### Administrative structure of Bosnia and Herzegovina (BiH):

The Federation of Bosnia and Herzegovina (FBiH), Republika Srpska (RS) i Brčko District BiH (BD BiH).

The capital of Bosnia and Herzegovina is Sarajevo.

The Federation of Bosnia and Herzegovina is administratively divided into 10 cantons, and cantons are subdivided into municipalities and cities. Republika Srpska is administratively divided into municipalities and cities. Brčko District of BiH is a separate administrative unit.

In BiH there are three National parks and two Nature parks. National parks are Sutjeska, Kozara and Una. Nature parks are Hutovo Blato and Blidinje.

In the 2013 Census, the concept of “usual residents” was applied for the first time in order to determine the total number of population. Under this concept, a person shall be considered as a resident of the place at which s/ he alone (in the case of a one-person household) or with members of her/ his household spends most of time, that is, daily rest, irrespective of where the person’s place of residence is registered. Therefore, the total population of a certain place includes persons who lived in that place for a continuous period of at least one year prior to the Census Critical Moment, and persons who at that particular moment lived there less than 12 months but intend to stay at that place for at least one year.

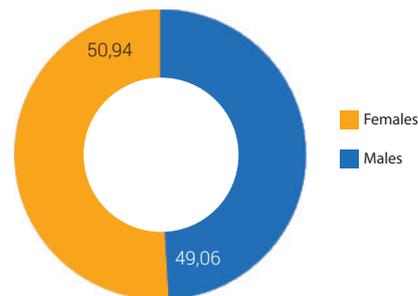

For the census conducted earlier in our country, before 1991, the official results referred to the so-called resident population, i.e. population who reside in the territory of Bosnia and Herzegovina, regardless of whether at the critical moment of the census, the persons were present at the place of residence or were temporary absent, in the country or abroad, due to some other reasons.

In the Population Census in 1961 and 1971 as a resident population persons were registered at the place where they worked at the Census moment, while in the 1981 and 1991 Census these persons were enumerated as a resident population in the places where their families lived.

**Natural change** is the difference (surplus or deficit) between the number of livebirths and the number of deaths in a given period.

**Births and deaths:** according to the legal regulations on registration, events of births and deaths are obligatory registered in population registers.

**A liveborn child** is every child that breathes at birth or shows any other signs of life (beating of the heart, pulsation of the umbilical cord, definite movements of voluntary muscles).

### Total fertility rate in BiH 2007-2017

**The total fertility rate (TFR)** is the number of children that would be born alive to a woman during her childbearing years, if she were to pass through all her childbearing years conforming to the age-specific fertility rates of a given year.

**Stillborn** is considered a child delivered, or extracted from its mother displaying no signs of life, that is if it did not breath or display any other signs of life, and was carried longer than 22 weeks (approximately 6 months) with more than 500 g birthweight.

**Consumer Price Index** allows to measure the consumer price inflation that is the rate of change of the consumer prices of goods and services purchased by the households through monetary transactions in the economic territory of Bosnia and Herzegovina for products that directly satisfy consumer's needs. Consumer Price Index represents a measure of inflation in state.

CPI is calculated on the basis of the representative list of products that consists of 601 items in the year 2016. Each month over 21 000 prices are being collected in accordance with defined sample of outlets on 12 geographical locations (5 towns in Federation of BiH, 6 towns in Republika Srpska and in District Brčko BiH).

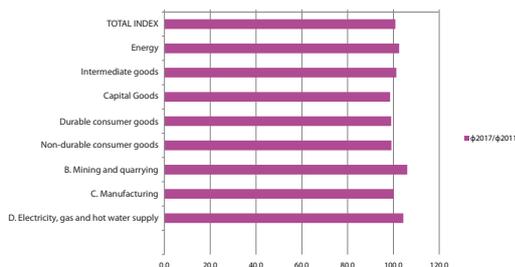

**Average price level in Bosnia and Herzegovina in 2017** as compared to the average in 2016 is higher by 1,2%, which is caused by average growth of prices in divisions of Alcoholic beverages and tobacco by 5.2%, Transport by 5.5%, Food and non-alcoholic beverages by 0.9%, Housing by 1.3%, Health by 0.9%, Communications by 0.7%, Recreation and culture by 1.1%, Education by 0.7%, Restaurants and hotels by 0.3%.

**Producer Price Index** is a short-term statistical indicator that represents the measurement of change of prices of industrial products produced and sold by enterprises. This statistical indicator serves as the measure of inflation. It can also serve as the indicator of macroeconomical performances, escalator in long-term contracts, deflator for output values, intermediate consumption, and capital consumption in National Accounts, and an important tool in creating monetary and fiscal politics.

PPI in Bosnia and Herzegovina is calculated based on the representative list of products and it's producers making a sample of cca. 531 producers and 918 products. Each month 1854 prices are collected directly from producers through the unique questionnaire. Since 1/1/2017 published indices are based on the average of 2015.

**COMPARATIVE PRICE LEVEL FOR THE WESTERN BALKANS COUNTRIES AND THE REGION**

**Total expenditure for the final household consumption, 2014 (EU=100)**

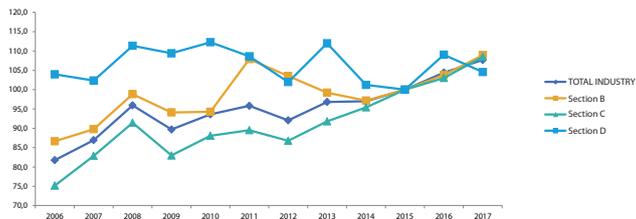

**The comparative price level** is expressed in the price level indices (PLIs). Price level Indices provide a comparison of countries' price levels with respect to the EU average: if the PLI is higher than 100, the country concerned is relatively expensive compared to the EU average, and vice versa.

**Production on own account (0)** is the production accomplished by the observation unit (enterprise/local unit) on own account by utilizing the purchased or its own raw materials. The observation unit is the owner of a finished product and sells its own products in the market.

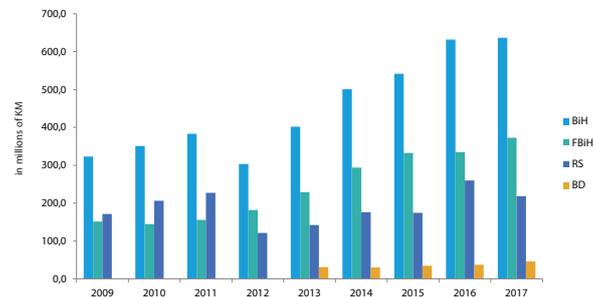

**Production under contract (1)** is contractual agreement between a principal and a contractor. It represents production that is done when a contracted business entity, from raw materials owned by the principal, produces or processes a product defined by the Nomenclature of Industrial Products BiH 2010.

**Sale value and value of provision** is total value of products produced in own (regular) production (0) or contracted (1), and which were sold (invoiced) in the reporting year.

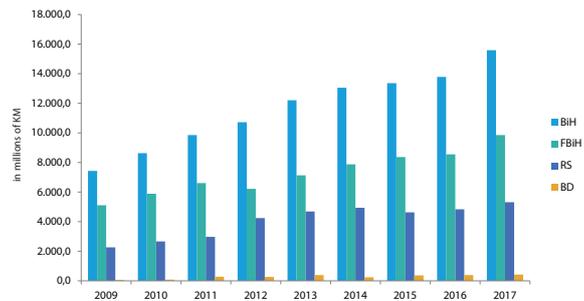

**TOTAL PRODUCTION (0+1) Value of sale and value of provision by regions and year**

**PRODUCTION UNDER CONTRACT (1) Value of provision by region and year**

**PRODUCTION ON OWN ACCOUNT (0) Value of sale, by region and year**

Value index of retail trade is expressed in **current prices** (unadjusted for price change). For users of statistical data it is very important to monitor the dynamics of the occurrence over time and for this purpose, we use the real index of retail trade. Volume index is expressed in **constant prices**, and is calculated by deflating retail trade turnover by adjusted consumer price index.

**Yield of fruit and grapes** is shown as granary yield of standard humidity after deducting all losses during the harvest and transportation.

**Trees and vines** of bearing age are those trees and vines capable of bearing fruit under standard conditions, regardless of whether or not they bore fruit during reporting year.

**Yield per tree or per vine** is computed for the bearing trees or vines.

**Utilised agricultural area** is total area taken up by arable land, permanent grassland (meadows and pastures), permanent crops and kitchen gardens, used by the holding regardless of the type of tenure or whether it is used as common land.

**Harvested area** is the part of the cropped area that is harvested. It can therefore be equal to or less than the cropped area.

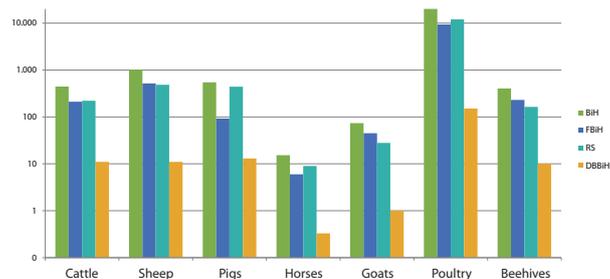

**Harvested production** is total production, including on-holding losses and wastage, quantities consumed directly on the farm and marketed quantities, indicated in units of basic product weight.
