GODINA/YEAR XVII

SARAJEVO, 23.05.2025.

BROJ/NUMBER 2

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U I KVARTALU 2025.

PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 1st QUARTER OF 2025.

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u prvom kvartalu 2025. godine je manja za 21,95% u odnosu na isti period 2024. godine. Proizvodnja sortimenata četinarskih vrsta drveća manja je za 21,26% i proizvodnja sortimenata lišćarskih vrsta je manja za 22,77%.

Proizvodnja trupaca četinara manja je za 20,84% i proizvodnja trupaca lišćara bilježi pad od 18,87%. Pad proizvodnje u odnosu na prvi kvartal 2024. godine se bilježi: kod janskog drveta četinara 33,29%, kod ostalog dugog drveta četinara 3,52%, kod prostornog drveta četinara 20,41%, kod ostalog dugog drveta lišćara 51,92% i kod ogrijevnog drveta lišćara za 24,95%. Dok se rast proizvodnje bilježi kod prostornog drveta lišćara za 6,46%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrijevnog drveta četinara i janskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

Total production of forest assortments in Bosnia and Herzegovina in the first quarter of 2025 is lower by 21,95% compared to the same period in 2024. The production of coniferous (softwood) assortments is lower by 21,26% and the production of assortments of broadleaf (hardwood) is lower by 22,77%.

Production of coniferous logs decreased by 20,84% and the production of hardwood logs recorded a decline of 18,87%. Decline in production compared to the first quarter of 2024 is recorded: in the case of coniferous mining wood 33,29%, in the case of coniferous other long wood 3,52%, in coniferous cordwood 20,41%, in broadleaf other long wood 51,92% and in broadleaf fuelwood 24,95%. While the growth of production is recorded in the case of broadleaf cordwood 6,46%. Broadleaf mining wood, other roughly worked wood and coniferous fuelwood are produced in small quantities and changes in produced quantities do not affect variations in total production of forest assortments.

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U I KVARTALU 2025
Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 1st QUARTER OF 2025

	Proizvodnja (Production)			Prodaja (Sale)

Ostalo grubo obrađeno drvo	0	2	-	0	2	-	Other wood, roughly worked

Graf.1 Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - I kvartal 2024. i 2025. god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 1st quarter of 2024 and 2025

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u I kvartalu 2025. god.

Percentage participation of different assortments in total production of forest assortments in 1st quarter of 2025

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarima ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarima i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drvni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruč, pletarski štapovi, pruće i sl.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

Coniferous are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
