METODOLOŠKA OBJAŠNENJA

Svrha istraživanja

Svrha ovoga istraživanja je prikazati nivo upotrebe računara i ostalih informaciono-komunikacijskih tehnologija, te broj osoba u Bosni i Hercegovini koji su korisnici interneta, i za koje se svrhe upotrebljava internet. Ovi podaci čine važan izvor informacija za provođenje politika u sektoru informacionog društva.

Pravna osnova

Koncepti i definicije koje se primjenjuju za IKT istraživanja usklađeni su sa Eurostatovom metodologijom za statistike o Informacionom društvu, 2021., sa regulativom Evropskog parlamenta i Vijeća br.808/2004 o statistici Zajednice o informacionom društvu.

Jedinice posmatranja

Jedinica posmatranja je domaćinstvo izabrano u uzorak, a jedinica anketiranja je član domaćinstva koji ima između 16 i 74 godine starosti.

NOTES ON METHODOLOGY

Purpose of the statistical survey

The purpose of this survey is to show the level of use of computers and other information and communication technologies, as well as the number of people in Bosnia and Herzegovina who are Internet users and for which the Internet is used. These data constitute an important source of information for the implementation of policies in the information society sector.

Legal framework

The concepts and definitions used in ICT surveys are harmonized with the Eurostat Methodology for Information Society Statistics, 2021., with the European Parliament and Council Regulation No. 808/2004 on Community Statistics on the Information Society.

Observation units

Observation unit are sampled based households members aged between 16 and 74.

Metoda prikupljanja podataka

Podaci su prikupljeni putem telefonskog anketiranja (CATI).

Veličina uzorka

Uzorak je dizajniran kao troetažno stratifikovani slučajno izabrani uzorak. Jedinice uzorkovanja prve etape su jedan ili više popisnih krugova. Slučajno izabrana domaćinstva sa bar jednim članom domaćinstva starosti 16-74 godine unutar tih popisnih krugova su jedinice druge etape uzorkovanja, dok su slučajno izabrane osobe unutar tih izabranih domaćinstava jedinice treće etape uzorkovanja. Veličina uzorka na nivo Bosne i Hercegovine je 8110 domaćinstava. Stopa odgovora je 78,8%, odnosno 6393 domaćinstava (stopa odgovora = broj jedinica koje su odgovorile/sa broj jedinica izabran u uzorak).

Definicije

IKT (informacijske i komunikacijske tehnologije) su softveri i hardveri upotrijebljeni za komuniciranje podacima (npr. računar, telefaks, internet, fiksni i mobilni telefon).

Računari uključuju personalne računare (PC), prijenosne računare (laptop), tablete i ostale prijenosne uređaje (osim pametnih telefona).

Elektronska trgovina: Kupovina ili prodaja dobara ili usluga preko interneta.

Data collection method

Data were collected through telephone interviewing (CATI)

Sample size

The sample was designed as a three-stage stratified random sample. The sampling units of the first stage are one or more census districts. Randomly selected households with at least one household member aged 16-74 within these census districts are units of the second sampling stage, while randomly selected persons within these selected households are units of the third sampling stage. The sample size at the level of Bosnia and Herzegovina is 8110 households. The response rate is 78.8%, or 6393 households (response rate = number of units responded / with number of units selected in the sample).

Definitions

ICT (Information and Communication Technology) are software and hardware used for data communication (e.g. computer, fax, the internet, fixed mobile phone).

Computers include personal computers (PCs), portable computers (laptops), tablets and other portable devices except smartphones).

Electronic commerce: Purchase or sale of goods or services using the Internet.
