#### Anketa o radnoj snazi, IV kvartal 2020. godine

*Labour Force Survey, IV quarter 2020*

U ovom saopćenju objavljaju se podaci dobijeni putem Ankete o radnoj snazi koja je provedena u četvrtom kvartalu 2020. godine, tj. u periodu od oktobra do decembra 2020. godine. Anketa o radnoj snazi u Bosni i Hercegovini se od januara 2020. godine provodi kontinuirano na uzorku koji je u četvrtom kvartalu obuhvatio 10 728 domaćinstava. Anketirani su svi rezidentni članovi privatnih domaćinstava. U cilju usklađivanja sa EU regulativama i zahtjevima Eurostata, od 2020. godine se provodi postupak kalibracije pondera prema procjenama stanovništva po petogodišnjim starosnim grupama i spolu.

*This Release contains data received through the Labour Force Survey conducted in the fourth quarter 2020 and the observation period was from October to December 2020. Continuous Labour Force Survey in Bosnia and Herzegovina was implemented starting from January 2020. The sample size in the fourth quarter 2020 was 10 728 households. All resident members of private households were surveyed. In order to harmonize with EU regulations and Eurostat requirements, from 2020 the procedure of weight calibration according to population estimates by five-year age groups and sex is carried out.*

## METODOLOŠKA OBJAŠNJENJA

### Cilj Ankete o radnoj snazi

Anketa o radnoj snazi je najobuhvatnija anketa domaćinstava u Bosni i Hercegovini. Cilj Ankete je da se prikupe podaci o situaciji na tržištu rada u Bosni i Hercegovini. Anketom se prikupljaju podaci o veličini, strukturi i karakteristikama radne snage i neaktivne populacije u Bosni i Hercegovini.

Anketa o radnoj snazi u BiH provedena je u skladu sa preporukama i definicijama Međunarodne organizacije rada (MOR) i u skladu sa preporukama i regulativama Statističkog ureda Evropske unije (EUROSTAT), što omogućava uporedivost podataka iz Ankete sa drugim zemljama.

Anketa o radnoj snazi u Bosni i Hercegovini se u periodu od 2006. do 2019. godine provodila jedanput godišnje, u aprilu, i njeno provođenje na terenu je trajalo dvije sedmice. Od januara 2020. godine Anketa o radnoj snazi u Bosni i Hercegovini se provodi kontinuirano, tokom cijele godine, sa kvartalnom objavom podataka.

### Jedinica posmatranja i jedinica anketiranja

Jedinica posmatranja u Anketi je domaćinstvo koje živi u stambenoj jedinici izabranoj u uzorak.

Domaćinstvom se smatra svaka porodična ili druga zajednica osoba koje se izjasne da zajedno stanuju i zajednički troše svoje prihode za podmirivanje osnovnih životnih potreba.

Jedinica anketiranja je član izabranog domaćinstva.

### Obuhvat istraživanja

Ciljano stanovništvo u Anketi je svo rezidentno stanovništvo, tj. ono koje boravi na teritoriji BiH 12 mjeseci i duže. Istraživanjem je obuhvaćeno samo stanovništvo koje živi u privatnim domaćinstvima.

Privremeno odsutni članovi domaćinstva (kraće od 12 mjeseci), bez drugog uobičajenog boravišta i dalje pripadaju domaćinstvu tj. uključeni su u anketiranje.

Osobe koje su odsutne iz domaćinstva više od 12 mjeseci ne obuhvataju se tj. ne smatraju se članovima domaćinstva. Izuzetak su osobe koje su odsutne više od 12 mjeseci iz domaćinstva, ali su i dalje ekonomski vezane za domaćinstvo tj. ako je razlog njihove odsutnosti: školovanje, rad/zaposlenje u BiH i rad/zaposlenje kod domaćeg poslodavca izvan BiH.

### Referentni period

Anketirane osobe su razvrstane na zaposlene, nezaposlene i neaktivne prema njihovom statusu u referentnoj sedmici tj. sedmici posmatranja. To je sedmica (od ponedjeljka do nedjelje) koja prethodi sedmici anketiranja.

## METHODOLOGICAL EXPLANATIONS

### The purpose of the Labour Force Survey

*The Labour Force Survey is the most comprehensive household survey in Bosnia and Herzegovina. The aim of the Survey is to collect data about situation on the labour market in Bosnia and Herzegovina. It provides data on the size, structure and characteristics of the labour force and inactive population in Bosnia and Herzegovina.*

*The Labour Force Survey in Bosnia and Herzegovina was conducted in accordance with the recommendations and definitions of the International Labour Organization (ILO) and in accordance with the recommendations and regulations of the Statistical Office of the European Union (EUROSTAT), which allows comparability of data from the Survey with other countries.*

*In the period from 2006 to 2019, the Labour Force Survey in Bosnia and Herzegovina was conducted once a year, in April, and the fieldwork two weeks. Since January 2020, the Labour Force Survey in Bosnia and Herzegovina has been conducted continuously, throughout the year, with quarterly data release.*

### Observation units

*The observation unit is a household living in a housing unit randomly selected to the sample.*

*A household is a group people (family or other community), living together in the same dwelling and sharing expenditures. A survey unit is a member of sampled household.*

### Scope of the survey

*The target population in the Survey is resident population, ie. the one who resides on the territory of BiH for 12 months and longer. The survey covered only the population living in private households.*

*Temporarily absent members of the household (shorter than 12 months), without another usual residence, still belong to the household, ie. they were included in the survey.*

*Persons who have been absent from the household for more than 12 months are not included, ie. they are not considered household members. Exceptions are persons who have been absent from the household for more than 12 months, but are still economically connected to the household, ie. if the reason for their absence is: education, work employment in BiH and work/employment with a domestic employer outside BiH.*

### Reference period

*The surveyed persons were classified as employed, unemployed and inactive according to their status in the reference week, ie. weeks of observation. It is the week (from Monday to Sunday) that precedes the survey week.*

## Bazni koncepti i definicije

U Anketi o radnoj snazi se prati stanovništvo staro 15 i više godina prema aktivnosti u posmatranom kvartalu, a ne prema formalnom statusu anketiranih osoba.

Radno sposobno stanovništvo obuhvata sve osobe starosti 15 i više godina.

Zaposlene osobe su one koje su tokom referentne sedmice (sedmice posmatranja od ponedjeljka do nedjelje):

- obavljale bilo kakav posao za plaću/profit (u gotovini, robi ili naturi) barem jedan sat,
- nisu radile u referentnoj sedmici (zbog bolesti, godišnjeg odmora, državnih i vjerskih praznika, obrazovanja, obuke, porodičnog odsustva, smanjene proizvodnje i druge privremene nemogućnosti za rad), ali imaju posao na koji će se vratiti, također se smatraju zaposlenim osobama.

Samozaposlene osobe sa biznisom ili farmom, također se smatraju zaposlenim osobama ukoliko:

- rade u vlastitom biznisu ili drže farmu u svrhu zarađivanja profita, čak i ako preduzeće ne uspijeva da ostvari profit,
- osobe koje provode vrijeme na obavljanju posla čak i ako nema prodaje, nisu obavljale profesionalne usluge ili ništa nije proizvedeno (farmer koji radi na aktivnostima održavanja farme, arhitekta koji provodi vrijeme čekajući klijenta u kancelariji, ribar koji popravlja brod ili održava mreže za budući rad, osoba koja pohađa seminar itd.),
- osobe koje su u procesu formiranja svog biznisa ili farme, kao što je kupovina i montiranje opreme, iznajmljivanje prostorija ili kupovina materijala za početak novog posla,
- osobe koje rade na svom poljoprivrednom imanju smatraju se zaposlenima ako su radile tokom referentne sedmice. Osobe koje rade na svom malom poljoprivrednom imanju, a prodaju svoje poljoprivredne proizvode, također se smatraju zaposlenima.

Neplaćeni pomažući članovi su oni koji nisu bili u plaćenoj zaposlenosti niti su bili samozaposleni u referentnoj sedmici, ali su obavljali neki posao na porodičnom imanju, u porodičnoj firmi ili nekom drugom obliku porodičnog biznisa. Oni ne primaju redovnu plaću.

Nezaposlene osobe su osobe koje:

- nisu radile tokom referentne sedmice (nisu u plaćenoj zaposlenosti ili samozaposlenosti niti su radile bilo kakav plaćeni posao),
- aktivno su tražile posao tokom prethodne četiri sedmice,
- bile su trenutno raspoložive za rad u okviru dvije sedmice.

Osobe koje su pronašle posao koji će početi da rade u narednom periodu su, također, uključene u nezaposlene osobe.

## Basic concepts and definitions

*The Labour Force Survey monitors the population aged 15 and over according to the activity in the observed quarter, and not according to the formal status of the surveyed persons.*

*The working age population includes all persons aged 15 and over.*

*Employed persons are those who during the reference week (observation week from Monday to Sunday):*

- *perform any work for salary/profit (in cash, goods or in kind) for at least one hour,*
- *did not work in the reference week (due to illness, vacation, public and religious holidays, education, training, maternity leave, reduced production and other temporary incapacity for work), but have a job to return to, are also considered employed.*

*Self-employed persons with a business or farm are also considered employed persons if:*

- *work in their own business or keep a farm for the purpose of making a profit, even if the company fails to make a profit,*
- *people who spend time doing work even if there are no sales, no professional services or nothing is produced (a farmer working on farm maintenance activities, an architect spending time waiting for a client in the office, a fisherman repairing a boat or maintaining nets for future work , person attending the seminar, etc.).*
- *persons who are in the process of forming their business or farm, such as buying and installing equipment, renting premises or buying materials to start a new business,*
- *persons working on their agricultural holding are considered employed if they worked during the reference week. People who work on their small farm and sell their agricultural products are also considered employed.*

*Unpaid family workers are those who were not in paid employment or self-employment during the last week prior to the interview, but did some work on the family farm, in the family enterprise or some other kind of family gainful activity; they normally do not receive regular payment.*

*Unemployed persons are persons who:*

- *did not work during the reference week (they were not in paid employment or self-employment nor did they do any paid work),*
- *have been actively looking for job during the previous four weeks,*
- *were currently available to work within two weeks.*

*Persons who have found a job that will start working in the coming period are also included in the unemployed.*

Radnu snagu ili ekonomski aktivno stanovništvo čine sve zaposlene i nezaposlene osobe.

Neaktivne osobe su one koje imaju 15 i više godina i koje nisu svrstane niti u zaposlene niti u nezaposlene osobe.

Stopa aktivnosti predstavlja procentualno učešće radne snage u radno sposobnom stanovništvu.

Stopa zaposlenosti predstavlja procentualno učešće zaposlenih osoba u radno sposobnom stanovništvu.

Stopa nezaposlenosti predstavlja procentualno učešće nezaposlenih osoba u radnoj snazi.

## **Uzorak**

Anketa o radnoj snazi se provodi na slučajnom uzorku privatnih domaćinstava. Od 2006. do 2019. godine uzorak za Anketu bio je posebno definisan za svaku godinu, tj. nije bilo ponovljenog anketiranja, odnosno panelnog dijela uzorka. Od 2020. godine uvedena je panelna komponenta u načrt uzorka te se domaćinstva ponovljeno anketiraju četiri puta.

Domaćinstva se anketiraju u dva uzastopna kvartala, izostavljaju iz uzorka naredna dva kvartala te ponovo anketiraju u još dva uzastopna kvartala (rotaciona shema 2-(2)-2). Na ovaj način se omogućava vremensko praćenje i posmatranje promjena stanja na tržištu rada i to u kvartalnoj i godišnjoj dinamici.

Kao okvir za izbor uzorka koristi se Glavni okvir uzorka koji je stratifikovan prema entitetima/distriktu i tipu naseljenog mjesta (gradsko i ostalo).

Dizajn uzorka je dvoetapni stratifikovani. Uzorak je podijeljen na 4 nezavisno odabrana poduzorka, rotacijske grupe ili panela. Primarne jedinice uzorkovanja (PSU) u Glavnom okviru su teritorijalne jedinice sastavljene od jednog ili nekoliko susjednih popisnih krugova. Za njihov izbor primijenjena je metoda uzorka sa vjerovatnoćom proporcionalnoj veličini (PPS), pri čemu je kao mjera veličine PSU korišten broj stambenih jedinica (nastanjenih i nenastanjenih) iz baze Popisa stanovništva, domaćinstava i stanova 2013. Sekundarne jedinice izbora uzorka (SSU) – stambene jedinice nastanjene privatnim domaćinstvima, iz pomenutog okvira birane su metodom slučajnog uzorka.

## **Procedura ponderisanja**

Procedura ponderisanja provodi se radi izračuna procjena za cijelu populaciju. Time se kompenzira uticaj dizajna i veličine uzorka, te uticaj neodgovora domaćinstava na Anketi. U prvoj fazi ponderisanja izračunati su ponderi izbora jedinica u uzorak iz obje etape uzorkovanja (PSU i SSU). U drugoj fazi se vrši korekcija pondera zbog neodgovora jedinica iz uzorka. U finalnoj fazi, ponderi se kalibriraju na procjene stanovništva po petogodišnjim starosnim grupama i spolu.

*The labour force or economically active population consists of all employed and unemployed persons.*

*Inactive persons are those who are 15 years of age or older and who are not classified as employed or unemployed.*

*The activity rate represents the percentage share of the labour force in the working age population.*

*The employment rate represents the percentage share of employed persons in the working age population.*

*Unemployment rate represents the percentage share of unemployed persons in the labour force.*

## **Sample**

*The labour force survey is conducted on a random sample of private households. From 2006 to 2019, the sample for the Survey was defined separately for each year, ie. there was no repeated survey or panel part of the sample. Since 2020, a panel component has been introduced in the sample design and households have been re-surveyed four times.*

*Households are surveyed in two consecutive quarters, excluded from the sample for the next two quarters, and re-surveyed in two more consecutive quarters (rotation scheme 2- (2) -2). In this way, it is possible to monitor and observe changes in the situation on the labour market in quarterly and annual dynamics.*

*The Master sample frame, which is stratified by entities/district and type of settlement (urban and other), is used as the sampling frame.*

*The sample design is two-stage stratified. The sample was divided into 4 independently selected subsamples, rotating groups or panels. Primary sampling units (PSUs) in the Main sample frame are territorial units composed of one or more adjacent census districts. The sample method with probability proportional size (PPS) was used for their selection, whereby the number of housing units (inhabited and uninhabited) from the 2013 Census of Population, Households and Dwellings database was used as a measure of PSU size. Secondary sample selection units (SSUs) - units inhabited by private households were selected from the mentioned sample frame by the method of random sampling.*

## **The weighting procedure**

*The weighting procedure is performed to calculate estimates for the entire population. This compensates for the impact of sample design and size, and the impact of household non-response to the Survey. In the first weighting phase, the weights of unit selection to the sample from both sampling stages (PSU and SSU) were calculated. In the second phase, the weight correction is performed due to non-response of the units from the sample. In the final phase, the weights are calibrated to population estimates by five-year age groups and gender.*

## Klasifikacije

Prilikom šifriranja i obrade podataka dobijenih ovom Anketom, korištene su sljedeće klasifikacije:

- Klasifikacija djelatnosti KD BiH 2010, koja sadržajno i strukturno u potpunosti odgovara EU statističkoj klasifikaciji djelatnosti NACE Rev. 2,
- Klasifikacija zanimanja KZ BiH 2008, koja sadržajno i strukturno u potpunosti odgovara EU statističkoj klasifikaciji zanimanja ISCO-08.

## Napomena

Zbog zaokruživanja decimala u nekim slučajevima u ovom saopćenju zbir procenata nije jednak 100.

## Classifications

In the coding and processing of the data gathered in this Survey, the following classifications were used:

- Classification of Economic Activities KD BiH 2010, is in its content and structure harmonized with EU Classification of Economic Activities NACE Rev2.;
- Classification of Occupation KZ BiH 2008, is in its content and structure harmonized with EU Classification of Occupation ISCO-08.

## Note

Due to the rounding of decimal numbers in some cases in this Release the sum of the percentages is not equal to 100.
