NOTES OF METHODOLOGY

Data on railway transport were obtained by processing monthly and quarterly statistical data from surveys conducted by the Statistical Offices at the level of entities. The reporting units for these surveys are enterprises and other business subjects engaged in domestic and international transport of passengers and goods.

DEFINITIONS

Considered as transport is movement of passengers or cargo from one place (loading place) to another place (unloading place) and representing the operation of transport enterprises.

Domestic transport implies transport of passenger between places of loading and unloading within the borders of the country.

International transport implies transport of passengers between the place of loading in our country and the place of unloading abroad, or the other way round.

Transport of passengers include transported passengers into domestic and international transport.

Passenger kilometre is a unit of measure which refers to transport of one passenger at the distance of one kilometre.

Goods are any goods transported by railway transport means.

Goods transport is given in tons and ton kilometres, and it is the sum of all kilometres realized in domestic and international transport.

Tonne kilometre is a unit of measure which refers to transport of one tone of goods at the distance of one kilometre.
