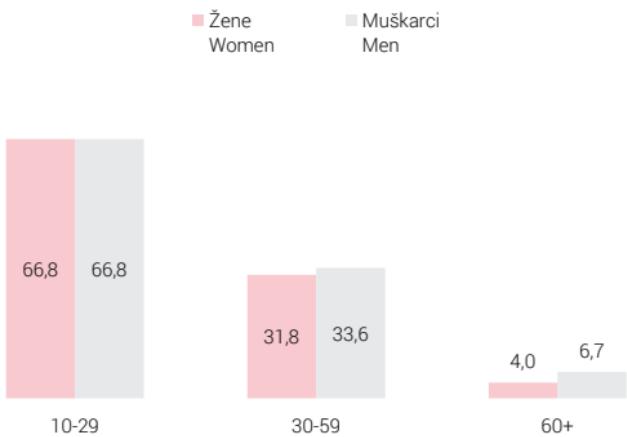

Structure of illiterate persons by age groups and sex in BiH, in 2013

	Žene Women	Muškarci Men	(%)
10-24	1,32		9,36
25-39	1,97		13,20
40-54	4,36		14,95
55-69	22,92		19,60
70+	69,44		42,89

Od ukupnog broja nepismenih žena u BiH, prema Popisu stanovništva iz 2013. godine, više od 90% su žene od 55 i više godina života.

Out of the total number of illiterate women in BiH, according to 2013 Census, more than 90% are women aged 55 and older.

Stopa računarske pismenosti stanovništva starog 10 i više godina, prema starosnim grupama i spolu
Computer literacy rates of population aged 10 years and over by age groups and sex

Računarska pismenost podrazumijeva znanje rada na računaru, odnosno sposobnost osobe da koristi osnovne računarske aplikacije u izvršenju svakodnevnih zadataka (obrada teksta, izrada tabela, korištenje e-maila i interneta). **Stopa računarske pismenosti** predstavlja procenat stanovništva koji su računarski pismeni u ukupnom stanovništvu te starosne grupe i spola.

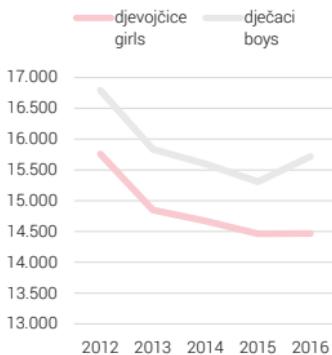

Computer literacy is the ability to use computers efficiently. It is the ability of a person to use basic computer applications in everyday work (word processing, creating tables, using e-mail, and the Internet). **The rate of computer literacy** is the percentage of the computer literate population out of total population of the particular age group and sex.

Živorođeni Live births

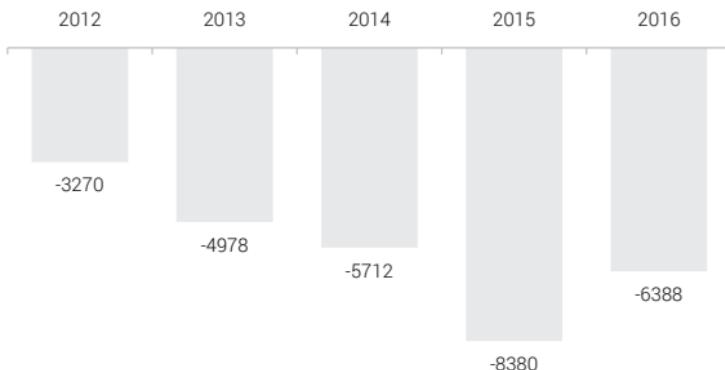

Umrli Deaths

U BiH se svake godine rodi oko 3-4% više muške djece, a gotovo u istom tom procentu umire više muškaraca u odnosu na žene.

Every year in BiH, about 3-4% more male children are born in BiH, and almost in the same percentage, comparing to women, more men die.

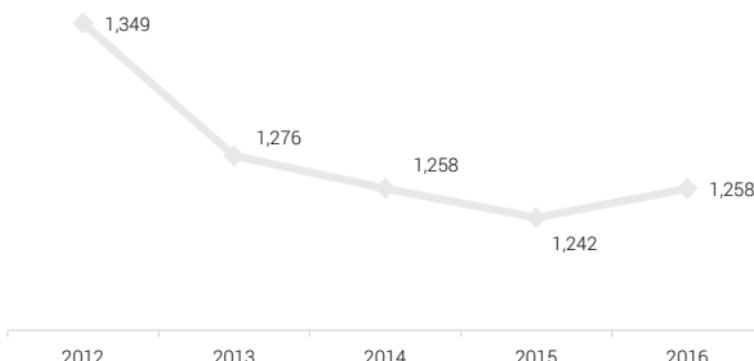

Prirodni priraštaj stanovništva BiH *Natural change of BiH population*

Prirodni priraštaj predstavlja razliku između broja rođenih i broja umrlih u godini posmatranja i može biti pozitivan i negativan.
Od 2009. godine u BiH postoji trend negativnog prirodnog priraštaja, što znači da u referentnoj godini umre više osoba nego što ih se rodi.

Natural change is a difference between the number of live born and the number of dead persons in a given period, and it can be positive or negative. Since 2009, there has been a trend of negative natural change in BiH. It means that in the reference year more people die than they are born.

Stopi ukupnog fertiliteta u BiH Total fertility rates in BiH

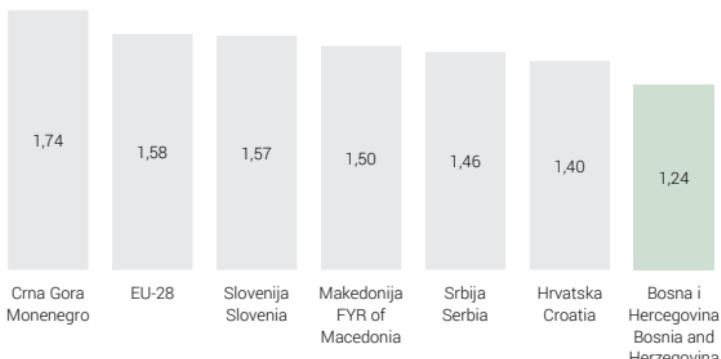

Stopa ukupnog fertiliteta je broj živorođenih na jednu ženu u njenom reproduktivnom životu.

Total fertility rate represents the total number of live births by a woman.

Stopi ukupnog fertiliteta u pojedinim zemljama regionala i prosjek EU-28 u 2015.

Unutrašnje migracije u Bosni i Hercegovini u 2016. *Internal migration in Bosnia and Herzegovina in 2016*

Podaci se odnose na unutrašnja migraciona kretanja stanovništva Bosne i Hercegovine u 2016. godini. Obuhvaćeni su svi stanovnici, po spolnoj i starosnoj strukturi, koji su registrovali promjenu svog prebivališta, uključujući i kretanja između entiteta i Brčko distrikta.

U BiH je broj doseljenih/odseljenih stanovnika u 2016. godini iznosio 32.775, od čega je bilo 18.987 (57.9%) žena i 13.788 (42.1%) muškaraca.

Najveći broj doseljenih/odseljenih žena spada u kategoriju od 20 do 29 godina starosti, što je oko 1/3 ženske populacije u ukupnim migracionim kretanjima, dok je broj muškaraca koji migriraju unutar BiH u ovoj starosnoj kategoriji (koja je ujedno i kategorija unutar koje se odvija najveći broj migracija) nešto manji i iznosi oko 20% .

Data relates to internal migrations of the population in Bosnia and Herzegovina in 2016. All population is included, by sex and age structure, which registered the change of their residence, including migrations between the entities and Brcko District.

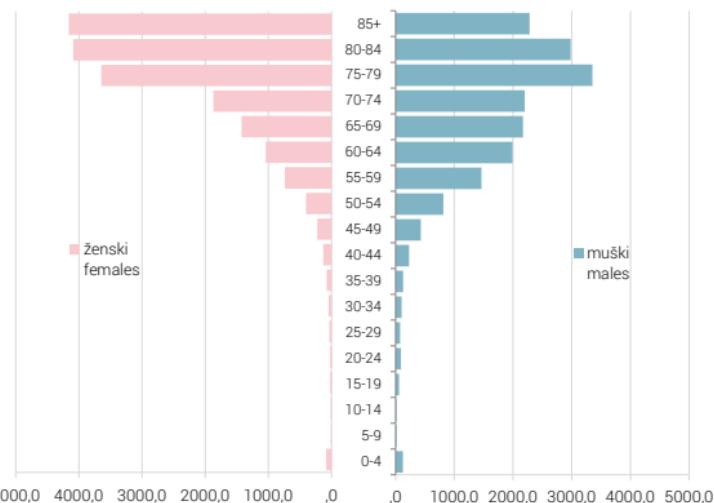

In BiH, the number of immigrants/emigrants in 2016 was 32.775, out of which there were 18.987 (57.9%) women, and 13.788 (42.1%) men.

The largest number of female immigrants/emigrants falls into the category of 20-29 years of age, which is about 1/3 of the female population in the total migration flows, while the number of men who migrate within BiH in this age category (which is the category with the highest number of migrations) is slightly smaller, and is around 20%.

Source: *Labor Force Survey in BiH, 2016*

Rano napuštanje škole je indikator koji predstavlja odnos između osoba u dobi 18-24 godine koje su najviše završile osnovno obrazovanje, a nisu imale nikakvo učešće u obrazovanju ili obukama u četiri sedmice prije provođenja Ankete o radnoj snazi.

U periodu od 2010. do 2016. godine, stopa ranog napuštanja škole je bila veća kod žena.

Early leaving from education and training is defined as the percentage of the population aged 18–24 with at most lower secondary education who were not in further education or training during the four weeks preceding the Labor Force Survey.

The indicator provides a measure of the youth population most at risk of being marginalised from education and training.

Mlade osobe koje nisu zaposlene, niti uključene u obrazovanje i obuku prema spolu

Young persons not in employment, education or training (NEET) by sex

Osobe koje nisu zaposlene, niti uključene u obrazovanje i obuku

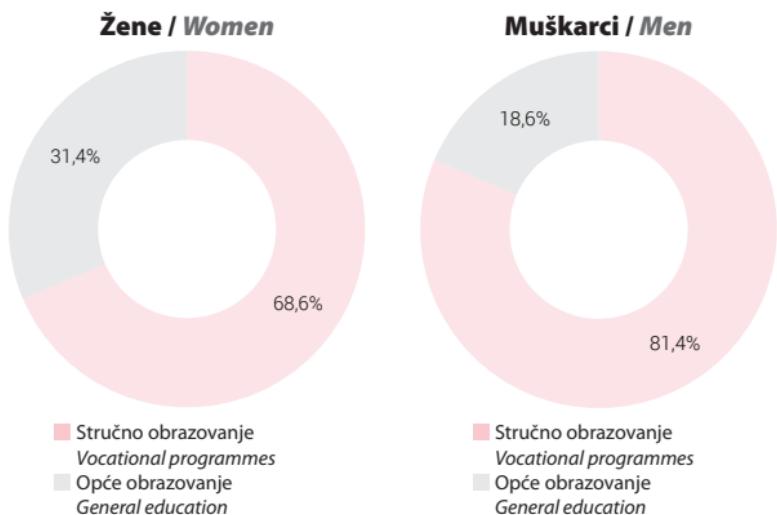

je indikator koji obuhvata mlade osobe dobi 15-24 godine koje nisu bile zaposlene, ali ni uključene u obrazovanje ili obuku u četiri sedmice prije provođenja Ankete o radnoj snazi. Podatak je izražen kao procenat od ukupnog stanovništva iste starosne grupe i spola.

Ovaj indikator ukazuje na mlado stanovništvo koje ima najveći rizik od marginalizacije na tržištu rada, kao i od neadekvatnog iskorištavanja njihovih potencijala.

Persons not in employment, education or training (NEET) is the indicator which provides information on young people aged 15–24 who were not employed nor included in education or training during the four weeks preceding the Labour Force Survey. Data is expressed as a percentage of the total population of the same age group and gender.

This indicator provides a measure of the youth population most at risk of being marginalised from the labour market and underutilising their skills.

Učenici prema vrsti srednjeg obrazovanja u 2016. Students by type of secondary education in 2016

Stručno obrazovanje je namijenjeno sticanju specifičnih znanja, sposobnosti i vještina za određenu vrstu zanimanja. Stručno obrazovanje uključuje stručne, tehničke, vjerske i umjetničke škole. **Opće obrazovanje** uključuje gimnazije.

Od ukupnog broja srednjoškolaca, svaka treća učenica i svaki peti učenik su uključeni u opće srednje obrazovanje. Na ukupnom nivou, u 2016. godini je 75% srednjoškolaca pohađalo stručne srednje škole i taj trend je konstantan kroz godine.

Vocational education is designed for learners to acquire specific knowledge, skills and competences about a particular occupation or trade. Vocational education includes vocational, technical, religious and art secondary schools. **General education** includes grammar schools.

Out of total number of pupils in secondary education, every third girl and every fifth boy attend general secondary education. In 2016, out of total, 75% of secondary school pupils attended vocational secondary education and the trend is constant over the years.

Postignuće u visokom obrazovanju prema spolu

Tertiary education attainment by sex

Postignuće u visokom obrazovanju i rodni jaz u EU zemljama i BiH u 2016.

Tertiary education attainment and gender gap in EU countries and BiH in 2016

Izvor: Eurostat

Source: Eurostat

Postignuće u visokom obrazovanju je indikator koji se definiše kao procenat osoba starosti 30-34 godine koje su uspješno završile tercijarno obrazovanje (fakultete/akademije/univezitete).

Rodni jaz u postignuću u visokom obrazovanju predstavlja razliku između postignuća muškaraca i žena. U BiH je on -12,8, što znači da je za 12% više žena završilo srednje obrazovanje u odnosu na muškarce.

Prema podacima Eurostata, u 2016. godini, 39,1% stanovništva dobi 30-34 godine, u 28 zemalja članica Evropske unije (EU-28) je završilo tercijarno obrazovanje. Neke od zemalja čije je postignuće u visokom obrazovanju niže od 30% su: Rumunija, Italija, Hrvatska i Malta, te Makedonija i Turska. Prema Strategiji Evropa 2020, cilj je da do 2020. godine proporcija osoba dobi 30-34 godine sa završenim tercijarnim obrazovanjem bude najmanje 40%.

Posmatrajući spolnu raspodjelu, žene u EU-28 su već dostigle cilj Strategije Evropa 2020 u 2012. godini, sa procentom od 40.2%, dok muškarci u ovoj starosnoj grupi zaostaju za ženama, sa procentom završenog tercijarnog obrazovanja od 34.4% u 2016. godini. Učešće muškaraca u tercijarnom obrazovanju u Evropi se povećalo u posljednjih 10 godina, ali taj rast je sporiji u odnosu na žene, što dovodi do većeg jaza među spolovima.

Tertiary education attainment is the indicator defined as percentage of the population aged 30-34 who have successfully completed tertiary education (faculties/academy/university).

Gender gap in tertiary education attainment presents a difference between tertiary attainment of men and women. In BiH the gap is -12,8%, which means that 12.8% more women completed tertiary education.

According to Eurostat data, in 2016, 39.1% of the population aged 30-34 in the EU-28 had completed tertiary education. Some of countries with tertiary education attainment below 30% are: Romania, Italy, Croatia and Malta, as well as FYR Macedonia and Turkey. Europa 2020 strategy aim that by the year 2020 the proportion of 30-34 year-olds with tertiary educational attainment should be at least 40%.

Observing gender distribution in tertiary education, women in the EU-28 have already reached the goal of the Europe 2020 Strategy in 2012, with a percentage of 40.2%, while men in this age group are lagging behind the women, 34.4% of men completed tertiary education in 2016. The participation of men in tertiary education in Europe has increased over the last 10 years, but at a slower pace compared to women, leading to a greater gender gap.

Stopa nezaposlenosti <i>Unemployment rate</i>	27,7	25,4	20,5	30,7	30,0	23,1	25,8	22,5	18,9

Anketa o radnoj snazi je redovno istraživanje koje provodi Agencija za statistiku BiH. Anketa se provodi jednom godišnje, s ciljem prikupljanja podataka o osnovnim karakteristikama radno sposobnog stanovništva, na osnovu kojih se vrši procjena ukupne radne snage u zemlji. Anketom za 2017. godinu je obuhvaćeno 10.629 domaćinstava. U upitnik za anketiranje 2017. godine uveden je novi set pitanja za radnu aktivnost u cilju dobijanja kvalitetnijih informacija o radnoj aktivnosti anketiranih osoba, što je dijelom uticalo na porast podataka zaposlenosti, kao i smanjenje podataka nezaposlenosti, odnosno smanjenje stope aktivnosti i nezaposlenosti, te povećanja stope zaposlenosti u odnosu na podatke iz 2016. godine.

Labour Force Survey is a regular survey conducted by the Agency for Statistics of BiH. The Survey is conducted annually with the aim to compile data on basic characteristics of the working age population, based on which the total labour force in the country is estimated. The 2017 Survey covered 10.629 households. In 2017, a new set of questions on labour activity was introduced in the survey questionnaire in order to obtain more quality data on the activity of respondents, which partly affect the increase of employment data and decrease of unemployment data, i.e. decreasing activity and unemployment rates and increasing employment rates in comparison to the 2016 data.

Mjere aktivnosti stanovništva prema spolu u 2017. Measures of the activity of the population by sex in 2017

Stopa aktivnosti predstavlja odnos radne snage (ekonomski aktivno stanovništvo) i radno sposobnog stanovništva (sve osobe stare 15 i više godina).

Stopa zaposlenosti predstavlja odnos zaposlenih i radno sposobnog stanovništva.

Stopa nezaposlenosti predstavlja odnos nezaposlenih i radne snage (ekonomski aktivno stanovništvo).

Activity rate represents a ratio between labour force and working age population.

Employment rate represents a ratio between employed and working age population.

Unemployment rate represents a ratio between unemployed persons and labour force.

Radno sposobno stanovništvo obuhvata sve osobe koje imaju 15 i više godina, podijeljene u dvije glavne kategorije: radnu snagu i ekonomski neaktivno stanovništvo.

Radnu snagu ili aktivno stanovništvo čine zaposlene i nezaposlene osobe.

Neaktivno stanovništvo čine sve osobe koje imaju 15 i više godina i koje u referentnoj sedmici nisu radile, te koje tokom četiri sedmice nisu poduzimale nikakve radnje sa ciljem traženja posla, kao i osobe koje nisu spremne početi raditi u naredne dvije sedmice ako bi im posao bio ponuđen.

Working age population includes all persons of 15 years of age or older, divided into two basic categories. Labour force and economically inactive population.

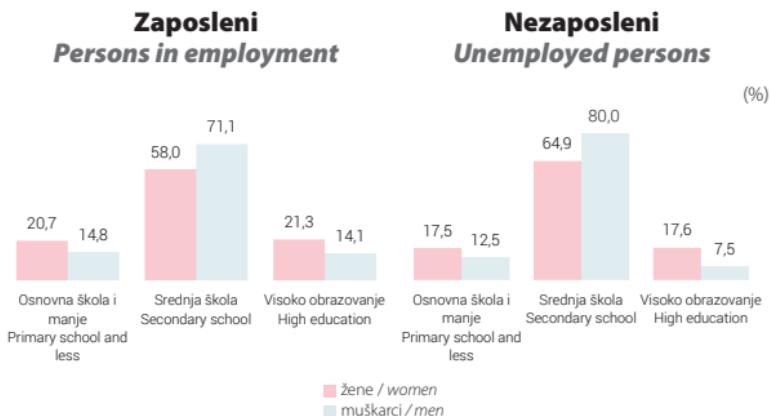

Labour force, or the active population, is composed of the employed and unemployed population.

Inactive population are all persons of 15 years of age or older who were not employed during the reference week and who during the four weeks did not take any actions seeking for employment, as well as persons who are not ready to start working within two subsequent weeks should they be offered an employment.

Korisnik socijalne zaštite je svaka osoba koja je u toku izvještajne godine jednom ili više puta koristila određene oblike i mјere socijalne zaštite i usluge socijalnog rada.

Maloljetni korisnici socijalne zaštite su podijeljeni u slijedeće grupe: maloljetnici ugroženi porodičnom situacijom, maloljetnici ometeni u fizičkom i psihičkom razvoju, maloljetnici s poremećajima u ponašanju i ličnosti, psihički bolesne osobe, te maloljetnici u stanju različitih potreba socijalne zaštite.

Punoljetni korisnici socijalne zaštite su podijeljeni u slijedeće grupe: korisnici subvencioniranih troškova (stanarine, grijanje, sahrane), fizički i psihički ometene osobe, te osobe koje nemaju dovoljno prihoda za izdržavanje, kao i materijalno neosigurane osobe.

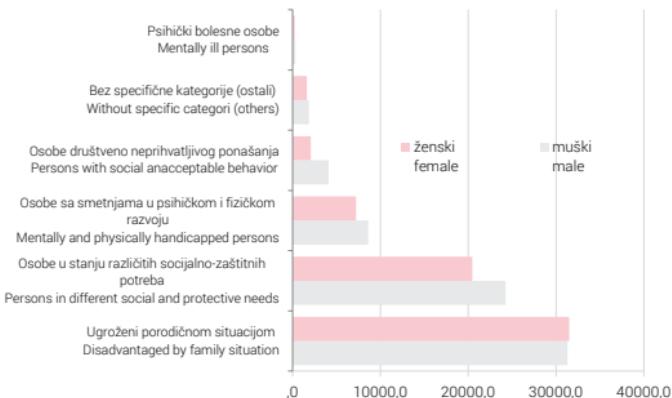

Social welfare beneficiary is every person who has used certain forms and measures of social welfare and social work services, once or several times during the reference year.

Minor social welfare beneficiaries are divided in following groups: minor beneficiaries disadvantaged by family situation, physically and mentally handicapped minors, minors with behavioural and personality disorders, mentally ill persons and minor beneficiaries in need of different social and protective services.

Adult social welfare beneficiaries are divided in following groups: beneficiaries of subventions (for rents, heating, funeral), physically and mentally disabled and persons not having a sufficient income to support themselves.

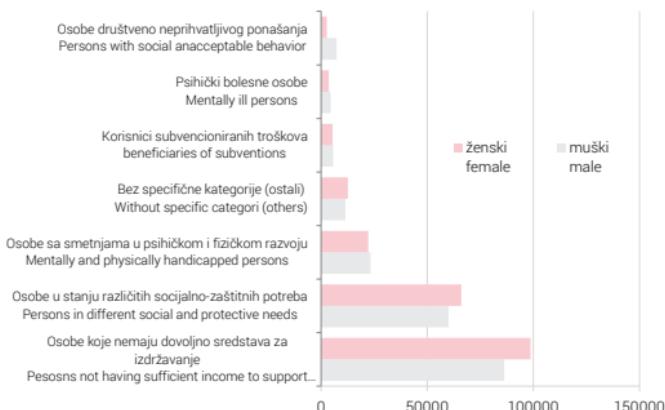

Maloljetni korisnici socijalne zaštite prema grupama kategorija i spolu u 2016.

Minor beneficiaries of social welfare by type of category and sex in 2016

Punoljetni korisnici socijalne zaštite prema grupama kategorija i spolu u 2016.

Adult beneficiaries of social welfare by type of category and sex in 2016

Prema izmjenama i dopunama Izbornog zakona BiH i njegovim usklađivanjem sa Zakonom o ravnopravnosti spolova 2013. godine, osigurana kvota od 40% za manje zastupljeni spol na izbornim listama političkih partija. I pored toga, zastupljenost žena (u ovom slučaju manje zastupljenog spola) u politici je znatno manja. U mandatnom periodu od 2014. do 2018. godine, procenat žena u Predstavničkom domu Parlamentarne skupštine BiH je 23,8%, dok je u Domu naroda zastupljenost žena bila 13,3%.

According to the amendments of the BiH Election Law and its alignment with the Law on Gender Equality from 2013, 40% quota for less represented sex on the electoral lists of political parties was secured. Nevertheless, the representation of women (in this case less represented gender) in politics is considerably smaller. In the mandate period 2014-2018, the percentage of women in the House of Representatives of the Parliamentary Assembly of BiH is 23.8%, while the percentage of women in the House of Peoples is 13.3%.

U poređenju sa 186 zemalja svijeta, a prema podacima iz januara 2017. godine, BiH zauzima 67. mjesto u udjelu žena na ministarskim pozicijama (22%), odnosno 78. mjesto u udjelu žena u Parlamentu (23,8%).

Comparing to 186 countries in the world, according to data from January 2017, BiH holds 67th place when speaking of the proportion of women in ministerial positions (22%), or 78th place when speaking of the proportion of women in Parliament (23.8%).
