SARAJEVO, 15.05.2019.

BROJ/ NUMBER 3

POLJOPRIVREDA, OKOLIŠ I REGIONALNE STATISTIKE *AGRICULTURE, ENVIRONMENT AND REGIONAL STATISTICS*

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BIH PREMA ASORTIMANU U I TROMJESEČJU 2019

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN
BOSNIA AND HERZEGOVINA IN 1st QUARTER 2019*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u prvom tromjesečju 2019. godine veća je za 7,73% u odnosu na isto razdoblje 2018. godine. Proizvodnja sortimenata četinjača manja je za 1,81% dok je proizvodnja sortimenata listača veća za 19,58%.

Proizvodnja trupaca četinjača manja je za 1,55% dok proizvodnja trupaca listača bilježi rast od 19,87%. Rast proizvodnje od 22,24% u odnosu na prvo tromjesečje 2018. godine bilježi se kod ostalog dugog drva četinjača i kod prostornog drva listača od 4,84%. Pad proizvodnje se bilježi kod janskog drva četinjača u visini od 9,42%, kod ostalog dugog drva listača u visini od 29,63% i kod prostornog drva četinjača u visini od 0,88%. Rast proizvodnje od 22,05% se bilježi i kod ogrijevnog drva listača. Kod proizvodnje janskog drva listača, ostalog grubo obrađenog drva i ogrijevnog drva četinjača radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema utjecaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 1st quarter of 2019 increased for 7,73%, compared to the same period in 2018.

Production of coniferous (softwood) assortments is lower for 1,81% while the production of broadleaf (hardwood) assortments increases for 19,58%.

Production of coniferous logs is 1,55% lower while production of broadleaf logs records increase of 19,87%. Increase in production of 22,24%, compared to 1st quarter of 2018, was recorded in production of other coniferous long wood and in production of broadleaf cordwood of 4,84%. Production decrease was recorded in production of coniferous mining wood of 9,42%, in production of broadleaf other long wood of 29,63% and in production of coniferous cordwood of 0,88%. Rise in production has also been recorded to broadleaf fuelwood of 22,05%. Broadleaf mining wood, other roughly worked wood and coniferous fuelwood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

Tablica 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U I TROMJESEČJU 2019

 Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 1ST QUARTER OF 2019

| | Proizvodnja (Production) | | | Prodaja (Sale) | | | |

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - I tromjesečje 2018 i 2019 god.

 Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 1st quarter of 2018 and 2019

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u I tromjesečju 2019 god.

Percentage participation of different assortments in total production of forest assortments in 1st quarter of 2019

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom priopćenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinjače su vrste drveća iz klase golosjemenica (Gymnospermae), pretežito iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinjača ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Included here are domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and it is, in international classification, regardless its mechanical properties, classified as *softwood*.

Listače su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća listača kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih listača iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih listača. Drvo liščara je složenije građe u odnosu na drvo četinjača i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u kemskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruća i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Included here are domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and it is, in international classification, regardless its mechanical properties, classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
