GODINA/YEAR XVII

SARAJEVO, 20.02.2024.

BROJ/NUMBER 2

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U IV KVARTALU 2023.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 4th QUARTER
OF 2023.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u četvrtom kvartalu 2023. godine je veća za 2,47% u odnosu na isti period 2022. godine. Proizvodnja sortimenata četinarskih vrsta drveća veća je za 6,04%, a proizvodnja sortimenata lišćarskih vrsta je manja za 0,63%.

Proizvodnja trupaca četinarara veća je za 3,21% i proizvodnja trupaca lišćara bilježi rast od 2,52%. Rast proizvodnje u odnosu na četvrti kvartal 2022. godine bilježi se kod janskog drveta četinarara za 6,30% i kod prostornog drveta četinarara za 13,94%, dok se pad bilježi kod sljedećih šumskih sortimenata: ostalo drugo drvo četinarara za 11,81%, prostorno drvo lišćara za 13,41% i ogrjevno drvo lišćara za 1,16%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrjevnog drveta četinarara i janskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in 4th quarter of 2023 is higher by 2,47% compared to the same period in 2022.

Production of coniferous (softwood) assortments is higher by 6,04%, while production of broadleaf (hardwood) assortments is lower by 0,63%.

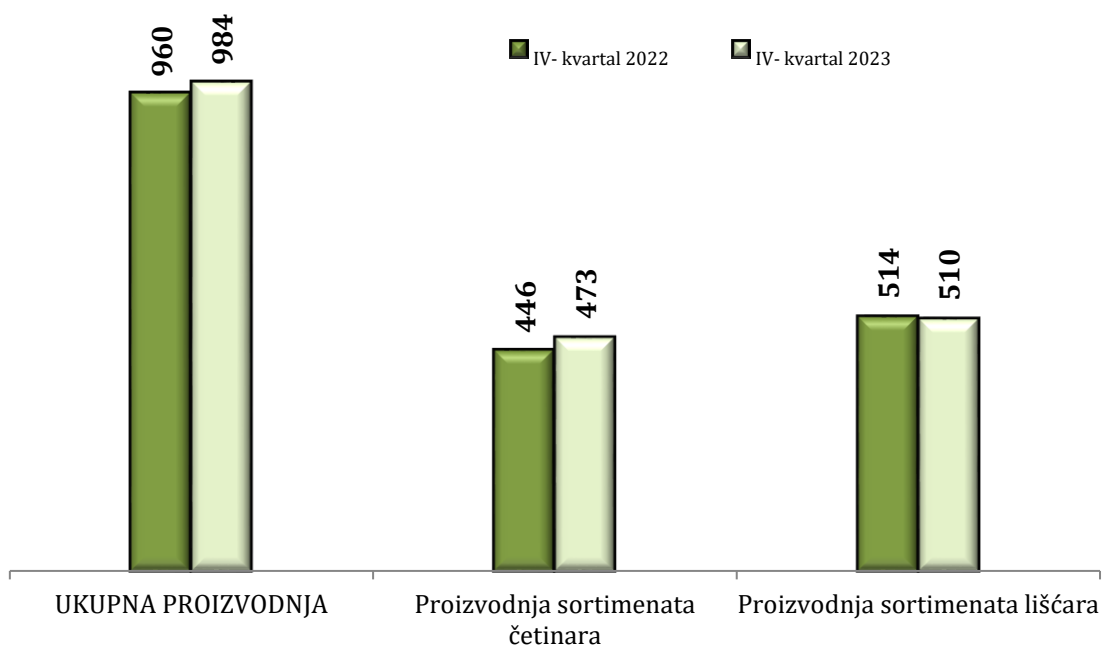

Production of coniferous logs increased by 3,21% and the production of hardwood logs recorded agrowth of 2,52%. Growth in production compared to the fourth quarter of 2022 was recorded for mining wood conifers by 6,30% and in cordwood coniferous by 13,94%, while a decrease was recorded in the following forest assortments: other long wood coniferous by 11,81%, cordwood broadleaf by 13,41% and fuelwood broadleaf by 1,16%. In the production of other roughly processed wood, conifer firewood and hardwood pit wood, we are dealing with small quantities of assortments whose variation in the produced quantities has no effect on changes in the total production of forest assortments.

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U IV KVARTALU 2023

 Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 4th QUARTER OF 2023

	Proizvodnja (Production)			Prodaja (Sale)			
	IV kvartal 4 th quarter 2022	IV kvartal 4 th quarter 2023	Indeksi <i>Indicies</i> <u>X-XII 2023</u> X-XII 2022	IV kvartal 4 th quarter 2022	IV kvartal 4 th quarter 2023	Indeksi <i>Indicies</i> <u>X-XII 2023</u> X-XII 2022	
	m ³			m ³			
UKUPNO	960.213	983.934	102,47	983.117	985.035	100,20	TOTAL
ČETINARA	446.494	473.476	106,04	475.241	499.536	105,11	CONIFEROUS
LIŠĆARA	513.719	510.458	99,37	507.876	485.499	95,59	BROAD LEAF
Trupci četinarara	292.320	301.701	103,21	310.000	324.656	104,73	Logs, coniferous
Jamsko drvo četinarara	25.262	26.854	106,30	27.304	28.247	103,45	Mining wood, coniferous
Ostalo dugo drvo četinarara	4.754	4.192	88,19	5.029	4.286	85,22	Other long wood, coniferous

Prostorno drvo liščara	19.265	16.681	86,59	19.536	17.001	87,02	Cordwood, broadleaf
Ogrjevno drvo četinarara	965	385	-	1.144	721	-	Fuelwood, coniferous
Ogrjevno drvo liščara	345.749	341.725	98,84	345.962	319.048	92,22	Fuelwood, broadleaf
Ostalo grubo obradeno drvo	15	0	-	6	0	-	Other wood, roughly worked

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - IV kvartal 2022. i 2023. god.

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u IV kvartalu 2023. god.

Percentage participation of different assortments in total production of forest assortments in 4th quarter of 2023

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvnu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarima ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarima i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so called noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
