#### PREKOGRANIČNI PROMET NEOPASNOG OTPADA CROSS-BORDER TRAFFIC NON-DANGEROUS WASTE

Analiza podataka o ukupnom prekograničnom prometu neopasnog otpada u periodu 2014-2023. godine ukazuje generalno na rast prometa pet grupa otpada (tekstilni otpad, stakleni otpad, plastični otpad, metalni otpad i otpad od papira i kartona). Samo za neke vrste otpada zabilježen je umjeren pad.

Ukupna količina izvezenog neopasnog otpada u 2023. godini iznosi 837 168 tone, što je za 21,6% manje u odnosu na prethodnu godinu. Podaci o izvezenim količinama neopasnog otpada u 2023. godini pokazuju trend pada, što je uzrokovano smanjenim izvozom nekih grupa otpada.

Posmatrajući pojedinačno grupe otpada, u 2023. godini povećan je izvoz staklenog otpada, tekstilnog otpada i otpada od papira i kartona, dok je metalni otpad, plastični otpad, gumeni otpad i otpad od sagorijevanja zadržao trend postepenog pada.

Ukupna količina uvezenog neopasnog otpada u 2023. godini iznosi 29 566 tona, što je za 11,2% više u odnosu na prethodnu godinu. Analiza podataka o uvozu neopasnog otpada za period 2014-2023. godine ukazuje na trend pada uvezenih količina plastičnog otpada, gumenog otpada i otpada od sagorijevanja, dok je metalni, tekstilni i otpad od papira i kartona zadržao trend rasta tokom posmatranog perioda.

The analysis of data on the total cross-border traffic of non-hazardous waste in the period 2014-2023 generally indicates an increase in the traffic of six groups of waste (textile waste, glass waste, plastic waste, metal waste and paper and cardboard waste). A moderate decrease was recorded only for some types of waste.

The total amount of non-hazardous waste exported in 2023 is 837 168 tons, which is 21,6% less than the previous year. Data on exported quantities of non-hazardous waste in 2023 show a downward trend, which is caused by the reduced export of some groups of waste.

Looking at individual waste groups, the export of glass waste, textile waste and paper and cardboard waste increased in 2023, while metal waste, plastic waste, rubber waste and combustion waste maintained a gradual downward trend.

The total amount of imported non-hazardous waste in 2023 is 29,566 tons, which is 11.2% more than the previous year. Analysis of data on the import of non-hazardous waste for the period 2014-2023 indicates a downward trend in imported quantities of plastic waste, rubber waste and incineration waste, while metal, textile and paper and cardboard waste maintained a growth trend during the observed period.

# 1. STATISTIKA VANJSKE TRGOVINE – IZVOZ NEOPASNOG OTPADA

FOREIGN TRADE STATISTICS – EXPORT OF NON-HAZARDOUS WASTE

## 1.1 IZVOZ METALNOG OTPADA

EXPORT OF METAL WASTE

Analiza podataka o izvozu metalnog otpada u periodu 2014 – 2023 ukazuje na pad izvezenih količina otpada. U 2023. godini uočen je pad izvoza. Količina izvezenog otpada je za 25,5% veća u odnosu na 2022. godinu. Tokom 2023. godine od ukupno izvezene količine, 44% metalnog otpada izvezeno je u Tursku.

The analysis of data on the export of metal waste in the period 2014 - 2023 indicates a decrease in the amount of exported waste. In 2023, a decline in exports was observed. The amount of exported waste is 25.5% higher than in 2022. During 2023, 44% of the total exported amount of metal waste was exported to Turkey.

**Graf 1. Izvoz metalnog otpada, 2014-2023.**  
Graph 1. Export of metal waste, 2014-2023

## 1.2 IZVOZ STAKLENOG OTPADA

EXPORT OF GLASS WASTE

Analiza podataka o izvozu staklenog otpada u periodu 2019-2023. ukazuje na trend rasta izvezenih količina. U 2023. godini uočen je rast izvoza, količina izvezenog staklenog otpada je za 26,4% veća u odnosu na 2022. Tokom 2023. godine najveće količine staklenog otpada izvezene su u Hrvatsku.

The analysis of data on the export of glass waste in the period 2019-2023 indicates a growing trend in exported quantities. In 2023, an increase in exports was observed, the amount of glass waste exported was 26.4% higher than in 2022. During 2023, the largest amounts of glass waste were exported to Croatia.

**Graf 2. Izvoz staklenog otpada, 2014-2023.**  
Graph 2. Export of glass waste, 2014-2023

### 1.3. IZVOZ TEKSTILNOG OTPADA

EXPORT OF TEXTILE WASTE

U 2023. godini tekstilni otpad iz BiH se izvozio u mnogo zemalja. Izvezeni otpad obuhvata materijale kao npr. strugotina i ostali otpad kože, otpaci od svile, otpaci od vune, pamučni otpad, lan i otpad te rabljena odjeća. Tokom 2023. godine najveće količine tekstilnog otpada izvezene su u Tursku.

In 2023, textile waste from BiH was exported to many countries. Exported waste includes materials such as shavings and other leather waste, silk waste, wool waste, cotton waste, linen and waste, and used clothing. During 2023, the largest quantities of textile waste were exported to Turkey.

**Graf 3. Izvoz tekstilnog otpada, 2023.**

Graph 3. Export textile waste, 2023

### 1.4 IZVOZ OTPADNOG PAPIRA I KARTONA

EXPORT OF WASTE PAPER AND CARDBOARD

Analiza podataka o izvozu otpadnog papira i kartona u periodu 2019-2023. ukazuje na trend rasta. U 2023. godini uočen je rast izvoza, količina izvezenog otpada je za 12,7% veća u odnosu na 2022. godinu. Tokom 2023. godine od ukupno izvezene količine otpadnog papira i kartona, 44,8% otpadnog papira i kartona izvezene su u Republiku Srbiju.

Analysis of data on the export of waste paper and cardboard in the period 2019-2023 indicates a growth trend. In 2023, an increase in exports was observed, the amount of exported waste was 12.7% higher than in 2022. During 2023, of the total exported amount of waste paper and cardboard, 44.8% of waste paper and cardboard was exported to the Republic of Serbia.

**Graf 4. Izvoz otpadnog papira i kartona, 2014-2023.**

Graph 4. Export of waste paper and cardboard, 2014-2023

## 1.5 IZVOZ PLASTIČNOG OTPADA EXPORT OF PLASTIC WASTE

Analiza podataka o izvozu plastičnog otpada u periodu 2012-2023. generalno ukazuje na promjeniv trend pada izvezenih količina. U 2023. godini uočen je pad izvoza, količina izvezenog plastičnog otpada je za 30,5% manja u odnosu na 2022. godinu. Tokom 2023. godine, od ukupno izvezene količine plastičnog otpada 39,2% plastičnog otpada izvezeno je u Hrvatsku.

*Analysis of data on the export of plastic waste in the period 2012-2023. generally indicates a variable downward trend in exported quantities. In 2023, a decline in exports was observed, the amount of plastic waste exported was 30.5% less than in 2022. During 2023, 39.2% of the total amount of plastic waste exported was exported to Croatia.*

**Graf 5. Izvoz plastičnog otpada, 2014-2023.**

*Graph 5. Export of plastic waste, 2014-2023*

## 1.6 IZVOZ NEOPASNE ŠLJAKE I PEPELA EXPORT OF WASTE SLUDGE AND ASH

Analiza podataka o izvozu neopasne šljake i pepela iz toplinskih procesa u periodu 2019-2023. ukazuje na promjenjiv trend izvezenih količina. Godina 2023. bilježi pad od 27,5% u odnosu na prethodnu godinu. Tokom 2023. godine od ukupno izvezene količine neopasne šljake i pepela, 53,8% neopasne šljake i pepela izvezeno je u Hrvatsku.

*Analysis of data on the export of non-hazardous slag and ash from thermal processes in the period 2019-2023. indicates a changing trend of exported quantities. The year 2023 recorded a drop of 27.5% compared to the previous year. During 2023, of the total exported amount of non-hazardous slag and ash, 53.8% of non-hazardous slag and ash was exported to Croatia.*

**Graf 6. Izvoz neopasne šljake i pepela, 2014-2023.**

*Graph 6. Export of non-hazardous waste sludge and ash, 2014-2023*

## 1.7 IZVOZ GUMENOG OTPADA

### EXPORT OF RUBBER WASTE

U 2023. godini uočen je pad izvoza, količina izvezenog otpada je za 25% manja u odnosu na 2022. godinu. U 2023. godini od ukupno izvezene količine gumenog otpada, 37,5% gumenog otpada izvezeno je u Njemačku.

*In 2023, a decline in exports was observed, the amount of exported waste is 25% less compared to 2022. In 2023, of the total amount of rubber waste exported, 37.5% of rubber waste was exported to Germany.*

**Graf 7. Države u koje se izvozio gumeni otpad, 2023.**

*Graph 7. Countries to which rubber waste was exported, 2023*

## 2. STATISTIKA VANJSKE TRGOVINE – UVOZ NEOPASNOG OTPADA

FOREIGN TRADE STATISTICS – IMPORT OF NON-HAZARDOUS WASTE

### 2.1 UVOZ METALNOG OTPADA

IMPORT OF METAL WASTE

Analiza podataka o uvozu metalnog otpada u periodu 2014-2023. ukazuje na promjenjiv trend rasta uvezenih količina. U 2023. godini uočen je rast uvoza, količina uvezenog metalnog otpada je za 13,7% veća u odnosu na 2022. godinu. Tokom 2023. godine od ukupno uvezene količine metalnog otpada, 34,5% metalnog otpada uvezeno je iz Švicarske.

*Analysis of data on the import of metal waste in the period 2014-2023. indicates a changing trend of growth in imported quantities. In 2023, an increase in imports was observed, the amount of imported metal waste was 13.7% higher than in 2022. During 2023, 34.5% of the total imported amount of metal waste was imported from Switzerland.*

#### Graf 8. Uvoz metalnog otpada, 2014-2023.

Graph 8. Import of metal waste, 2014-2023

### 2.2 UVOZ TEKSTILNOG OTPADA

IMPORT OF TEXTILE WASTE

Analiza podataka o uvozu tekstilnog otpada u periodu 2014-2023. ukazuje na promjenjiv trend rasta i pada uvezenih količina ovog otpada. U 2023. godini uočen je rast uvoza, količina uvezenog tekstilnog otpada je za 0,4% veća u odnosu na 2022. godinu. Tokom 2023. godine od ukupno uvezene količine tekstilnog otpada, 43,7% metalnog otpada uvezeno je Njemačke.

*Analysis of data on the import of textile waste in the period 2014-2023. indicates a changing trend of growth and decline in imported quantities of this waste. In 2023, an increase in imports was observed, the amount of imported textile waste was 0.4% higher compared to 2022. During 2023, of the total amount of textile waste imported, 43.7% of metal waste was imported by Germany.*

#### Graf 9. Uvoz tekstilnog otpada, 2014-2023.

Graph 9. Import of textile waste, 2014-2023

## 2.3 UVOZ OTPADNOG PAPIRA I KARTONA

*IMPORT OF WASTE PAPER AND CARDBOARD*

Analiza podataka o uvozu otpadnog papira i kartona u periodu 2014-2023. ukazuje na promjenjiv trend rasta i pada uvezenih količina tokom posmatranog perioda. U 2023. godini količina uvezenog otpadnog papira i kartona je veća za 54,1 u odnosu na 2022. godinu. Tokom 2023. godine od ukupno uvezene količine otpadnog papira i kartona, 49,8% otpadnog papira i kartona uvezeno je iz Mađarske.

*Analysis of data on the import of waste paper and cardboard in the period 2014-2023 indicates a changing trend of growth and decline in imported quantities during the observed period. In 2023, the amount of imported waste paper and cardboard is 54.1 more than in 2022. During 2023, of the total amount of waste paper and cardboard imported, 49.8% of waste paper and cardboard was imported from Hungary.*

### Graf 10. Uvoz otpadnog papira i kartona, 2014-2023.

*Graph 10. Import of waste paper and cardboard, 2014-2023*

## 2.4 UVOZ PLASTIČNOG OTPADA

*IMPORT OF PLASTIC WASTE*

U 2023. godini količina uvezenog plastičnog otpada je za 39,9% manja u odnosu na 2022. godinu. Tokom 2023. godine od ukupno uvezene količine plastičnog otpada, 52,8% plastičnog otpada uvezeno je iz Hrvatske.

*In 2023, the amount of imported plastic waste is 39.9% less than in 2022. During 2023, of the total amount of plastic waste imported, 52.8% of plastic waste was imported from Croatia.*

### Graf 11. Uvoz plastičnog otpada, 2014-2023.

*Graph 11 Import of plastic waste, 2014-2023*

## 2.5 UVOZ NEOPASNE ŠLJAKE I PEPELA

*IMPORT OF WASTE SLUDGE AND ASH*

Analiza podataka o uvozu neopasne šljake i pepela iz toplinskih procesa u periodu 2014-2023. ukazuje na promjenjiv trend pada i rasta uvezenih količina. Tokom 2023. godine od ukupno uvezene količine neopasne šljake i pepela, 75% neopasne šljake i pepela uvezeno je iz Hrvatske.

*The analysis of data on the import of non-hazardous slag and ash from thermal processes in the period 2014-2023 indicates a changing trend of falling and growing imported quantities. During 2023, of the total imported amount of non-hazardous slag and ash, 75% of non-hazardous slag and ash was imported from Croatia.*

**Graf 12. Uvoz neopasne šljake i pepela, 2023.**

*Graph 12. Import of non-hazardous waste sludge and ash, 2023*

## 2.6 UVOZ GUMENOG OTPADA

*IMPORT OF RUBBER WASTE*

U 2023. godini uočen je rast uvoza, količina gumenog otpada. U 2023. godini od ukupno uvezene količine gumenog otpada, 73,9% gumenog otpada uvezeno je iz Srbije.

*In 2023, a growth in imports and the amount of rubber waste was observed. In 2023, of the total amount of rubber waste imported, 73,9% of rubber waste was imported from Serbia.*

**Graf 13. Države iz kojih se uvozio gumeni otpad, 2023.**

*Graph 13. Countries from which rubber waste was imported, 2023*

## METODOLOŠKA OBJAŠNJENJA

Zbog nedostatka podataka u Bosni i Hercegovini o uvozu/izvozu neopasnog otpada prema Regulativi 259/93/EEC o prekograničnom prometu otpada, Odsjek za statistiku životne sredine Agencije za statistiku BiH je preduzeo aktivnosti na obradi dostupnih podataka statistike spoljne trgovine.

Razvoj i proizvodnja statistike spoljne trgovine u BiH se odvija kroz statističke institucije. Osnova razvoja je utvrđena evropskim propisima i stoga je statistika spoljne trgovine u velikoj mjeri uskladjeni sa zemljama EU. Osnovni izvor podataka je Jedinstvena carinska isprava (JCI). Agencija za statistiku BiH dobija potrebne podatke iz Jedinstvenih carinskih isprava od Uprave za indirektno oporezivanje BiH, u skladu sa Protokolom o saradnji potpisanim između ove dvije institucije.

Podaci o izvezenim/uvezenim količinama neopasnog otpada su dobijeni na osnovu obrade baze podataka statistike spoljne trgovine. Baza sadrži podatke koji su relevantni za statistiku o uvozu i izvozu otpada.

Ovi podaci uključuju sljedeće elemente:

- Opis robe
- Količine kojima se trguje u tonama
- Zemlja porijekla i odredište
- Dostupne su i druge informacije kao što je vrijednost robe, ali one nisu relevantne za statistiku uvoza i izvoza otpada u kontekstu Regulative o statistici otpada 2150/2002/EC.

CN - (Kombinovana nomenklatura - Combined Nomenclature) je klasifikacija roba unutar EU za potrebe prikupljanja carina, statističko praćenje spoljne trgovine, te za primjenu posebnih mjera u okviru trgovinske, poljoprivredne, fiskalne i monetarne politike EU. Ona se zasniva na međunarodnoj klasifikaciji harmonizovanog sistema, koju sastavlja Svjetska carinska organizacija, a Evropska unija dopunjava se svojim potpodjelama tzv. CN podnaslovima.

Kombinovana nomenklatura se sastoji od oko 10 000 različitih kodova koji opisuju robu. Od tih kodova, oko 250 su kodovi koji se sastoje od ili sadrže otpad, a koji bi mogli biti osnova za prikupljanje statističkih podataka o uvozu i izvozu otpada za različite materijale. Obradom baze podataka statistike vanjske trgovine su ekstraktovani tarifni brojevi (CN kodovi) koji sadrže otpad.

Izbor tih kodova bio je zasnovan na osnovu procjene i identifikacije koju je uradio Njemački zavod za statistiku, kao i dopuna koje je predložila Savezna Agencija zaštite životne sredine UBA (Federal Environment Agency).

Svi izabrani kodovi nisu bili pogodni za prikupljanje statističkih podataka o uvozu i izvozu otpada i taj broj je morao biti smanjen zbog toga što:

- Neki kodovi sadrže i otpad i proizvod u istom kodu
- Neki kodovi sadrže otpad koji je u potpunosti ili djelomično obuhvaćen izvještavanjem u skladu s Regulativom 259/93/EEC o prekograničnom prometu otpada.

## NOTES ON METHODOLOGY

*Due to lack of information in Bosnia and Herzegovina on import/export of non-hazardous waste according to 259/93/EEC Regulation on the transboundary movement of waste, the Department of Environmental Statistics of Statistics Agency Bosnia and Herzegovina has taken action to process the available data of external trade statistics.*

*Development and production of external trade statistics in BiH is done through statistical institutions. Basis for the development is defined by European regulations and therefore the statistics of foreign trade is largely in line with EU countries. The main data source is the Unique Customs Declaration (UCD). Agency for Statistics receives the necessary data from the single administrative document of the Indirect Taxation Authority, in accordance with the Protocol on Cooperation signed between the two institutions.*

*Data on exported/imported quantities of non-hazardous waste were obtained from processing databases of external trade statistics. The database contains information that is relevant to statistics on import and export of waste.*

*These data include the following elements:*

- *Description of goods*
- *The quantities traded in tons*
- *Country of origin and destination*
- *There are also other information such as the value of the goods, but they are not relevant to statistics on imports and exports of waste in the context of Regulation 2150/2002/EC on waste statistics.*

*CN - (Combined Nomenclature) the classification of goods within the EU for the purpose of collecting customs duties, statistical monitoring of foreign trade, and for the implementation of special measures in the commercial, agricultural, fiscal and monetary policy. It is based on the international harmonized system of classification, compiled by the World Customs Organization and the European Union to complement its subclasses so. CN subheadings.*

*Combined Nomenclature comprises about 10.000 different codes that describe the goods. Of these codes, about 250 codes that consist of or contain waste, which could be the basis for collecting statistical data on imports and exports of waste for different materials. Processing of a database of external trade statistics are extracted tariff numbers (CN codes) containing waste.*

*The choice of these codes was based on an assessment and identification conducted by German Bureau of Statistics, as well as amendments proposed by the Federal Environment Agency UBA. All selected codes were not suitable for collecting statistical data on imports and exports of waste and this figure has to reduce because:*

- *Some codes contain waste and products in the same code*
- *Some codes may contain waste which is wholly or partly covered by the reporting in accordance with Regulation 259/93/ EEC on transboundary movement of waste.*

Ovo su neki od zaključaka o prikladnosti korištenja spoljnotrgovinske statistike za potrebe statistike uvoza/ozvoza otpada:

1. Za neke vrste otpada kao što je metalni otpad, papir i karton, staklo i plastični otpad, tekstilni otpad i otpad od sagorijevanja (pepeo i šljaka), gumeni otpad, statistika vanjske trgovine omogućava relevantne podatke o uvozu i izvozu otpada, i ti podaci se mogu koristiti kao dopuna podacima zasnovanim na Regulativi o prekograničnom prometu otpada.
2. Za druge vrste otpada kao što su otpad elektroničke opreme i otpad iz poljoprivredno-prehrambene industrije, vanjskotrgovinska statistika ne pruža dobru osnovu za statistiku o uvozu i izvozu otpada, budući da se podaci o otpadu i proizvodima obično kombinuju u istom kodu Kombinovane nomenklature.
3. Podaci statistike vanjske trgovine imaju češću frekvenciju proizvodnje podataka u odnosu na frekvenciju koja je zahtjevana u Regulativi o statistici otpada, dostupni su na vrijeme i uz poštovanje rokova.
4. Potrebni podaci o uvozu i izvozu otpada se mogu lako izvaditi iz postojeće baze podataka statistike spoljne trgovine, i stoga korištenje tih podataka za potrebe Regulative o statistici otpada uključuje malo, ili je to bez ikakvih dodatnih troškova.
5. Metodologija koja se primjenjuje u Njemačkoj bi se u načelu mogla koristiti od strane svih država članica EU i šire.

CN - Kombinovana nomenklatura i statistička EWC-Stat klasifikacija su uopšteno klasifikacije koje se zasnivaju na glavnom materijalu ili proizvodu. Kombinovana nomenklatura je mnogo detaljnija od EWC-Stat klasifikacije, i iz toga razloga nije previše teško pripisati kodove Kombinovane nomenklature za jednu od kategorija u EWC-Stat klasifikaciji.

Za potrebe izračunavanja statistike o uvozu i izvozu metalnog otpada, predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWC-Stat klasifikacijom, na agregiranom nivou šifre 6- neopasni metalni otpad. CN kodovi 79031000 (cink prašina), 79039000 (cink prah), i 81121300 (otpad berilija i ostaci) nisu uključeni jer mogu djelomično biti obuhvaćeni Regulativom o prekograničnom prometu otpada.

Za potrebe izračunavanja statistike o uvozu i izvozu staklenog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWC-Stat klasifikacijom, na agregiranom nivou šifre 7.1 -neopasni stakleni otpad.

Za potrebe izračunavanja statistike o uvozu i izvozu otpadnog papira i kartona predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWC-Stat klasifikacijom, na agregiranom nivou šifre 7.2- otpad papira i kartona.

*These are some of the conclusions about the appropriateness of using the foreign trade statistics for statistics of import/export of waste:*

1. *For some types of waste such as scrap metal, paper and cardboard, glass and plastic waste, textile waste and combustion (ash and slag), rubber waste, foreign trade statistics to the relevant data on imports and exports waste and these data can be used as a supplement to the data based on the Regulation on the transboundary movement of waste.*
2. *For other types of waste such as scrap electronic equipment and waste from the agrifood industry, foreign trade statistics do not provide a good basis for statistics on import and exports of waste and products are usually combined in the same code of Combined Nomenclature.*
3. *The data of external trade statistics have higher frequency of production data is relation to the frequency that is required by the Regulation on waste statistics, and they are available on time and respecting deadlines.*
4. *Necessary data on import and export of waste can be easily removed from on existing database of external trade statistics, and therefore use these data for purposes of Regulation on waste statistics involve little or no additional cost.*
5. *The methodology applied in Germany could in principle be used by all EU member states and beyond.*

*CN - Combined Nomenclature and EWC-Stat Classification are generally based on the main material or product. The Combined Nomenclature is much more detailed than EWC-Stat Classification, and for this reason is not too difficult to attribute codes to Combined Nomenclature for one of the categories in EWC-Stat classification.*

*For purposes of calculating the statistics of imports and exports of scrap metal, codes proposed to represent the best estimate that can be linked with EWC- Stat Classification, at the aggregate level Code 6. non-hazardous metal waste. CN codes 79031000 (zinc dust) 79039000 (zinc powder), and 81121300 (beryllium waste and residues) are not included because partially they can be covered by Regulation on the transboundary movement of waste.*

*For purpose of calculating statistics on import and export of waste glass codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.1- non- hazardous glass waste.*

*For purposes of calculating the statistics of imports and exports of waste paper and cardboard codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.2- waste paper and cardboard.*

Za potrebe izračunavanja statistike o uvozu i izvozu plastičnog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.4- plastični otpad.

Za potrebe izračunavanja statistike o uvozu i izvozu tekstilnog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.6 -tekstilni otpad.

Za potrebe izračunavanja statistike o uvozu i izvozu neopasne šljake i pepela iz toplinskih procesa predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 12.42 - neopasna šljaka i pepeo iz toplinskih procesa.

Za potrebe izračunavanja statistike o uvozu i izvozu gumenog otpada predloženi su kodovi koji predstavljaju najbolje procjene koje se mogu povezati sa EWCStat klasifikacijom, na agregiranom nivou šifre 7.3 - gumeni otpad.

Obrađeni podaci statistike vanjske trgovine za ovih sedam grupa otpada su dobar način da se stekne uvid u tokove ovih kategorija otpada u Bosni i Hercegovini.

*For purposes of calculating statistics on import and export of plastic waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.4 – plastic waste.*

*For purposes of calculating the statistics of imports and exports of textile waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level Code 7.6- textile waste.*

*For purposes calculating the statistics of imports and exports of non-hazardous slag and ash from thermal processes codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level 12.42- non-hazardous sludge and ash from thermal processes.*

*For purposes calculating the statistics of imports and exports of rubber waste codes proposed to represent the best estimate that can be linked with EWC-Stat Classification, at the aggregate level 7.3- rubber waste.*

*The processed data of external trade statistics for these seven groups of waste are a good way to gain insight into the flow of waste in Bosnia and Herzegovina.*
