(*)-corrected data

Proizvodnja konzumne ribe u tonama, 2022. i 2023.

Production of consumer fish in tons, 2022 and 2023

Metodološka objašnjenja

Podaci o proizvodnji konzumne ribe i školjkaša, riblje mlađi i ribljih jaja dobiveni su agregiranjem podataka na osnovu uporedivih godišnjih statističkih istraživanja koja provode entitetske statistike i Distrikt Brčko.

Istraživanje se sprovodi izvještajnom metodom i obuhvata sva preduzeća/obrtnike koji proizvode ribu i školjkaše za ishranu, riblju mlađ i jaja u slatkim vodama i moru u ribnjacima i kavezima ili drugom tehnikom uzgoja.

Podatke o akvakulturi izvještajne jedinice daju putem obrasca, na osnovu knjigovodstvenih i finansijskih podataka.

Definicije

Akvakultura predstavlja uzgoj i kultivaciju vodenih organizama korištenjem tehnika namjenjenih povećanju proizvodnje tih organizama iznad mogućnosti prirodnog okruženja.

Proizvodnja znači izlaz iz akvakulture pri prvoj prodaji, uključujući proizvodnju iz mrijestilišta i uzgajališta koja je za prodaju. U proizvodnji se ne ubrajaju količine ribe i školjkaša, riblje mlađi i ribljih jaja koji ostaju u uzgajalištu odnosno prenose se u narednu proizvodnu godinu.

Skraćenice

ha - hektar

m³ - kubni metar

m² - kvadratni metar

t - tona

z - povjerljiv podatak

(-) - nema pojave

Notes on methodology

The data on production of fish and shellfish for consumption, juvenils and fish eggs are result of agregation of comparable the data from yearly statistical surveys conducted by the two statistical offices on the Entity level and by the Bureau in Brcko District.

Survey is carried out by annual report from legal entities/entrepreneurs which are producing fish and shellfish for consumption, juvenils and fish eggs in freshwater and seawater in fishponds and cages or other breeding technique. Data about aquaculture from reporting units legal entities/entrepreneurs are collected by questionnaire based on book-keeping and financial data.

Definitions

Aquaculture perform rearing or cultivation of aquatic organisms using techniques designed to increase the production of the organisms in question beyond the natural capacity of the environment.

Production means the output from aquaculture at first sale, including production from hatcheries and nurseries offered for sale. In „Production“ is not including quantities of fish and shellfish, juvenils and fish eggs which remains in breeding site namely transferring in next production year.

Abbreviations

ha - hectare

m³ - cubic meter

m² - square meter

t - ton

z- confidential data

(-) - no occurrence
