SARAJEVO, 15.08.2022.

BROJ/NUMBER 4

## POLJOPRIVREDA I ŠUMARSTVO

### AGRICULTURE AND FORESTRY

#### PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U II KVARTALU 2022.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 2<sup>nd</sup> QUARTER  
OF 2022.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u drugom kvartalu 2022. godine manja je za 0,98% u odnosu na isti period 2021. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 7,33% dok je proizvodnja sortimenata lišćarskih vrsta veća za 5,92%.

Proizvodnja trupaca četinara manja je za 4,43% dok proizvodnja trupaca lišćara bilježi rast od 4,20%. Rast proizvodnje u odnosu na drugi kvartal 2021. godine bilježi se kod sljedećih šumskih sortimenata: kod ostalog dugog drveta četinara 15,07%, kod ostalog dugog drveta lišćara 72,79%, kod prostornog drveta lišćara 22,15% i kod ogrijevnog drveta lišćara 5,63%. Pad proizvodnje bilježi se kod janskog drveta četinara 1,51%, i kod prostornog drveta četinara 17,55%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrijevnog drveta četinara i janskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 2<sup>nd</sup> quarter of 2022 has been decreased for 0,98% compared to the same period in 2021.

Production of coniferous (softwood) assortments is for 7,33% lower while the production of broadleaf (hardwood) assortments increases for 5,92%.

Production of coniferous logs is 4,43% lower while production of broadleaf logs records increasing by 4,20%. The production rise, compared to 2<sup>nd</sup> quarter of 2021, has been recorded to following forest assortments: to coniferous other long wood by 15,07%, to broadleaf other long wood by 72,29%, to broadleaf cordwood by 22,15% and to broadleaf fuelwood 5,63%. The production fall has been recorded to coniferous mining wood by 1,51% and to coniferous cordwood by 17,55%. Other roughly worked wood, coniferous fuelwood and broadleaf mining wood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

**Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U II TROMJESEČJU 2022.**

Production of forest assortments in Bosnia and Herzegovina in 1000 m<sup>3</sup> - 2<sup>nd</sup> quarter of 2021 and 2022

## Grafikon 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u II kvartalu 2022 godine

Percentage participation of different assortments in total production of forest assortments in 2<sup>nd</sup> quarter of 2022

### Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvnu masu sortimenata izraženu u zapreminskim metrima.

**Četinari** su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

### Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

**Coniferous** are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

**Lišćari** su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

**Trupci** su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

**Jamsko drvo** obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

**Ostalo dugo drvo** obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

**Prostorno drvo** obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemijskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

**Ogrjevno drvo** je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

**Ostalo grubo obrađeno drvo** obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

**Broad leaf** are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial

species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

**Logs** are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

**Mining wood** include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

**Other long wood** includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

**Cordwood** include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

**Fuelwood** is wood intended for heating or production of charcoal.

**Other wood, roughly worked** is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
