## POLJOPRIVREDA I ŠUMARSTVO

### AGRICULTURE AND FORESTRY

#### PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U IV KVARTALU 2024.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 4<sup>th</sup> QUARTER  
OF 2024.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u četvrtom kvartalu 2024. godine je manja za 17,43% u odnosu na isti period 2023. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 11,25%, a proizvodnja sortimenata lišćarskih vrsta za 23,16%.

Proizvodnja trupaca četinarara manja je za 14,30% i proizvodnja trupaca lišćara bilježi pad od 25,69%. Rast proizvodnje u odnosu na četvrti kvartal 2023. godine bilježi se kod ostalog dugog drveta četinarara za 15,52%, dok se pad bilježi kod sljedećih šumskih sortimenata: jamskog drveta četinarara za 23,80%, prostornog drveta četinarara za 2,92%, prostornog drveta lišćara za 38,74% i ogrjevnog drveta lišćara za 21,83%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrjevnog drveta četinarara, jamskog drveta lišćara i ostalog dugog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

The total production of forest assortments in Bosnia and Herzegovina in 4<sup>th</sup> quarter of 2024 is 17,43% lower than in the same period in 2023. The production of coniferous (softwood) assortments is 11,25% lower, and the production of broadleaf (hardwood) assortments is lower by 23,16%.

The production of coniferous logs is 14,30% lower and the production of hardwood logs is 25,69%. Growth in production compared to the fourth quarter of 2023 is recorded in other long coniferous wood by 15,52%, while the decrease is recorded in the following forest assortments: mining wood coniferous by 23,80%, cordwood coniferous by 2,92%, cordwood broadleaf by 38,74% and fuelwood broadleaf by 21,83%. In the production of other roughly processed wood, conifer firewood and hardwood pit wood, we are dealing with small quantities of assortments whose variation in the produced quantities has no effect on changes in the total production of forest assortments.

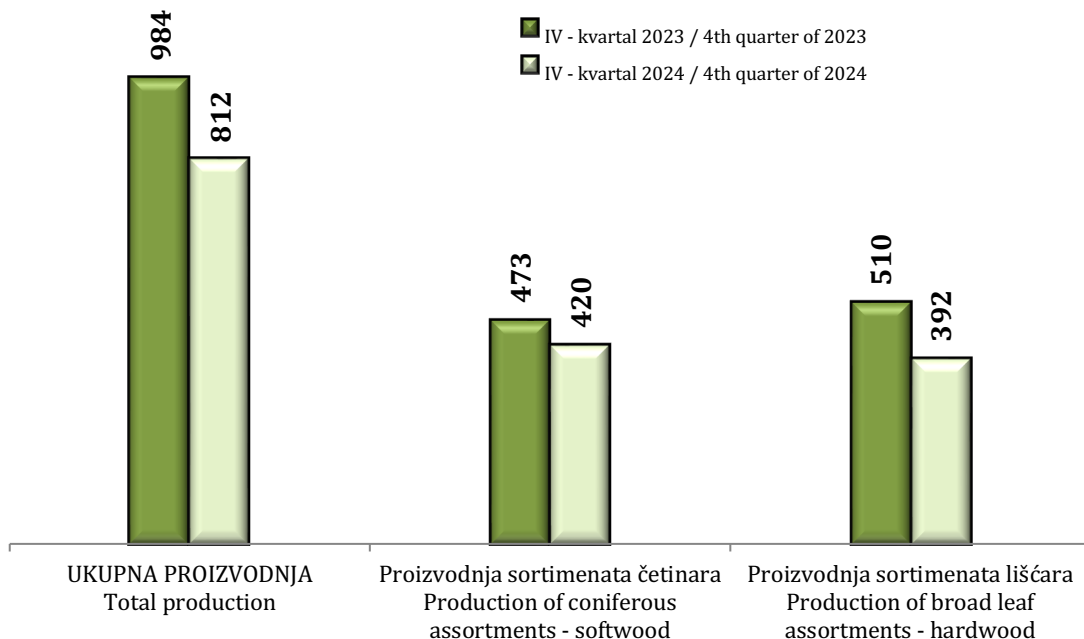

**Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U IV KVARTALU 2024**

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 4<sup>th</sup> QUARTER OF 2024

**Graf.1 Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m<sup>3</sup> - IV kvartal 2023. i 2024. god.**

Production of forest assortments in Bosnia and Herzegovina in 1000 m<sup>3</sup> - 4<sup>th</sup> quarter of 2023 and 2024

**Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u IV kvartalu 2024. god.**

*Percentage participation of different assortments in total production of forest assortments in 4<sup>th</sup> quarter of 2024*

### Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

**Četinari** su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

### Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

**Coniferous** are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

**Lišćari** su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

**Trupci** su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

**Jamsko drvo** obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

**Ostalo dugo drvo** obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

**Prostorno drvo** obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

**Ogrjevno drvo** je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

**Ostalo grubo obrađeno drvo** obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

**Broad leaf** are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

**Logs** are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

**Mining wood** include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

**Other long wood** includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

**Cordwood** include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

**Fuelwood** is wood intended for heating or production of charcoal.

**Other wood, roughly worked** is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
