GODINA/YEAR XVII

SARAJEVO, 21.03.2025.

BROJ/NUMBER 3

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA, PRODAJA I ZALIHE ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U 2024.

PRODUCTION, SALES AND STOCKS OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 2024.

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u 2024. godini je manja za 3,32% u odnosu na isto razdoblje 2023. godine. Proizvodnja sortimenata četinjača veća je za 2,41%, dok je proizvodnja sortimenata listača manja za 9,16%.

Proizvodnja trupaca četinjača manja je za 1,95% i proizvodnja trupaca listača bilježi pad od 9,78%. Rast proizvodnje u odnosu na 2023. godinu bilježi se kod prostornog drveta četinjača za 16,08%, kod ostalog dugog drveta listača za 40,58% i kod ostalog dugog drveta četinjača za 42,99%. Pad proizvodnje se bilježi kod sljedećih šumskih sortimenata: kod janskog drveta četinjača za 9,62%, kod janskog drveta listača za 44,72%, kod prostornog drveta listača za 46,53% i kod ogrjevnog drveta listača za 7,51%. Kod proizvodnje ostalog grubo obrađenog drveta i ogrjevnog drveta četinjača radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema utjecaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

The total production of forest assortments in Bosnia and Herzegovina in 2024 has been decreased by 3,32% compared to the same period in 2023. The production of assortments of coniferous tree species increased by 2,41%, while the production of assortments of broadleaf is lower by 9,16%.

The production of conifer logs decreased by 1,95% and the production of hardwood logs registered a decrease of 9,78%. The increase in production compared to 2023 is recorded for coniferous cordwood by 16,08%, for other long broadleaf wood by 40,58% and for other long wood, coniferous by 42,99%. The decrease in production is recorded for the following forest assortments: for coniferous mining wood by 9,62%, for broadleaf mining wood by 44,72%, for broadleaf cordwood by 46,53% and for broadleaf fuelwood by 7,51%. In the production of other roughly processed wood and conifer firewood, we are dealing with small quantities of assortments whose variations in the produced quantities have no effect on changes in the total production of forest assortments.

Graf 1. Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 2023. i 2024. god. u 1000 m³

Production of forest assortments in Bosnia and Herzegovina in 2023 and 2024 in 1000 m³

Graf 2. Postotni udio pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u 2024. god.

Percentage participation of different assortments in total production of forest assortments in 2024

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom priopćenju, urađeni su na temelju rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečno izvješće podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma temeljna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinjače su vrste drveća iz klase golosjemenica (Gymnospermae), pretežito iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinjača ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Listače su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća listača kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih listača iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih listača. Drvo lišćara je složenije građe u odnosu na drvo četinjača i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za daljnju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvaća šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvaća tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvaća drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u kemskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrijevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog ugljena.

Ostalo grubo obrađeno drvo obuhvaća sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so called noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
