## METODOLOŠKA OBJAŠNENJA

### Izvor podataka

Izveštajne jedinice prikupljanja statističkih podataka o rođenim, umrlim licima i zaključenim brakovima su matični uredi u Bosni i Hercegovini.

Izveštajne jedinice prikupljanja statističkih podataka o razvedenim brakovima su sudovi nadležni za razvode brakova u Bosni i Hercegovini.

### Jedinice promatranja

Jedinice promatranja su registrirani slučajevi rođenih i umrlih osoba i registrirani slučajevi sklopljenih i razvedenih brakova u Bosni i Hercegovini.

## METODOLOGICAL EXPLANATIONS

### Source of data

*Reporting units for the collection of statistical data on births, deaths and marriages are registration offices in Bosnia and Herzegovina.*

*Reporting units for the collection of statistical data on divorces are courts of competent jurisdiction in Bosnia and Herzegovina.*

### Observation units

*The units of observation are registered cases of births and deaths and registered cases of marriages and divorces in Bosnia and Herzegovina.*

## Obuhvat i pokrivenost

Obuhvat je potpun. Istraživanjem su obuhvaćena sva rođena i umrla osoba, te svi sklopljeni brakovi registrirani u matičnim knjigama i svi razvedeni brakovi čiji je brak pravosnažno razveden.

## Definicije i objašnjenja

**Živorodenim** djetetom se smatra svako dijete koje prilikom rođenja diše i pokazuje druge znakove života kao što su kucanje srca, pulsiranje pupčane vrpce i nesumnjivo kretanje voljnih mišića. Ako dijete ubrzo nakon poroda umre, najprije se registrira kao živorodeno, a zatim kao umrlo dojenče.

**Umrli** je svaka živorodena osoba kod koje je nastupio trajni prestanak svih vitalnih funkcija koje započinju rođenjem bez mogućnosti ponovnog oživljavanja. Ovdje nisu uključeni mrtvorodeni.

**Umrlo dojenčadi** smatraju se djeca koja su umrla prije navršene prve godine života.

**Prirodni prirast** je razlika između broja živorodene djece i broja umrlih lica.

**Vitalni indeks** predstavlja odnos broja živorodenih i umrlih lica (broj živorodenih na 100 umrlih).

**Brak** je zakonom uređena zajednica života žene i muškarca.

**Brak se smatra razvedenim** kada sudska presuda o razvodu braka postane pravosnažna.

## Scope and coverage

Coverage is complete. The research covered all births and deaths and all marriages registered in the registry books and all divorced marriages whose marriage was legally divorced.

## Definitions and explanations

**Live birth** is the complete expulsion or extraction from its mother of product of conception, which, after such separation, breaths or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movements of voluntary muscles. If a product of such a birth dies, it is first registered as live-born and then as died.

**A dead person** is every live-born person in which there is a permanent disappearance of all evidence of life at any time after live birth has taken place, without capability of resuscitation. Stillbirths are not included here.

**Dead infants** are considered children who died under one year of age.

**Natural increase** represents the difference between number of live births and number of deaths.

**Vital index** represents the ratio between the number of live births and deaths (number of live births per 100 deaths).

**Marriage** is a regulated community of life between a woman and a man.

**A marriage is considered divorced** when the court decision on the divorce becomes final.
