BROJ/NUMBER 3

## POLJOPRIVREDA I ŠUMARSTVO

### AGRICULTURE AND FORESTRY

#### PROIZVODNJA, PRODAJA I ZALIHE ŠUMSKIH SORTIMENATA U BiH PREMA ASORTIMANU U 2025.

*PRODUCTION, SALES AND STOCKS OF FOREST ASSORTMENTS IN BOSNIA AND HERZEGOVINA IN 2025.*

Ukupna proizvodnja šumskih sortimenata u Bosni i Hercegovini u 2025. godini je veća za 5,52% u odnosu na isti period 2024. godine. Proizvodnja sortimenata četinarskih vrsta drveća veća je za 6,31%, dok je proizvodnja sortimenata lišćarskih vrsta veća za 4,60%.

Proizvodnja trupaca četinara veća je za 4,35% i proizvodnja trupaca lišćara bilježi rast od 3,51%. Rast proizvodnje u odnosu na 2024. godinu bilježi se kod janskog drveta četinara za 4,64%, kod ostalog dugog drveta četinara za 61,67%, kod prostornog drveta četinara za 8,86%, prostornog drveta lišćara za 40,13% i kod ogrjevnog drveta lišćara za 4,62%. Pad proizvodnje se bilježi kod janskog drveta lišćara za 57,14% i kod ostalog dugog drveta lišćara za 25%.

Kod proizvodnje ostalog grubo obrađenog drveta i ogrijevnog drveta četinara radi se o malim količinama sortimenata čije variranje u proizvedenim količinama nema uticaja na promjene u ukupnoj proizvodnji šumskih sortimenata.

The total production of forest assortments in Bosnia and Herzegovina in 2025 has been increased by 5,52% compared to the same period in 2024. The production of assortments of coniferous tree species increased by 6,31%, while the production of assortments of broadleaf is also higher by 4,60%.

The production of conifer logs increased by 4,35% and the production of hardwood logs registered a increase of 3,51%. The increase in production compared to 2024 is recorded for coniferous mining wood by 4,64%, for coniferous other long wood by 61,67%, for coniferous cordwood by 8,86%, for broadleaf cordwood by 40,13% and for broadleaf fuelwood 4,62%. The decrease in production is recorded for broadleaf mining wood by 57,14% and for broadleaf other long wood by 25%. In the production of other roughly processed wood and conifer firewood, we are dealing with small quantities of assortments whose variations in the produced quantities have no effect on changes in the total production of forest assortments.

Tabela 1. PROIZVODNJA, PRODAJA I ZALIHE ŠUMSKIH SORTIMENATA PREMA ASORTIMANU U 2025. GODINI

*Production of forest assortments in Bosnia and Herzegovina in 2024 and 2025 in 1000 m<sup>3</sup>*

## Graf 2. Procentualno učešće pojedinih sortimenata u ukupnoj proizvodnji šumskih sortimenata u 2025. god.

Percentage participation of different assortments in total production of forest assortments in 2025

### Metodološka objašnjenja

Podaci o proizvodnji šumskih sortimenata, obrađeni u ovom saopćenju, urađeni su na osnovu rezultata obrade entitetskih zavoda za statistiku iz redovnog mjesečnog istraživanja.

Mjesečne izvještaje podnose sva poduzeća koja se bave stalnom proizvodnjom šumskih sortimenata iz šuma u državnoj svojini, bez obzira da li im je iskorištavanje šuma osnovna ili sporedna djelatnost.

Podacima je obuhvaćena samo proizvodnja šumskih sortimenata iz državnih šuma, dok šumski sortimenti proizvedeni u šumama na koje postoji pravo svojine nisu uključeni.

Iskazane količine predstavljaju neto drvenu masu sortimenata izraženu u zapreminskim metrima.

**Četinari** su vrste drveća iz klase golosjemenica (Gymnospermae), pretežno iz porodice Pinaceae. Ovdje spadaju autohtone, komercijalne vrste drveća kao što su jela (*Abies alba*), smrča (*Picea abies*) te bijeli (*Pinus sylvestris*) i crni bor (*Pinus nigra*). Drvo četinarara ima jednostavniju građu i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *softwood*.

### Notes on methodology

The data on production of forest products presented here have been prepared on a basis of data provided by entity statistical offices underlying the regular monthly survey results.

Monthly reports are provided by all companies performing their business activities in the forestry sector and permanently producing forest products.

The data presented here cover only production of forest products manufactured out of the resources from the state-owned forest. Forest products from private forests are not covered here. The given quantities represent net volume measured in cubic meters

**Coniferous** are tree species from systematic class of naked-seed plants (Gymnospermae), mostly from Pinaceae tree family. Here belong domestic commercial tree species: european Fir (*Abies alba*), Spruce (*Picea abies*), Scots Pine (*Pinus sylvestris*) and European Black Pine (*Pinus nigra*). Coniferous wood is less complex in structure and in international classification, regardless its mechanical properties, it is classified as *softwood*.

**Lišćari** su vrste drveća iz klase skrivenosjemenica (Angiospermae). Ovdje spadaju autohtone, komercijalne vrste drveća lišćara kao što su: bukva (*Fagus sylvatica*), hrast kitnjak (*Quercus petraea*) te vrste plemenitih lišćara iz rodova *Fraxinus* (jasen), *Acer* (javor), *Ulmus* (brijest) i *Prunus avium* (divlja trešnja) i ostalih tvrdih i mekih lišćara. Drvo lišćara je složenije građe u odnosu na drvo četinarina i u međunarodnoj klasifikaciji se, bez obzira na mehanička svojstva označava nazivom *hardwood*.

**Trupci** su šumski drveni sortimenti odgovarajućih fizičkih i mehaničkih svojstava, namjenjeni za dalju mehaničku preradu (piljenje, rezanje ili ljuštenje).

**Jamsko drvo** obuhvata šumske drvene sortimente povoljnih fizičkih i mehaničkih svojstava čiji se prirodni oblik, dimenzije i svojstva koriste za izgradnju i održavanje jamskih kopova i rudarskih okna. Može se upotrebljavati i za krovne konstrukcije.

**Ostalo dugo drvo** obuhvata tehničko drvo čiji se prirodni oblik, dimenzije i svojstva koriste za proizvodnju TT stubova, stubova za skele, šipova, jarbola i sl.

**Prostorno drvo** obuhvata drvo lošijih tehničkih karakteristika, oblo ili cijepano koje se koristi u hemiskoj preradi za proizvodnju celuloze, drvenjače, drvene vune, tanina i sl.

**Ogrjevno drvo** je drvo namjenjeno neposredno za ogrijev ili proizvodnju drvenog uglja.

**Ostalo grubo obrađeno drvo** obuhvata sitno tehničko drvo kao što su stubovi za hmelj ili lozu, motke, kolje, štapovi, ručke, obruči, pletarski štapovi, pruće i sl.

**Broad leaf** are tree species from systematic class of covered-seed plants (Angiospermae). Here belong domestic commercial species: Beech (*Fagus sylvatica*), Sessile Oak (*Quercus petraea*), so cold noble broad leaf trees like species from genera *Fraxinus* (Ash), *Acer* (Maple), *Ulmus* (Elm), *Prunus avium* (Wild Cherry) and hard and soft broad leaf tree species. Broad leaf wood is more complex in structure than coniferous wood and in international classification, regardless its mechanical properties, it is classified as *hardwood*.

**Logs** are forestry wood products with proper physical and mechanical properties, intended for further mechanical processing (sawing, slicing or peeling).

**Mining wood** include forestry wood products with proper physical and mechanical properties which natural shape, dimensions and properties are used for construction and maintenance of mining pits. It could also be used for roof constructions.

**Other long wood** includes technical wood which natural shape, dimensions and properties are used for manufacture of utility poles, scaffold poles, foundation poles, masts etc.

**Cordwood** include wood of bad technical characteristics, round or split, used in chemical processing for production of chemical and mechanical pulp, wooden wool, tannin etc.

**Fuelwood** is wood intended for heating or production of charcoal.

**Other wood, roughly worked** is small technical wood like hop and vine poles, other poles, pickets, sticks, handles, wooden rims, brushwood etc.
