GODINA/YEAR XVII

SARAJEVO, 18.11.2025.

BROJ/NUMBER 2

POLJOPRIVREDA I ŠUMARSTVO

AGRICULTURE AND FORESTRY

PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U III KVARTALU 2025.

*PRODUCTION AND SALES OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 3rd QUARTER
OF 2025.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u trećem kvartalu 2025. godine je veća za 10,80% u odnosu na isti period 2024. godine. Proizvodnja sortimenata četinarskih vrsta drveća veća je za 15,25% i proizvodnja sortimenata lišćarskih vrsta je veća za 6,10%.

Proizvodnja trupaca četinara veća je za 9,87% i proizvodnja trupaca lišćara bilježi rast od 0,86%. Rast proizvodnje u odnosu na treći kvartal 2024. godine se bilježi: kod janskog drveta četinara za 14,49%, ostalog dugog drveta četinara za 73,70%, prostornog drveta četinara 25,17%, prostornog drveta lišćara za 53,95% i kod ogrijevnog drveta lišćara za 7,72%. Dok se pad proizvodnje bilježi kod ostalog dugog drveta lišćara za 26,85%. Kod proizvodnje ostalog grubo obrađenog drveta, ogrjevnog drveta četinara i janskog drveta lišćara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

The total production of forest assortments in Bosnia and Herzegovina in the third quarter of 2025 is higher by 10,80% compared to the same period in 2024. The production of coniferous (softwood) assortments is for 15,25% higher and the production of broadleaf (hardwood) is for 6,10% higher.

The production of coniferous logs increased by 9,87% and the production of broadleaf logs recorded a growth by 0,86%. Production growth compared to the third quarter of 2024 was recorded: for coniferous mining wood by 14,49%, for other long coniferous wood by 73,70%, for coniferous cordwood by 25,17%, for broadleaf cordwood by 53,95%, and for broadleaf fuelwood by 7,72%. While the decrease in production was recorded for broadleaf other long wood by 26,86%. In the production of other roughly worked wood, coniferous fuelwood and broadleaf mining wood, we are talking about small quantities of assortments whose variation in the produced quantities has no effect on changes in the total production of forest assortments.

Tabela 1. PROIZVODNJA I PRODAJA ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U III KVARTALU 2025

Table 1. PRODUCTION AND SALE OF FOREST ASSORTMENTS IN 3rd QUARTER OF 2025

	Proizvodnja (Production)			Prodaja (Sale)			
	III kvartal 3 rd quarter 2024	III kvartal 3 rd quarter 2025	Indeksi <i>Indicies</i> <u>X-XII 2025</u> X-XII 2024	III kvartal 3 rd quarter 2024	III kvartal 3 rd quarter 2025	Indeksi <i>Indicies</i> <u>X-XII 2025</u> X-XII 2024	
	m ³			m ³			
UKUPNO	974.630	1.079.855	110,8	1.016.830	1.142.665	112,4	TOTAL
ČETINARA	500.506	576.811	115,2	505.145	610.175	120,8	CONIFEROUS
LIŠĆARA	474.124	503.044	106,1	511.684	532.491	104,1	BROAD LEAF
Trupci četinarara	326.326	358.537	109,9	352.101	372.656	105,8	Logs, coniferous
Jamsko drvo četinarara	23.264	26.636	114,5	21.994	30.035	136,6	Mining wood, coniferous
Ostalo dugo drvo četinarara	5.832	10.130	173,7	5.419	10.380	191,5	Other long wood, coniferous
Prostorno drvo četinarara	144.894	181.364	125,2	125.350	196.713	156,9	Cordwood, coniferous
Trupci liščara	138.702	139.895	100,9	148.807	132.931	89,3	Logs, broadleaf
Jamsko drvo lišćara	14	29	-	28	27	-	Mining wood, broadleaf
Ostalo dugo drvo liščara	6.245	4.568	73,1	6.803	3.704	54,4	Other long wood, broadleaf
Prostorno drvo lišćara	9.845	15.157	153,9	11.234	17.938	159,7	Cordwood, broadleaf
Ogrjevno drvo četinarara	192	145	-	282	391	-	Fuelwood, coniferous
Ogrjevno drvo lišćara	318.776	343.390	107,7	344.271	377.884	109,8	Fuelwood, broadleaf
Ostalo grubo obrađeno drvo	541	5	-	541	6	-	Other wood, roughly worked

Graf.1 Proizvodnja šumskih sortimenata u Bosni i Hercegovini u 1000 m³ - III kvartal 2024. i 2025. god.

Production of forest assortments in Bosnia and Herzegovina in 1000 m³ - 3rd quarter of 2024 and 2025

Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u III kvartalu 2025. god.

Percentage participation of different assortments in total production of forest assortments in 3rd quarter of 2025

Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovitog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva preduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

Četinari su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom

Lišćari su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinara i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

Trupci su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namijenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

Jamsko drvo obuhvata šumske drvne sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

Ostalo dugo drvo obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

Prostorno drvo obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

Ogrjevno drvo je drvo namijenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

Ostalo grubo obrađeno drvo obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here.

The given quantities represent net volume measured in cubic meters

commercial tree species: European Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

Broad leaf are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

Logs are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

Mining wood include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

Other long wood includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

Cordwood include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

Fuelwood is wood intended for heating or production of charcoal.

Other wood, roughly worked is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
