REGISTRIRANA NEZAPOSLENOST

U MARTU 2019. GODINE

REGISTERED UNEMPLOYMENT

MARCH 2019

U martu 2019. godine broj registriranih nezaposlenih osoba u BiH iznosio 423.419.

Ako kao baznu godinu uzmemo 2017. (2017.=100) i uporedimo mart 2019. godine sa martom 2018. godine, uočit ćemo pad nezaposlenosti od 8,6 indeksnih poena ili u apsolutnom iznosu broj osoba koje se vode kao nezaposlene smanjio se za 42.911.

Napomena: Potrebno je naglasiti da ovaj broj registriranih nezaposlenih osoba ne može da se upoređuje sa brojem nezaposlenih osoba koji je dobijen putem Ankete o radnoj snazi, kao jedinog međunarodno uporedivog indikatora nezaposlenosti u BiH.

In March 2019 the number of registered unemployed in BiH amounted to 423.419.

If we take 2017 as a base year (2017 = 100) and compare March 2019 with the same month of 2018, we will notice that the number of unemployed decreased by 8,6 index points, or in absolute terms the number of people registered as unemployed decreased by 42.911.

Note: It should be noted that the number of unemployed persons cannot be compared with the number of unemployed persons obtained through the Labour Force Survey, which is the only internationally comparable data of the unemployment in BiH.

METODOLOŠKA OBJAŠNENJA

Izvor podataka

Broj nezaposlenih osoba je rezultat prikupljanja i obrade podataka koje dostavlja Agencija za rad i zapošljavanje Bosne i Hercegovine.

Nezaposlenom osobom se smatra svaka osoba koja ispunjava zakonom propisane uslove i prijavljena je u nekom od Zavoda za zapošljavanje.

Uporedivost anketnih i administrativnih podataka

Podaci dobijeni iz Ankete o radnoj snazi nisu metodološki uporedivi sa podacima koji se dobijaju iz drugih statističkih ili administrativnih izvora.

Uporedivost podataka je ograničena iz slijedećih razloga:

Izvor podataka: administrativni podaci se baziraju na statističkom istraživanju o zaposlenima, koje se zasniva na kadrovskoj evidenciji pravnih subjekata i na evidencijama nezaposlenih koji su prijavljeni na biroima za zapošljavanje, dok se anketni podaci zasnivaju na procenjenim podacima dobijenim direktnim intervjuom ciljane grupe u okviru domaćinstava izabranih slučajnim uzorkom.

Jedinica izveštavanja: jedinica izveštavanja za prikupljanje administrativnih podataka je pravni subjekt, dok je anketna jedinica svaki član slučajno izabranog domaćinstva.

Period posmatranja: administrativni se podaci odnose na zadnji dan u mjesecu, dok se anketni podaci odnose na aktivnost osoba u referentnom periodu.

Metod prikupljanja: podaci iz administrativnih izvora dobijaju se putem izveštaja koje dostavljaju pravni subjekti, dok se anketni podaci prikupljaju direktnim upitnikom od osoba u domaćinstvima koja su odabrana u uzorak.

Periodika prikupljanja: administrativni podaci se prikupljaju mjesečno, odnosno polugodišnje, dok se anketa u BiH provodi jedanput godišnje.

Definicije zaposlenosti i nezaposlenosti: administrativni podaci obuhvataju samo osobe u formalnoj zaposlenosti, odnosno osobe koje su kao nezaposlene prijavljene na biroima za zapošljavanje, dok se u anketi svaka kategorija detaljno definiše u skladu sa međunarodnim preporukama.

NOTES OF METHODOLOGY

Data source

Number of unemployed people is the result of collecting and processing data supplied by the Labour and Employment Agency of Bosnia and Herzegovina.

Unemployed person is a person who meets the statutory requirements and has been reported in any of the Employment Service.

Comparability of the survey and administrative data

The data gathered in the Labour Force Survey are not methodologically comparable to the data gathered from other statistical or administrative sources.

The data comparability is limited due to the following reasons:

The source of data: administrative data are based on the statistical research on the employed, based on the personnel records of business subjects and records of the unemployed registered at Employment Agencies, while the Survey data are based on the estimated data gathered in direct interviews of the target group within the households selected randomly.

Reportin unit: the reporting unit for the gathering of administrative data is a legal subject, whereas the survey reporting unit is each member of a randomly selected household.

Observation period: administrative data relate to the last day of a month, whereas the Survey data relate to the activities of persons during the reference period.

Data gathering methods: the data from the administrative sources are gathered by reports delivered by business subjects, whereas the Survey data are gathered in a direct interview, from persons, members of households randomly selected in the sample.

Data gathering cycles: administrative data are gathered monthly or semi-annually, while the Survey in Bosnia and Herzegovina is carried out once a year.

Definitions of employment and unemployment: administrative data only encompass persons formally employed, or persons registered as unemployed with the employment agencies, whereas, in the Survey, each of the categories is defined in detail, pursuant to international recommendations.
