GODINA/YEAR XVII

SARAJEVO, 19.03.2024.

BROJ/NUMBER 3

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA, PRODAJA I ZALIHE ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U 2023.

PRODUCTION, SALES AND STOCKS OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 2023.

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u 2023. godini je manja za 4,09% u odnosu na isti period 2022. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 0,32%, proizvodnja sortimenata lišćarskih vrsta također je manja za 7,65%.

Proizvodnja trupaca četinara manja je za 1,70% i proizvodnja trupaca lišćara bilježi pad od 5,99%. Rast proizvodnje u odnosu na 2022. godinu bilježi se kod prostornog drveta četinara za 5,44% i kod ostalog dugog drveta lišćara za 3,36%. Pad proizvodnje se bilježi kod sljedećih šumskih sortimenata: kod ostalog dugog drveta četinara od 5,82%, janskog drveta četinara za 3,97%, janskog drveta lišćara za 16,30%, prostornog drveta lišćara za 13,90% i ogrjevnog drveta lišćara za 8,16%. Kod proizvodnje ostalog grubo obrađenog drveta i ogrjevnog drveta četinara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

The total production of forest assortments in Bosnia and Herzegovina in 2023 has been decreased by 4,09% compared to the same period in 2022. The production of assortments of coniferous tree species decreased by 0,32%, the production of assortments of broadleaf also decreased by 7,65%.

The production of conifer logs decreased by 1,70% and the production of hardwood logs registered a decrease of 5,99%. Growth in production compared to 2022 is recorded for the cordwood, coniferous by 5,44% and other long wood broadleaf by 3,36%. Decrease in production was recorded in the following forest assortments: in other long coniferous wood of 5.82%, mining wood of coniferous by 3,97%, mining wood, broadleaf by 16,30%, cordwood, broadleaf by 13,90% and fuelwood, broadleaf by 8,16%. In the production of other roughly processed wood and conifer firewood, we are dealing with small quantities of assortments whose variations in the produced quantities have no effect on changes in the total production of forest assortments.

Tabela 1. PROIZVODNJA, PRODAJA I ZALIHE ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U 2023. GODINI

Table 1. PRODUCTION, SALES AND STOCKS OF FOREST ASSORTMENTS IN 2023

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 2022. i 2023. god. u 1000 m³

Production of forest assortments in Bosnia and Herzegovina in 2022 and 2023 in 1000 m³

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u 2023. god.

Percentage participation of different assortments in total production of forest assortments in 2023

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here. The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarina i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
